2018 Quality Innovation Challenge

Every woman and girl has the right to live with dignity and have a choice in decisions that affect her life.

We're looking for innovative ideas to improve quality in sexual and reproductive health and empower women and girls in new ways.

Application is open to 2018 International Conference of Family Planning attendees.

Two ways to participate:

+ Apply In-Person

Up to 5 grants of \$100,000 each
Tuesday, November 13, 1:25-2:25 pm
MH 1+2, Kigali Convention Center

+ Apply Online

Up to 4 grants of \$50,000 each
Applications accepted from
November 13-15

Submission guidelines will be announced on November 13 at the launch event and online at www.packard.org/quality

WELCOME MESSAGE

On behalf of the Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health, the Ministry of Health of the Republic of Rwanda and the conference organizers, we warmly welcome you to the 2018 International Conference on Family Planning (ICFP) at the Kigali Convention Centre in Kigali, Rwanda.

The ICFP serves as a strategic inflection point for the family planning and reproductive health community worldwide. This year's conference in particular will be defined by the next generation of family planning leaders as youth from around the world gather to chart our path forward.

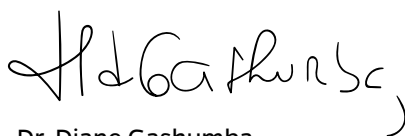

As the family planning and global development community work to achieve our goal of enabling an additional 120 million women to access voluntary, quality contraception by 2020 and ensuring universal access to reproductive health by 2030, we know that in doing so we are “Investing for a Lifetime of Returns” in many sectors of society in addition to health — from education and environment to the economy and empowerment of women.

We are thrilled to be able to return to Africa for this year's conference and to highlight some of the spectacular gains in family planning that are occurring in many parts of Africa today, as well as the challenges that lie ahead. For this fifth ICFP, we meet in Rwanda, one of the family planning success stories of recent history. We are excited to host the family planning community in Rwanda, to continue our collective work and learn from each other's experiences to find new ways to help us realize this goal.

We have an exciting scientific program planned and hope that you will return to your home country reinvigorated to make quality, voluntary family planning accessible, affordable and attainable for all. We also hope that you are able to find time to explore the beautiful rolling hills of Kigali. Rwanda is a country rich with culture, decorated by breathtaking landscapes, and filled with people ready to welcome you and share their beautiful home.

We look forward to personally welcoming each of you — from all parts of the world — to the 2018 International Conference on Family Planning, and to working together to making our family planning and reproductive health goals a reality.

Sincerely,

Dr. Diane Gashumba

Minister of Health, Rwanda

Jose “Oying” Rimón II

Chair, ICFP International Steering Committee, Director, Bill & Melinda Gates Institute for Population and Reproductive Health, Population Family and Reproductive Health Johns Hopkins University Bloomberg School of Public Health

ACKNOWLEDGMENTS

The conference organizers would like to express their sincere gratitude to the following for their contributions to the 2018 International Conference on Family Planning:

International Steering Committee Chairs and Sub-committee Chairs:

Chair: **Jose “Oying” Rimón II**, Director, Bill & Melinda Gates Institute for Population & Reproductive Health and ICFP ISC Chair
Director of the Secretariat: **Kellie Welborn**, Director, ICFP ISC Secretariat, Senior Program Officer, Bill & Melinda Gates Institute for Population & Reproductive Health
Advocacy and Accountability Sub-committee Co-chairs: **Jay Gribble**, Palladium; **Sarah Whitmarsh**, Advance Family Planning; **Kamlesh Lalchandani**, Jhpiego India
Communications Sub-committee Co-chairs: **Christina Cherel and Marianne Amoss**, Bill & Melinda Gates Institute for Population & Reproductive Health; **Guy Bloembergen** and **Olivia Howell**, Global Health Strategies
Demographic Dividend Sub-committee Co-chairs: **Elizabeth Leahy Madsen**, Population Reference Bureau; **Ian Salas**, The Challenge Initiative
Faith Sub-committee Co-chairs: **Peter K. Munene**, Faith to Action Network; **Mona Bormet**, Christian Connections for International Health
Scientific Sub-committee Co-chairs: **Yoonjung “YJ” Choi**, Deputy Director, Performance Monitoring & Accountability; **Jean Christophe Rusatira**, Bill & Melinda Gates Institute for Population & Reproductive Health
Youth Sub-committee Co-chairs: **Catherine Baye**, Bill & Melinda Gates Institute for Population & Reproductive Health; **Jillian Gedeon**, International Youth Alliance for Family Planning

National Steering Committee Chairs and Sub-committee Chairs:

Executive Co-chairs: **Dr. Jeanine Condo** (chair), Director General Rwanda Biomedical Center, RBC; **Dr. Felix Sayingoza**, Maternal Child and Community Health Division manager, RBC / MCCH
Secretariat Co-chairs: **Dr. Diane Mutamba**, ICFP Coordination, RBC/UNFPA; **Julius Mbaraga**, ICFP Coordination, RBC / MCSP-Jpiegho
Communications Sub-committee Co-chairs: **Malick Kayumba** (Chair), Division Manager of the Health Communication Center, Rwanda Biomedical Center; **George Gahenda** (Co-chair), Managing Director, Urunana; **Jenepher Turatsinze** (Secretary), Director of Program and field operations, SFH (Society for Family Health)
Demographic Dividend Sub-committee Co-chairs: **Stuart Kyazze** (Chair), Infrastructure Sector Monitoring Officer, MINECOFIN; **Venant Habarugira** (Co-chair), Director of sensus, NISR; **Dr Agnes Ntibanyurwa** (secretary), Assistant Representative, UNFPA
Faith Sub-committee Co-chairs: **Dr Theophile Dushime** (Chair), Division Manager /Emergency Medical Services, MoH; **Rev Francis Karemera** (Co-chair), General Secretary, PEAR; **Ntihemuka Eraste** (Secretary), Fellow in HIV/AIDS program at RCLS, RICH (Rwanda Interfaith Council for Health)
Fundraising Sub-committee Co-chairs: **Dr Jean Pierre Nyemazi** (Chair), Permanent Secretary, MoH; **Frank Murangwa** (Co-chair), Director of Destination Marketing, RCB; **Maureen Twahirwa** (secretary), Communications & Resource Mobilization Analyst, UNFPA
Logistics Sub-committee Co-chairs: **Dr Parfait Uwaliraye** (Chair), Director General of Planning, Health Financing & Information System, MoH; **Ornella Kaze** (Co-chair), A.g. Director General, MINAFET; **John Mckay** (secretary), Strengthening Capacity of Health Services (SCHS) Team Lead, USAID
Scientific Sub-committee Co-chairs: **Dr Leon Mutesa** (Chair), Associate Professor, University of Rwanda; **Dr Etienne Karita** (Co-chair), Country Director, Project San Francisco; **Dr Aline Umubyeyi** (secretary), Dean of the school of Public Health, University of Rwanda
Youth Sub-committee Co-chairs: **Sandrine Umutoni** (Chair), Director General, Imbuto Foundation; **Helene Nomugisha** (Co-chair), President at Afriyan; **Aflodis Kagaba** (secretary), Executive Director HDI

Many thanks to the companies and organizations that helped make this conference possible:

Kigali Convention Centre, The Events Factory, Ellis Travel, Global Health Strategies (Courtney Hamilton, Guy Bloembergen, Olivia Howell, Loren Miller, Madeline Pensiero, Juliette Delman-Lagot, Olivia Ades Lawlor, Kate Schwartz, Christina Ragone), The Torchlight Collective (Matt Matassa, Lindsay Menard-Freeman), Graphic Beans, The Office of Kristian Bjørnard, Awen Southern Translations.

GENERAL INFORMATION

We wish you a warm welcome to Kigali for the International Conference on Family Planning 2018.

This global gathering will take place at the Kigali Convention Centre (KCC). The KCC is conveniently located a short 15-minute drive from the airport and marks the half way point to the Kigali Central Business District. The information provided below is to enable all conference delegates to better access both the ICFP and Kigali, but for further assistance please do not hesitate to contact the local event management team at reservations@theeventsfactory.biz or the ICFP conference organizers at 0788625656.

On arrival in Kigali

All delegates to the ICFP 2018 will be received by a team of ushers just outside the luggage area at the Kigali International Airport in a branded ICFP Tent.

This team will assist participants with all information about the event, transport and hotel details.

Registration and accreditation

All delegates are required to register and we highly advise all participant to register in advance on the ICFP website to receive their conference materials (bags & badges) on arrival.

Onsite registration is open from 9-14 November from 09:00-20:00 daily at the KCC just beyond the main security gate

The accreditation center at the Kigali Convention Centre will be open from 9-13 November 2018 from 09:00-20:30.

Transportation

Transportation has been organized for all ICFP delegates staying at designated ICFP partner hotels. This includes airport shuttles to the different partner hotels (posted on the ICFP website) as well as daily shuttles between the partner hotels and the Kigali Convention Centre. Taxis are also available at the Kigali International Airport and at many of our partner hotels.

Currency

Rwanda's unit of currency is the Rwandan franc (FRW). Most international currencies are freely exchangeable at all banks and Forex Bureaus. It is advisable to always use an official Forex Bureau or bank when exchanging currency. The official rates are available on the website of the national bank (www.bnr.rw) but the Forex Bureau will normally offer a better rate.

There are multiple ATMs throughout Kigali, including at the KCC, that are accessible to visitors.

Credit cards are accepted in most supermarkets, restaurants and hotels.

Weather

Fractionally south of the Equator and with much of the country lying at 1500m altitude, Rwanda enjoys an agreeable tropical highland climate. Temperatures in Kigali vary between 24 and 20 degrees in the evenings. The month of November is however during the rainy season and travelers are advised to plan accordingly.

Electricity

The electricity current in Rwanda is 220 volts AC, 50Hz. The plug type mostly used is the round European plug but travelers are advised to carry a universal adapter as some hotels might have different plugs.

Security

Rwanda remains one of the safest countries to live in on the African continent and ICFP attendees' security while in Kigali is of the utmost concern. However, in case of an emergency, the toll free number to call is 112.

Customs

Delegates and exhibitors who are importing goods will need to send them to the KCC in advance as it takes between 2 to 3 days to process through customs. Our preferred clearing firms are:

Bolloré Logistics

Contact: Jean Luc Miravumba

Tel +250252575584

Email: jeanluc.miravumba@bollore.com

Spedag Interfreight

Contact: Humphrey Tel: +250788383012

Email: humphrey.pule@spedaginterfreight.com

Telecommunication Facilities

Upon arrival at the airport, interested delegates have the option to purchase SIM Cards for either of the two local telecom operators (MTN, Airtel).

Internet

Most hotels will offer Internet connectivity to all residents but heavy users are advised to buy their own data connectivity from any of the telecom companies available at the airport.

Tipping

Tipping is not customary in most places in Rwanda, with the exception of some higher-end restaurants in town where 10% of the final bill is standard.

Kigali City

Kigali is located at Rwanda's geographical heart. The rapidly growing city of Kigali is not only the national capital, but also the country's most important business center and main port of entry.

Peacefully nestled along picturesque hilltops, Kigali is a thriving African city immediately notable for its cleanliness, orderliness and hospitality.

There are currently over 1,000 three to five star rated hotel rooms within easy access of the Kigali Convention Centre and downtown Kigali.

Some other key info:

- Land Area : 26,338 square Kilometers
- Population : 11.5million
- GDP per capita : \$729 USD (as per 2016)
- Time zone : CAT (UTC+2)
- Traffic flow : Keeps right
- Calling code : +250

Bars & Restaurants in Kigali

The city's many restaurants serve traditional or contemporary African and international cuisine – a wide choice to suit every taste.

For more information, visit

www.africaninnovationsummit.com/uploads/venue/DINE,SHOP&GETAROUND_2018.pdf

Tourism Attractions in Rwanda

Rwanda is a lovely country to visit. If you make time before or after the event, feel free to contact any of our partner tour agencies through the ICFP websites. For more information on tourism in Rwanda please visit rwandatourism.com/destinations

Health

There will be a standby medical team at the Kigali Convention Centre to assist ICFP 2018 delegates requiring their services. The Help Desk at the facility will be happy to assist, alternatively please call + 1110

Travelers should ensure they are up to date with vaccinations. The government of Rwanda requires proof of yellow fever vaccination if travelling from a country with risk of yellow fever or a country with an active yellow fever outbreak.

It is advisable not to drink tap water. Bottled water can be bought in all towns – make sure the seal is intact.

Kigali's elevation sits at about 5,000 feet, which may require adjustments for those coming from lower altitudes or who have health issues.

Accepted International Health Insurances:

Henner-GMC

PROGRAM SUMMARY

The 2018 International Conference on Family Planning offers our most impressive program to date. More than 170 sessions will occur across three days, including over 1,600 individual oral and poster presentations.

The 2018 ICFP Opening Ceremony begins at 16:30 on Monday, 12 November in the Auditorium of the state-of-the-art Kigali Convention Centre (KCC). It will include the second awarding of the Global Humanitarian Award for Women's and Children's Health. The Opening Ceremony will be followed by a Welcome Reception hosted by the Government of Rwanda, where delegates can enjoy food and beverages while visiting over 100 exhibition booths throughout the concourse. Please be sure to arrive early to attend the opening ceremony, as you will need to go through security and pick up your registration badge before you will be allowed to enter the KCC.

Beginning Tuesday, 13 November each morning will start with a 90-minute plenary session at 8:30 to set the tone for the day. Sessions are organized into 80-minute time blocks, with four session blocks on Tuesday and Wednesday and two on Thursday leading into the Closing Ceremony Luncheon. Each block is comprised of up to 18 simultaneous sessions organized by theme.

We listened to your feedback from the 2016 ICFP and have incorporated your suggestions to make this year's conference more engaging and inspiring. We are encouraging presenters to utilize a more interactive approach to their presentations — providing them with helpful tips and access to audience engagement software. We have also kept the customary sessions to four presenters to allow time for more in-depth discussion and interaction, which will be facilitated by a designated chairperson. And, we are introducing a new, interactive and fast-paced flash presentation format for at least one session in every track to allow the audience to personally interact with the presenter(s) whose material is most interesting to them. The seven poster sessions—three on Tuesday and Wednesday and one

on Thursday—will also allow delegates an opportunity to speak one-on-one with the authors, and judges will award the best posters with prizes.

In order to allow for a more inclusive conference, we have tripled the number of sessions with simultaneous French translation services and will be utilizing software in each and every session that allows participants to translate the presentations simultaneously into over 60 languages and provides voice-to-text subtitles for our delegates who are hearing impaired.

Lunch is provided for all participants on Tuesday, Wednesday and Thursday with support from The David & Lucile Packard Foundation, Bayer AG and Pfizer Inc. at which time conference attendees will have the opportunity to attend special lunch plenaries, workshops, round-table discussions and mentorship meet-up opportunities organized by the Demographic Dividend, Youth, Faith and Advocacy and Accountability Sub-Committees. As well, morning and afternoon coffee & tea breaks — sponsored by DKT — are scheduled for Tuesday and Wednesday, with one on Thursday morning.

Over 100 organizations will be exhibiting throughout the conference venue sharing their products and expertise and offering special prizes to those who interact with exhibitors to be able to enter to win several fabulous prizes, including tablets, computers and even free registration to the 2020 ICFP! And once again Family Planning Voices (FP Voices) and The William & Flora Hewlett Foundation invites conference participants to make their voices heard in the FPVoices video and photo booth and scheduled one-on-one interviews to tell their stories about working to improve access to family planning around the world.

As well, there are a large number of on- and off-site, organization-sponsored auxiliary events, including workshops, informational sessions, special events and

receptions which will occur every morning and evening outside of official ICFP conference hours. Check the conference program for locations, times and invitation details.

There will be two special events from 17:45- 19:00 on 13 & 14 of November taking place in the Auditorium to which all are invited:

13 November: *Red Carpet Celebration/Evening Among the Stars* — co-sponsored by PSI. Come walk the red carpet and join us for a celebration with the stars of Family Planning – featuring the inaugural Lifetime Achievement Award.

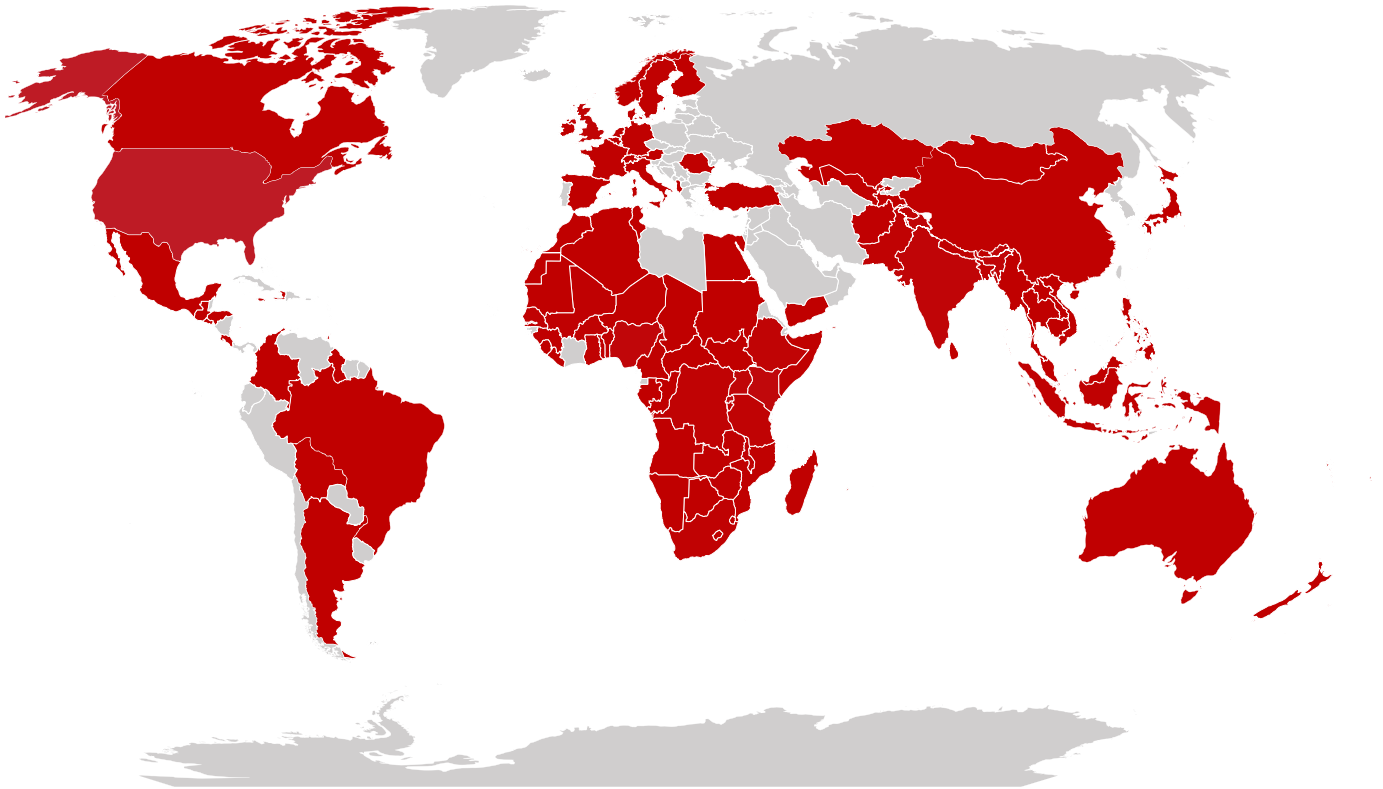

14 November: *FPitchfest* – 10 CEOs of family planning and reproductive health organizations will warm up the crowd by pitching their out-of-the-box idea that they feel will change the game in FP over the next five years. The audience will vote for their favorite. Then, for the finale two young finalists of the AmplifyChange Grant competition will pitch their idea for additional funds added to their grant with the audience determining the winner.

The Closing Luncheon Ceremony will begin at 13:15 on Thursday, 15 November, in the Auditorium and will include the presentation of the Poster Presentation Awards, Excellence in Leadership (EXCELL) Awards, and a very special performance that you won't want to miss!

ICFP 2018 ATTENDEES

Over 3,700 participants from around the world have joined us in Kigali this year to attend the 2018 International Conference on Family Planning.

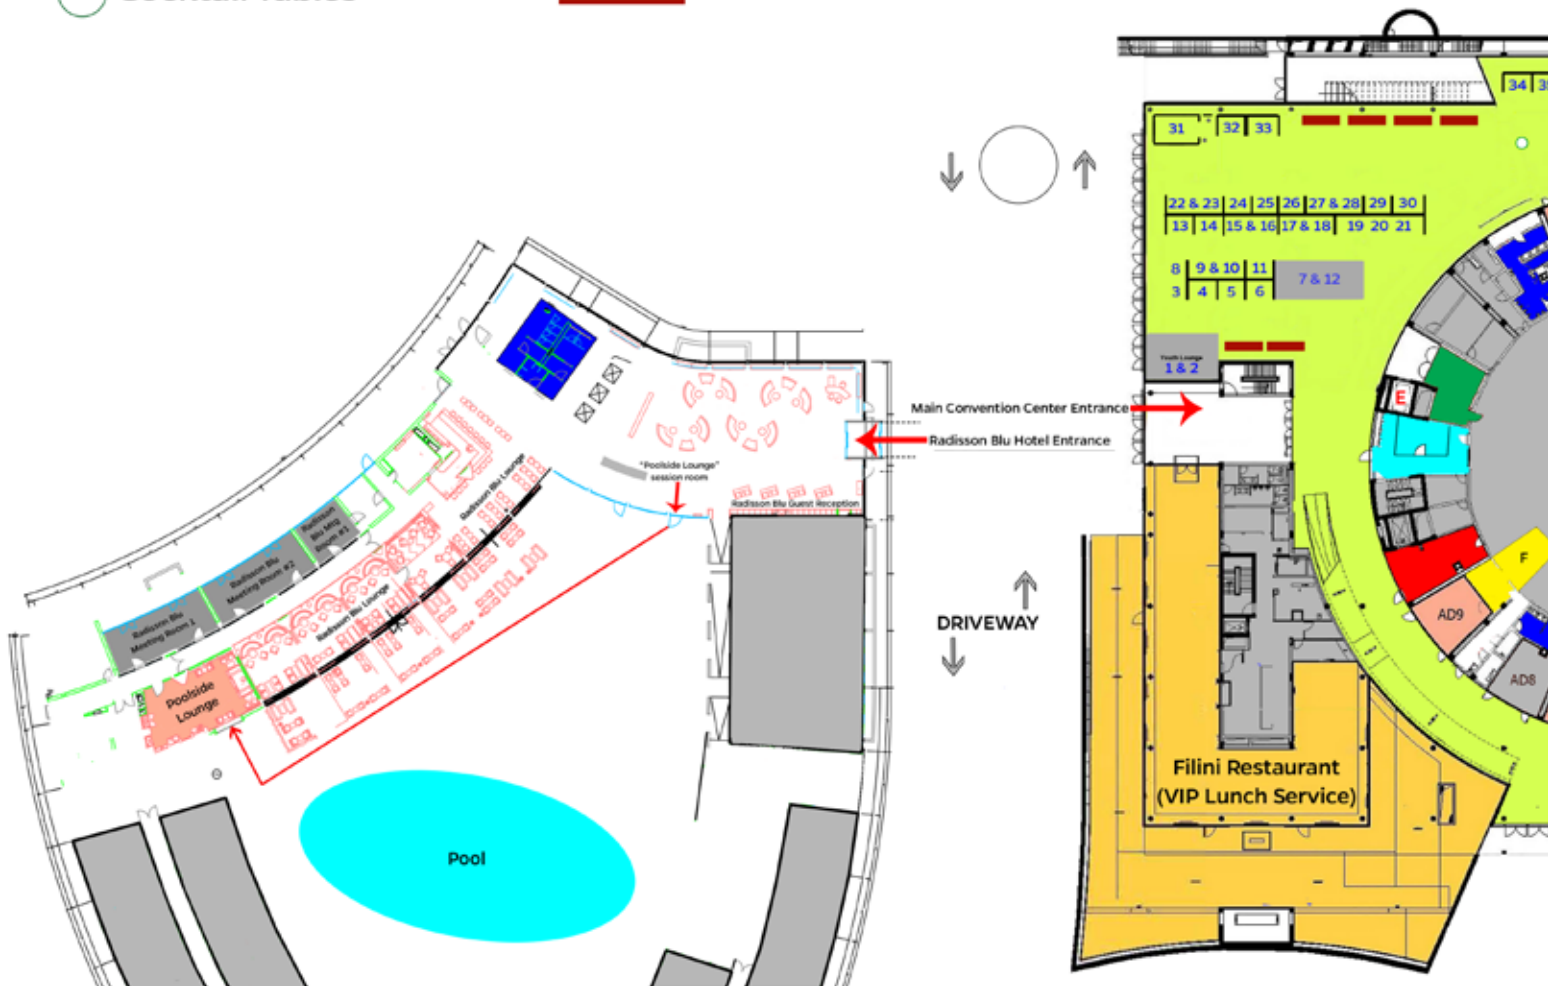

The map below highlights the over 110 countries represented at this year's ICFP. Thank you for making this conference our most impressive and diverse yet!

WITHOUT A WORLD WHERE EVERY GIRL AND WOMAN CAN DECIDE WHAT TO DO WITH HER BODY WITH HER LIFE AND WITH HER FUTURE QUESTION.

Without question.

WHEN SHE DECIDES, THE WORLD IS BETTER, STRONGER, SAFER.

She decides whether, when, and
with whom.
To have sex.
To fall in love.
To marry.
To have children.

She has the right.
To information, to healthcare,
to choose.

She is free.
To feel pleasure.
To use contraception.
To access abortion safely.
To decide.

Free from pressure.
Free from harm.
Free from judgement and fear.

Because when others decide for her,
she faces violence, forced marriage,
oppression.

She faces risks to her health, to her
dignity, to her dreams, to her life.

When she does not decide, she
cannot create the life she deserves,
the family she wants, a prosperous
future to call her own.

We - and you, and he, and they - are
uniting. Standing together with her
so she can make the decisions only
she should make.

Political leadership and social
momentum are coming together like
never before.

But we can go further and we can
do more.

From today, we fight against the
fear.
We right the wrongs.
We mobilise political and financial
support.
We work to make laws and policies
just.
We stand up to what is right.

Together we create the world that is
better, stronger, safer.

But only if. And only when.

SheDecides.

She Decides.

TRACKS

The 2018 ICFP features 15 spotlighted tracks. Each track is comprised of sessions, auxiliary events and workshops organized around a particular topic.

Many ICFP sessions and events could fall under several different topics but the following at-a-glance guides to the spotlighted tracks represent one way of categorizing the robust and diverse 2018 ICFP program.

The Tracks:

-  Returns on investment in family planning and the demographic dividend
-  Policy, financing, and accountability
-  Demand generation and social and behavior change
-  Fertility intentions and family planning
-  Reproductive rights and gender empowerment
-  Improving quality of care
-  Expanding access to family planning
-  Advances in contraceptive technology and contraceptive commodity security
-  Integration of family planning into health and development programs
-  Sexual and reproductive health and rights among adolescents and youth
-  Men and family planning
-  Family planning and reproductive health in humanitarian settings
-  Faith and family planning
-  Urbanization and reproductive health
-  Advances in monitoring and evaluation methods

Oral Session coding: Day-Time block- Session # 1-18- Order of presentation
e.g: 1.1.6.8: Day 1, time block 1, session 6, presentation 8.

Poster Session coding: The first digit represents the poster session and the second/third/fourth digit(s) represent the poster display number
e.g: 2.018: Poster session 2 and poster board 018.

Returns on investment in family planning and the demographic dividend

Track Chairs

Jason Bremner; Family Planning 2020

Jean-François Kobiané; Institut Supérieur des Sciences de la Population

The returns on investment in family planning and the demographic dividend track tackles complex aspects of realizing various returns on investment in family planning and taking advantage of the demographic dividend potential. A demographic dividend is the accelerated economic growth that can result from improved reproductive health, a rapid decline in fertility and the subsequent shift in population age structure. With fewer births each year, a country's working-age population grows larger relative to the young dependent population. With more people in the labor force and fewer children to support, a country has a window of opportunity for economic growth if the right social and economic investments and policies are made in health, education, governance and the economy. The demographic dividend has proven to be an evidence-based policy framework and has gained traction around the world as governments, civil society organizations and other stakeholders seek to better promote family planning as a driver for demographic transition and economic growth.

SESSIONS

Date	Time	Session Title	Location
Sunday, 11 November	08:30-17:00	Demographic dividend pre-conference / Pré-conférence sur le dividende démographique	MH1
Monday, 12 November	14:00-16:00	High-level ministerial meeting on the demographic dividend (Gates Institute, World Bank and UNFPA) / Réunion ministérielle de haut niveau sur le dividende démographique (Institut Gates, Banque mondiale et UNFPA)	Auditorium Club
Tuesday, 13 November	10:25-11:45	1.1.02 Maximizing returns on family planning through cross-sector approaches to family planning, environment and development integration in Africa / Maximiser les rétributions de la planification familiale à travers des approches inter-sectorielles de l'intégration de la planification familiale, l'environnement et le développement en Afrique	AD7
	11:55 - 13:15	1.2.07 Measuring a lifetime of returns: family planning, demographic dividend, and sustainable development goals / Mesurer les rétributions durables: La planification familiale, le dividende démographique et les objectifs du développement durable	MH 1 (Includes French translation)
	14:35 - 15:55	1.3.07 Speed round on applying demographic dividend models for policy advocacy / Speed round sur l'application des modèles de dividende démographique pour le plaidoyer politique	MH 3 (Includes French translation)
	16:20 - 17:40	1.4.07 Measuring impacts: family planning, unintended pregnancy, youth and child marriage / Mesurer les impacts: La planification familiale, les grossesses non désirées, la jeunesse et le mariage d'enfants	AD1
Wednesday, 14 November	11:55 - 13:15	2.2.07 Country approaches to making the investment case for family planning / Approches des pays pour élaborer le cadre d'investissement pour la planification familiale	Auditorium Club 3 (Includes French translation)
	14:35 - 15:55	2.3.06 Assessing the cost and benefit of different family planning service delivery approaches / Évaluer les coûts et bénéfices de différentes approches de prestation de services de planification familiale	AD7
Thursday, 15 November	11:55 - 13:15	3.2.01 Equitable access, sustainable investments, and development benefits: investing in family planning for a lifetime of returns / Accès équitable, investissements durables et bénéfices du développement : Investir dans la planification familiale pour des rétributions durables	MH 4 (Includes French translation)

Policy, financing, and accountability

Track Chairs

Naomi Lince-Deroche; Guttmacher Institute

Vicky Boydell; University of Cambridge

The Policy, Financing, and Accountability track covers research, intervention descriptions and advocacy papers related to global initiatives and frameworks for family planning, including universal health coverage, and the formulation and implementation of national and sub-national laws and policies related to family planning. The papers included explore the broad funding landscape, costs and financing strategies for family planning. They cover both the public and private sectors and highlight various accountability strategies in the context of family planning. Finally, the papers also explore data utilization efforts for policy, advocacy and accountability.

Demand generation and social and behavior change

Track Chairs

Arzum Ciloglu; Johns Hopkins Center for Communication Programs

Anna Mackay; Marie Stopes International

Social and behavior change (SBC) interventions and demand generation activities seek to influence people to make healthier decisions that ultimately create long-lasting positive impact on health and well-being. SBC interventions work at multiple levels and seek to not only increase service utilization by individuals or create new habits, but also to address social norms and identify structural, social, legal and other barriers and facilitators to desired change. Effective demand generation and SBC interventions work to improve communication between providers, clients, families, couples and community members and increase engagement of community leaders and other decision-makers. They are grounded in theory, a tested design and implementation process and have measurable impact.

Fertility intentions and family planning

Track Chairs

Michelle Hindin Organization: Population Council

Kazuyo Machiyama Organization: London School of Hygiene and Tropical Medicine

This track covers two main subject areas on fertility intentions and family planning—understanding fertility intentions and addressing unmet need for family planning. Every year, there are 85 million unintended pregnancies—40% of all births. Advancing understanding of fertility intentions is an important precursor to achievement of reducing unintended pregnancies. Three sessions on this topic include 1) measurement and outcomes of fertility preferences; 2) consequences and estimates of unintended pregnancy; and 3) understanding fertility desires of married adolescents.

Among an estimated 885 million women of in low- and middle-income countries who want to avoid pregnancy, 24% have unmet need for modern contraception. This track includes sessions on 1) postpartum and post-abortion family planning services; 2) in-depth reasons for unmet need for contraception; and 3) use-effectiveness of modern and traditional methods.

Reproductive rights and gender empowerment

Track Chairs

Priya Nanda; Bill & Melinda Gates Foundation

Caitlin Gerdt; IBIS Reproductive Health

Putting family planning in context, this track focuses on factors that inhibit and enable sexual and reproductive health choices and what can be done to address them in programs and policies. It covers gender-based and intimate partner violence, post-abortion care and human rights. It also presents new options and evidence for women's self-care, innovations in understanding women's autonomy and using digital health methods to reduce women's risk of violence. Finally, an unprecedented panel explores connections between sexual pleasure, family planning and reproductive health.

Improving quality of care

Track Chairs

Surendra Sharma; Jhpiego

Andreea Creanga; Johns Hopkins University

Richard Adanu; University of Ghana

Provision of quality of care in family planning services is critical to improving use of family planning methods, both by attracting new contraceptive users and by maintaining existing users. This track covers a range of research and program issues that address quality of care aspects in family planning. Presentations in this track aim to inform the design, implementation, and evaluation of high quality family planning programs by discussing the role quality of care plays in the success of such programs, describing novel interventions to improve quality of care, and proposing new approaches to measure and monitor family planning service quality.

Expanding access to family planning

Track Chairs

Ben Bellows: Population Council

Chelsea Polis: Guttmacher Institute

Ian Salas: Johns Hopkins University

Access to safe, voluntary family planning is a human right. In order to ensure that individuals are empowered to exercise this right, it is imperative that our field continue to identify ways to expand access to family planning. This track focuses on a wide array of approaches to do so including addressing: socioeconomic, geographic, and demographic inequalities; challenges and solutions to broadening the method mix; task shifting and community-based delivery approaches; total market approach; public-private partnerships to expand access; the safety and effectiveness of various contraceptive methods, and other approaches.

Advances in contraceptive technology and contraceptive commodity security

Track Chairs

Kirsten Vogelsong; Bill & Melinda Gates Foundation

Denise Harrison; United States Agency for International Development

To address current and future unmet need for family planning, advances in contraceptive technology and contraceptive commodity security are required. Supply-side interventions complement demand creation activities to ensure the availability of a wide range of client-accepted contraceptive methods. Accurate supply planning as well as timely and well-coordinated procurement, warehousing and logistics reduce stock outs, support uninterrupted access to family planning, and enhance client satisfaction. Strong supply chain systems will be required to support access to new contraceptives as they are developed, introduced and scaled. More than half of unmet need for family planning is attributable to method-related reasons and efforts are underway to address this gap through innovations that are designed to better respond to user needs and preferences. This track highlights recent advances to improve logistics and commodity security and describes efforts to address barriers to access and use of contraception through development and introduction of novel contraceptives.

Integration of family planning into health and development programs

Track Chairs

Angela Akol; FHI 360

Baker Maggwa; United States Agency for International Development

Access to and use of voluntary quality and equitable family planning services will contribute significantly to the global community's ability to realize the complex and integrated Sustainable Development Goals (SDG) agenda. However, to realize this contribution will require designing and implementing integrated multi-sectoral responses that reflect our fundamental understanding of the linkages and complex relationships between the health, social, economic and environmental development sectors. Experience with the integration of family planning within the health and other development sectors will be shared in this track on the following thematic areas: Post-abortion care and family planning, Integration of family planning with maternal and child health services, Integration of family planning with services for HIV/AIDS and sexually transmitted infections, Integration of family planning with primary health care services, Integrating of family planning with population, health, and environment program, Integration of reproductive health and climate adaptation programs, Integration of family planning with socio-economic development programs

Sexual and reproductive health and rights among adolescents and youth

Track Chairs

Name: Jane Otai
Organization: Jhpiego-John Hopkins Affiliate

Name: Abu Sayed Hasan
Organization: United Nations Population Fund

Adolescents and young people lag behind when it comes to access to family planning services. To achieve the FP2020 goal of increasing family planning uptake among girls and women, many barriers faced by young people have to be overcome. From the youth themselves, the communities around them, health facilities and policies, there is need to come up with innovative approaches to help youth access family planning without fear of stigma and discrimination. Family planning information and services that will reach the different segments of young people will go a long way in ensuring that unplanned pregnancies are a thing of the past. In addition, young people, who know their challenges, must be involved in planning and designing programs that benefit them. This is the only way we can have thriving and transformed young people who live a fulfilled life.

SESSIONS

Date	Time	Session Title	Location
Saturday, 10 November	08:30-17:30	Youth pre-conference / Pré-conférence des jeunes	MH 2, 3 & 4 (Include French translation)
Sunday, 11 November	08:30-17:30	Youth pre-conference / Pré-conférence des jeunes	MH 2, 3 & 4 (Include French translation)
	09:00-18:00	The global early adolescent study pre-conference event: research & programming with young adolescents / Événement pré-conférence de l'étude mondiale sur la pré-adolescence : Recherche & programmation avec les jeunes adolescents	Off-Site at the Lemigo Hotel
Monday, 12 November	08:30-11:30	Youth pre-conference / Pré-conférence des jeunes	MH 2, 3 & 4 (Include French translation)
Tuesday, 13 November	10:25-1:45	1.1.05 Youth-led SRHR activities in francophone West Africa: learnings & insights from young advocates in the op region / Activités pour les droits de SSR dirigées par les jeunes en Afrique de l'Ouest francophone : Apprentissages & perspectives de jeunes plaideurs de la région du PO	Auditorium Club 3 (Includes French translation)
		1.1.06 Planning for the future / Planifier l'avenir	MH 4 (Includes French translation)
		1.1.07 Empowering youth to make informed reproductive choices / Donner aux jeunes les moyens de faire des choix informés en matière de santé reproductive	AD5
	11:55-13:15	1.2.08 What resonates?: finding the key to reaching youth / Qu'est-ce qui fait écho chez les jeunes: Trouver la clé pour leur parler	Auditorium Club 1
	14:35-15:55	1.3.01 Achieving sexual and reproductive health and rights for young people with disabilities / Réaliser les droits de santé sexuelle et reproductive des jeunes ayant un handicap	AD7
		1.3.03 From tokenism to inclusion in West Africa: youth leadership pays! / Du symbolisme à l'inclusion en Afrique de l'Ouest: Le leadership des jeunes porte ses fruits!	MH 2 (Includes French translation)
	16:20-17:40	1.4.08 Adolescent and youth sexual and reproductive health in asia in a flash / La santé sexuelle et reproductive des jeunes et des adolescents en Asie, en un éclair	MH 3 (Includes French translation)
	Wednesday, 14 November	10:25 - 11:45	2.1.06 Young women leading the way: improving youth SRHR through empowering young women / Ces jeunes femmes qui dirigent : Améliorer les droits de SSR des jeunes en permettant l'autonomisation des jeunes femmes
2.1.07 The case of modern contraception among youth / La contraception moderne chez les jeunes			AD6
2.1.08 Adolescent girls under siege: understanding the sexual pressures of young women and how to empower them through sexual and reproductive health / Les filles adolescentes assiégées: Comprendre les pressions sexuelles auxquelles font face les jeunes femmes, et comment leur permettre d'être autonomes à travers la santé sexuelle et reproductive			Poolside Lounge at Radisson Blu
11:55 - 13:15		2.2.08 Increasing access and uptake of sexual and reproductive health services among youth in sub-saharan africa / Augmenter l'accès et l'adoption des services de santé sexuelle et reproductive chez les jeunes en Afrique subsaharienne	MH 3 (Includes French translation)
		2.2.09 Let's talk about sex: reaching youth with sexual and reproductive health information / Parlons de sexe: Transmettre des informations de santé sexuelle et reproductive aux jeunes	Poolside Lounge at Radisson Blu
2.2.10 Findings from adolescent and youth sexual and reproductive health research / Découvertes de la recherche en santé sexuelle et reproductive des jeunes et des adolescents		AD1	

TRACKS

Wednesday, 14 November	14:35 - 15:55	2.3.03	Implementation of sexuality education: lessons learned from diverse country contexts / Mettre en oeuvre l'éducation à la sexualité : Leçons tirées de contextes de divers pays	Poolside Lounge at Radisson Blu
		2.3.07	Knowledge is power: access and improved knowledge, attitude, and practices towards family planning / Savoir est pouvoir: Pour l'accès et de meilleures connaissances, attitudes et pratiques de planification familiale	Auditorium/Ple-nary Hall (Includes French translation)
		2.3.08	Family planning among youth in Francophone Africa / La planification familiale chez les jeunes d'Afrique francophone	Auditorium Club 3 (Includes French translation)
	16:20 - 17:40	2.4.05	Reaching millennials: how to capture their attention and increase family planning use / S'adresser à la génération du millénaire : Comment capter leur attention et augmenter l'utilisation de la planification familiale	MH 4 (Includes French translation)
		2.4.06	Breaking barriers and increasing access for youth / Faire tomber les barrières et augmenter l'accès des jeunes	Poolside Lounge at Radisson Blu
Thursday, 15 November	10:25 - 11:45	3.1.08	What you promised us: moving youth FP policies off of shelves and into practice / Ce que vous nous avez promis : Mettre en pratique les politiques de PF pour les jeunes	MH 3 (Includes French translation)
		3.1.09	No secrets in this house: parental support for family planning / Pas de secret chez nous : Le soutien parental en matière de planification familiale	Auditorium Club 3 (Includes French translation)
		3.1.10	When adolescents are mothers: interventions to improve knowledge among married and unmarried young mothers / Quand les adolescentes deviennent mères: Interventions pour améliorer les connaissances des jeunes mères mariées et non mariées	Poolside Lounge at Radisson Blu
	11:55 - 13:15	3.2.09	Youth-driven change through family planning advocacy / Le changement dirigé par les jeunes à travers le plaidoyer pour la planification familiale	AD1
		3.2.10	Reaching those at highest risk with appropriate sexual and reproductive health programming / Amener aux personnes les plus exposées aux risques des programmes appropriés de santé sexuelle et reproductive	AD11 (Includes French translation)

Men and family planning

Track Chairs

Stan Becker; Johns Hopkins University

Name: Dominick; Georgetown University's Institute for Reproductive Health

The Men and Family Planning track embodies state of the art research and interventions that focus on the role of men in Family Planning. Though most modern contraceptive methods are woman-centered, experimental studies around the world have shown that involving male partners leads to greater contraceptive acceptance and continuation. In addition, there are health and financial benefits to increasing vasectomy prevalence as part of a robust contraceptive method mix. Included in this track are global activities that facilitate men's use of contraceptives, their role as supportive partners and innovative ways in which to engage couples on the topic of reproductive health. Presentations in this track reflect a critical understanding of the role masculinities play in limiting men's access to health services. This includes research on men's preferences, knowledge and use of contraceptive methods. Exemplary interventions promote positive gender norms and gender equity among couples, which is often facilitated through improved communication between men and their partners as well as with providers and peers.

Family planning and reproductive health in humanitarian settings

Track Chairs

Norhan Bader; International Youth Alliance for Family Planning (IYAFFP)

Monica Adhiambo Onyango; Boston University School of Public Health

The number of people affected by humanitarian emergencies and forcibly displaced from their homes hit a record high of 68.5 million by the end of 2017. Humanitarian emergencies pose various negative sexual and reproductive health (SRH) outcomes to populations affected. The right to quality SRH is an indispensable part of the right to health and these services should be made available and accessible. Crises often intensify gender inequalities and reinforce gender hierarchies with serious implications on the SRH of individuals. In many humanitarian settings, refugees and internally displaced populations encounter poor and/or suboptimal conditions affecting their access to basic and essential SRH services such as family planning. For more than two decades, individuals and organizations have made commendable progress towards evidence-based SRH services in crises through advocacy, research, standard setting and guidance development.

Faith and family planning

Track Chairs

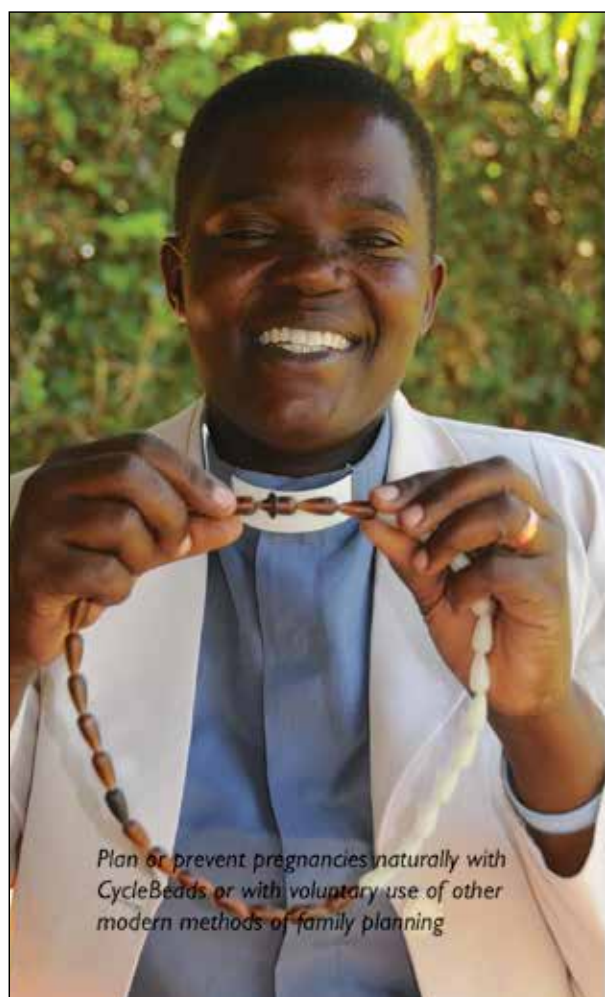

Lauren VanEnk; World Vision

Peter Munene; Faith to Action Network

More than 200 million women in the developing world want to avoid pregnancy but currently are not using family planning (FP). Despite the significant amount of attention and resources being focused on FP to address this challenge, historically limited efforts have been made to engage faith-based organizations (FBOs) and religious leaders in FP. Few resources have been channeled through them for FP education, advocacy, and services. FBOs are important health service providers and recognition is growing regarding their potential role in expanding access to FP. Meeting the FP2020 goal of reducing global unmet need will require a diverse array of partners and method options as well as inclusion of FBOs in funding streams for FP. The Faith and Family Planning track at ICFP 2018 will highlight innovative partnerships and new evidence for the field.

SESSIONS

Date	Time	Session Title	Location
Saturday, 10 November	08:00-17:00	Speak up: family planning advocacy for faith groups / Parlez plus fort : Le plaidoyer de planification familiale pour les groupes confessionnels	Radisson Blu Meeting Room #2
Sunday, 11 November	14:00-16:00	Interfaith prayer service / Prière inter-religions	AD10
	17:00 - 19:00	Faith celebration / Célébration de la foi	AD10
Tuesday, 13 November	16:20 - 17:40	1.4.06 The role of religious leaders as social change agents for family planning: Grassroots perspectives from four african contexts / Le rôle des chefs religieux comme agents de changement social pour la planification familiale: Perspectives locales de quatre contextes africains	AD9
Wednesday, 14 November	10:25 - 11:45	2.1.05 Norm entrepreneurs - faith actors' role in family planning / Les entrepreneurs de normes : Le rôle des acteurs confessionnels dans la planification familiale	AD9
		2.1.10 The role of religious leaders in family planning / Le rôle des chefs religieux dans la planification familiale	MH 3 (Includes French translation)
	13:25 - 14:25	A&A Lunch Discussion Table Topics and Facilitators / Table 1: Advocacy by Faith-based Organizations & Religious Leaders - English	AD12 (Includes French translation)
Thursday, 15 November	10:25 - 11:45	3.2.04 Interfaith advocacy approaches to demand generation and improved family planning services / Approches de plaidoyer inter-religions pour la création de la demande et l'amélioration des services de planification familiale	Auditorium Club 1

Plan or prevent pregnancies naturally with CycleBeads or with voluntary use of other modern methods of family planning

Urbanization and reproductive health

Track Chairs

Stella Babalola; Johns Hopkins Center for Communication Programs

African Population and Health Research Center, Kenya

High levels of urbanization, fueled by persistent migration from rural areas in search of better livelihood opportunities represent an important dimension of Africa's demographic system. Despite its status as the world's least urbanized region, the sub-Saharan African region currently has the fastest rate of urban growth in the world at 4% per annum. The urban population in the region will increase from the current 37% to over 60% by 2050. The high rate of urbanization has been linked to increasing urbanization of poverty, with approximately 70% of all urban residents in the region estimated to be living in slums or in slum-like environments. The urban poor across the sub-Saharan African region are characterized by negative sexual and reproductive health outcomes, including high rates of unwanted pregnancies, high fertility, STI's, and poor maternal and child health outcomes. Targeting urban inequities in access to sexual and reproductive health services, in general, and family planning services, in particular, are therefore critical. The sessions in this track will provide evidence and generate discussions around (i) urbanization and emerging issues in family planning, (ii) urban inequities in access to family planning services, and (iii) contraceptive use among urban youth: barriers and facilitators.

SESSIONS

Date	Time	Session Title	Location
Sunday, 11 November	08:00-17:30	Urban Family Planning Pre-conference – Healthy cities now and in the future, the critical role of urban reproductive health	Lemigo Hotel, Plenary Room
Monday, 12 November	08:00-17:30	Urban Family Planning Pre-conference – Healthy cities now and in the future, the critical role of urban reproductive health	Lemigo Hotel, Plenary Room
Tuesday, 13 November	11:55-13:15	2.2.05 Reaching the urban poor with FP services: business unusual approaches demonstrating impact and early wins / Faire parvenir des services de PF aux populations pauvres en milieu urbain: Les approches	AD11 (Includes French translation)
Wednesday, 14 November	10:25-11:45	2.1.03 Family planning, fertility and urban welfare in the rapidly growing cities of sub-Saharan Africa and South Asia: Policy implications / La planification familiale, la fécondité et le bien-être urbain dans les villes en forte croissance en Afrique subsaharienne et en Asie du Sud: Implications pour la politique	AD11 (Includes French translation)
	16:20-17:40	2.4.02 Les maires s'engagent : TCI-Afrique de l'Ouest Francophone (AOF) aide à mobiliser et augmenter la capacité des collectivités locales en leadership en matière de planification familiale/santé de la reproduction des populations urbaines pauvres / Mayors' Commitments: TCI-FWA (Francophone West Africa) helps mobilize and increase the leadership skills of local governments in family planning/reproductive health for the urban poor	AD4
		2.4.08 New approaches and scale up in urban and reproductive health / Nouvelles approches et mise à échelle de la santé reproductive et urbaine	AD9

Advances in monitoring and evaluation methods

Track Chairs

Dominic Montagu; University of California, San Francisco

Wenjuan Wang; The DHS Program, ICF

Availability and use of data for family planning programs has significantly grown in the past decade, but there is an increased demand for better information and methods for monitoring and evaluation. Advances in measurement and analysis of data for family planning are now driven by new methods for data collection and interpretation; new sources of large amounts of information that can be used for secondary analysis; and a growing recognition of the importance of data in program and policy decisions. This track focuses on issues and data use in monitoring and programmatic decision-making, advances in measurement of family planning indicators and quality and use of data from health management information systems in various settings.

Elevating Advocacy and Accountability in Family Planning

Advocacy and Accountability (A&A) will be highlighted at the conference for a consecutive year and, for the first time, will be integrated across all program tracks. Featured opportunities include facilitated lunch roundtable discussions on advocacy and accountability topics, skills-building trainings, and energizing activities and social media highlighting advocacy and accountability success stories and champions.

Use the hashtag #Advocate4FP to share how you advocate for family planning in your community and what you learned at the conference. See select opportunities below with more available on the conference app.

For more details on how to participate email bdo8@jhu.edu.

TUESDAY, 13 NOVEMBER (7:00-8:30)

Making the Numbers Work for Advocates: Data + Communication for Effective Advocacy and Accountability

Hosted By: The Advocacy Collaborative (Jhpiego) and FP2020

Location: Royal Suite, KCC

This interactive, skills-building workshop will bring together advocates, data and communications experts to offer tips for making the numbers work for advocates to help drive action. Using the new FP2020 Annual Progress report, experts will assist advocates in interpreting and packaging the latest data to influence key stakeholders, to communicate the need for action and convert data into tailored messages for decisionmakers. Participants will examine the latest measures of progress (or lack thereof) in their countries, and craft targeted, evidence-informed advocacy messages designed to move stakeholders to invest in family planning.

WEDNESDAY, 14 NOVEMBER (13:20-14:20)

Digital Storytelling for Expanded Method Choice

Hosted by: K4Health/FPVoices, Y-Act, and the Expanded Method Choice Working Group

Location: Youth Lounge, KCC

This 50-minute interactive session will teach basic interview and photography techniques that youth can use to advocate for expanded method choice. It will be held during the lunch hour in the ICFP Youth Lounge, and is hosted by K4Health/FPVoices, Y-Act, and the Expanded Method Choice Working Group.

THURSDAY, 15 NOVEMBER (10:25-11:45)

Implementing Best Practices (IBP) Session Dollars and Sense: Strategies for Advocacy and Financing for Family Planning

Hosted by: Advance Family Planning, Management Sciences for Health, PATH

Location: AD10, KCC

With today's evolving landscape for family planning financing, advocates and champions must be nimble and seize emerging opportunities to secure dedicated resources. This session will feature an opening panel of "lightning talks" showcasing successful, country-led advocacy efforts to mobilize domestic funds for family planning—leveraging platforms such as the Global Financing Facility, Universal Health Coverage, and costed implementation plans. Participants will then have the chance to shape an interactive Q&A with panelists, crowdsourcing topics for small group discussions flowing from these talks. Finally, participants will be equipped with advocacy and accountability tools to put new knowledge into action, through a dynamic activity featuring speed-dating-like pitches.

A&A Lunch Discussion Table Topics and Facilitators

WEDNESDAY, 14 NOVEMBER (13:25-14:25)

Hosted By: A&A Sub-committee Members

Location: AD12, KCC

Grab your lunch and join us at one of our ten lunch discussion tables facilitated by members of the A&A subcommittee. These lunch discussion tables will cover a number of topics related to advocacy and accountability and provide conference participants with the opportunity to share their experiences and meet other participants interested in similar issue areas.

1. Advocacy by Faith-based Organizations & Religious Leaders
Facilitator: Mona Bormet (Christian Connections for International Health)
2. Advocating for HMIS changes: What Measures of PFP Service Delivery to Push for and Why?
Facilitator: Anne Pfitzer (MCSP/Jhpiego), Angela Mutunga (Jhpiego), and Elizabeth Murphy (Jhpiego)
3. Conversation with Advocacy Accelerator
Facilitator: Wanjiku Kamau (Advocacy Accelerator)
4. Conversation with FP2020 CSO Focal Points
Facilitator: Mande Limbu (FP2020)
5. Getting Traction for FP2020 Commitments
Facilitator: Moses Muwonge (Samasha Medical Foundation)
6. Improving Access to DPMA-SC (Sayana Press)
Facilitator: Ghulam Yaseen (RIZ Consulting)
7. Influencing Decision-Makers in Restricted Environments
Facilitator: Sarah Whitmarsh (AFP)
8. Innovative Ways for Youth to Engage in Accountability
SM Shaikat (SERAC Bangladesh)
9. Joint Accountability: Getting on the Same Page
Facilitator: Jay Gribble (Palladium) and Sandra Jordan (FP2020)
10. Leveraging the Global Financing Facility for Family Planning
Facilitator: Justine Coulson (UNFPA)
11. Advocacy for Improving Supervision of Community Health Workers
Facilitator: Nancy Harris Pendarvis (JSI)
12. Creating an Enabling SRHR Environment for Young People
Facilitator: Geertje van Mensvoort (Cordaid)

FP FAMILY PLANNING
2020

VISIT BOOTH 17:

- Discuss the 2018 annual progress report with technical experts
- Meet FP2020 partners, including Reference Group members
- Pick up country-specific data fact sheets
- Play a game; find out how fun data can be!

PRE- CONFERENCE EVENTS

SITE VISITS

10-12 NOVEMBER

In recent years, the country of Rwanda has strongly invested in the decentralization of the health system, empowering its network of Community Health Workers (CHWs) to strengthen the supply and demand side and establish secondary health posts next to faith-based health facilities that do not provide family planning (FP) commodities.

Additionally, the integration of FP with other health services and the capacity building of health care providers to provide long-acting and permanent contraceptive methods have advanced the positive trend of FP uptake. As well, the improvement of FP education and service provision among youth required the integration of SRH services in healthcare through Youth Corners and a strong collaboration with Youth Friendly Centers.

The site visits scheduled prior to the 2018 ICFP offer Rwanda the opportunity to share with conference attendees a first-hand look at these successful programs in action. Four districts were chosen to showcase FP best practices: the City of Kigali, Rwamagana, Kayonza and Kamonyi. The FP delivery posts featured include: Rwamagana and Remera Rukoma District Health Centers; Masaka and Kicukiro Secondary Health Posts; Kimisagara, Kamonyi and Kayonza Youth Friendly Centers and Youth Corners.

Those who registered and received a confirmation should arrive 15 minutes prior to their scheduled departure times at the designated bus pick-up area at the Kigali Convention Centre.

Sites

Youth Friendly Centers

Youth Friendly Centers (YFCs) have contributed to the increase of FP uptake among youth in the community through family planning education and service provision. The collaboration of YFCs with the nearest health centers to facilitate the transfer of some clients has been a successful strategy to improve FP service provision among youth. Visitors will learn about YFC management, the friendliness of services, the available FP service package and data recording.

District Pharmacy

There are 30 district pharmacies in Rwanda, one per district. A district pharmacy (DP) is an independent entity within the Rwandan Health System at the district level. A DP is responsible for storage of FP among other commodities, distribution within hospitals and health centers. A site visit at a district pharmacy in Rwanda would inform visitors about the supply chain management system in Rwanda from the central warehouse to the beneficiaries (last mile) and the Electronic Logistic Management Information System (ELMIS) used to track the use of and need for drugs to prevent stock outs in health facilities.

Awareness campaign on the benefits of using FP methods. Photo by Rwanda Health Communication Center

Secondary Health Posts

The establishment of secondary health posts (SHPs) marks one of Rwanda's success stories in family planning. SHPs have been created in districts whereby faith based health facilities do not provide modern FP commodities. Visitors of a SHP will gain knowledge of the management of the post with a focus on the administrative role of districts, the role of the affiliated health center, the FP commodities supply and reporting and the available human resource and FP package. This visit will also include visiting a community health worker (CHW) in action, showcasing the package of FP (provision of injectable and oral FP methods), data collection and reporting, and innovative mobile phone use in maternal and child health services at the community level. (In total, Rwanda has 5011 CHWs.)

Health Centers

There are 503 health centers in Rwanda. Visitors to health centers will gain an understanding of the benefits of the task shifting, integration of family planning in other services including voluntary counseling and testing for HIV, antenatal care, maternity, service provision of FP within HCs (through youth corners), referral mechanisms and the monitoring and evaluation of Community Health Workers (CHW). The visit will also include witnessing a CHW in action, showcasing the package of FP (provision of injectable and oral FP methods), data collection and reporting and innovative mobile phone use in maternal and child health services at the community level. Visitors will also learn about the monitoring and evaluation system put in place for community based programs including their referral mechanism, health center staff visits at CHW'S homes and monthly meetings.

INTERNATIONAL YOUTH ALLIANCE FOR FAMILY PLANNING

presents the

YOUTH PRE-CONFERENCE

A "no-panel" space for youth to convene, network, and gain the resources necessary to continue their advocacy and research in their communities.

PRE-CONFERENCE EVENTS

10 November

08:00 to 17:00

Speak up: family planning advocacy for faith groups / Parlez plus fort : Le plaidoyer de planification familiale pour les groupes confessionnels

In this interactive advocacy training, representatives of faith-based organizations and religious leaders will share best practices in family planning advocacy and explore ways to advance the faith community's role. Facilitators will lead the participants through a strategic planning exercise to develop advocacy plans for the next year. Small groups will discuss country specific activities, identify how to augment the contributions of faith groups, and explore the connection between faith values and family planning. They will engage in dialogue, mutual learning and exchanges in order to increase consensus and ownership.

Location: Radisson Blu Meeting Room #2

Registration: Private (Invite Only)

Primary & Partner(s) Organizations: Christian Connections for International Health (CCIH) with Faith to Action Network

08:30 to 17:00

Moving rights from research to practice: what makes a real difference to programs / Transférer les droits de la recherche à la pratique: ce qui fait une réelle différence pour les programmes

In this interactive advocacy training, representatives of faith-based organizations and religious leaders will share best practices in family planning advocacy and explore ways to advance the faith community's role. Facilitators will lead the participants through a strategic planning exercise to develop advocacy plans for the next year. Small groups will discuss country specific activities, identify how to augment the contributions of faith groups, and explore the connection between faith values and family planning. They will engage in dialogue, mutual learning and exchanges in order to increase consensus and ownership.

Location: KCC AD12

Registration: Public - Please email Taylor Sheridan at tsheridan@familyplanning2020.org by October 20th. Seating is limited!

Primary & Partner(s) Organizations: Family Planning with UNFPA, IPPF, MSI, and PSI

08:30 to 17:30

Youth pre-conference / Pré-conférence des jeunes

The Youth Pre-Conference will be a space for youth to convene, network, and gain the resources necessary to continue their advocacy and research in their respective communities. This year, we are proud to have the youth pre-conference last 2.5 days starting from 10 November until 12 November 2018. The event will include more than 500 youth, representation from about 40 plus local, regional and global organizations and more than 40 nationalities represented. The pre-conference will feature numerous skill-building sessions as well as a series of rapid fire sessions, an AmplifyChange pitch-fest, and an esteemed leadership strategy course.

Location: KCC MH2, MH3, and MH4

Registration: Private (Invite Only) - Youth pre-conference registration is mandatory and is by Eventbrite invitation only

Urban Family Planning Pre-conference – Healthy cities now and in the future, the critical role of urban reproductive health

The Bill & Melinda Gates Institute for Population and Reproductive Health, the International Union for the Scientific Study of Population (IUSSP) and The Challenge Initiative (TCI) will host a focused urban reproductive health forum – Healthy Cities Now and in the Future: The Critical Role of Urban Reproductive Health – before the start of the International Conference on Family Planning in Kigali, Rwanda. This forum will explore the breadth and depth of rapid urbanization and its impact on poverty and the health of those living in cities. Panelists will discuss the urgent need to specifically address the health of the urban poor and how family planning can help change this landscape for the better, including a specific panel focused on adolescents and youth. This forum is designed to motivate government officials, public and private partners, local governments and other stakeholders to implement and scale up evidence-based urban reproductive health solutions. Additionally, participants will learn more about creating and developing innovative platforms to address social, economic and cultural barriers to universal access to reproductive health.

Location: Off-site at the Lemigo Hotel, Plenary Room

Participation: Registration is now full. Thank you for your interest.

Primary & Partner(s) Organizations: IUSSP, Gates Institute, The Challenge Initiative

08:30–17:00

Demographic dividend pre-conference / Pré-conférence sur le dividende démographique

The demographic dividend pre-conference workshop aims to equip attendees with the information and skills to effectively move the demographic dividend agenda forward. During the first pre-conference session, speakers will discuss (1) tools for making policy decisions and measuring progress and (2) approaches for subnational estimation of the benefits of the demographic dividend. During the second session, a highly interactive workshop will present a new approach to framing the multisectoral benefits of family planning (FP) and fertility decline and invite attendees to develop effective communications strategies and advocacy messages tailored to high-level policymakers across sectors. The workshop is designed to help practitioners, policymakers, and advocates: (1) Learn about new tools to guide policymakers as they develop strategies to harness the demographic dividend; (2) Increase local commitment to harnessing the benefits of the demographic dividend through new subnational estimation approaches; and (3) Advocate to policymakers across sectors for investments and commitments in FP using evidence,

messages and strategies developed in partnership with experts from those sectors. The pre-conference will also include a high-level ministerial meeting to highlight and foster the continued momentum of actions to support the demographic dividend across nations and to position women's empowerment as a main prerequisite to reaping the dividend. During the ministerial meeting, participants will discuss DD progress across the world, focused on how countries that have championed this agenda in the last decade can inspire those that are still in their early steps.

Location: KCC MH1

Registration: Private (Invite Only) - Registration for invited participants will open at 08:00 and close at 09:00 on Sunday, November 11, outside of Room MH1

Primary & Partner(s) Organizations: Bill & Melinda Gates Institute for Population and Reproductive Health, Population Reference Bureau, World Bank, UNFPA

08:30–17:00

Interactive dissemination workshop - expanding health worker roles and decentralizing abortion care: a multi-case study of implementation efforts and lessons learned in 6 diverse country contexts / Atelier de dissémination interactif - Élargir les rôles des agents de santé et décentraliser les soins d'avortement: Une étude de cas multiples sur la mise en oeuvre d'efforts et les leçons de 6 contextes de différents pays

The Department of Reproductive Health and Research at WHO is collaborating with local in-country colleagues to conduct a multi-case study documenting the strategies undertaken in six diverse country contexts – Bangladesh, Colombia, Ghana, Mexico City, Sweden and Tunisia – to decentralize abortion health care service delivery and expand health worker roles in comprehensive abortion care beyond specialist physicians. The multi-case study will detail the process of implementation of task-sharing and task-shifting, in line with recommendations included in the WHO guideline Health worker roles in providing safe abortion care and post-abortion contraception, including factors that enable and obstruct the process, in order to draw lessons and share these with other countries seeking to undertake similar legal or policy reforms. This interactive workshop is designed to disseminate the results of the multi-case study to an audience of key stakeholders from countries and contexts that can immediately benefit from such information. In addition to presentations of the findings from the six case study countries, workshop attendees will participate in an interactive activity whereby they “self-assess” individual country and stakeholder positions on the WHO recommendations, and consider the tools and resources needed to implement task-sharing and task-shifting in abortion care.

From local decision to global markets: a workshop on improving family planning public sector market health to impact long-term client outcomes / De la décision locale aux marchés mondiaux : Atelier sur l'amélioration de la santé du marché du secteur public de la planification familiale pour impacter les résultats des clients sur le long terme

The next few years will be a period of rapid change across all health areas in terms of scale-up, family planning products offered, and the introduction of new quality assured manufacturers of family planning products. As a result of these changes, and other changes in the public donor market, country level implementing partners and policy makers will be increasingly challenged to meet local needs. Leveraging market intelligence and the increasing availability of local and global data, the USAID Global Health Supply Chain-Procurement and Supply Management (GHSC-PSM) project is working with USAID-supported country programs to help local partners make informed choices and investments that can influence long-term programmatic outcomes. Participants will learn about the principles of market dynamics and the current trends impacting our work, with a specific focus on family planning, to ensure an uninterrupted supply of family planning commodities to promote well-being and save lives. Participants at this satellite event will learn about key USAID objectives and programming, and how local programs and decisions can impact global goals and markets. 2-3 reproductive health areas will be covered in a case-study driven, deep-dive format.

Objectives:

- 1) Understand key principles of market dynamics;
- 2) Build a framework for assessing family planning product market health through USAID GHSC-PSM's market health framework;
- 3) Understand how local decisions around family planning product specific policies and procurement practices may impact global markets.

Location: KCC AD11

Accelerating access to family planning services: toward achieving FP2020 goals / Accélérer l'accès aux services de planification familiale: vers l'atteinte des objectifs FP2020

This side-meeting aims to drive key discussions on FP2020 goals by bringing together 50 key stakeholders from India and high-priority African countries such as Kenya, South Africa and Rwanda, among others, including senior government officials, technical experts, service providers, civil society organizations (CSOs), popular public figures, representatives from the media and donor organisations. This side-meeting serves as an opportunity to:

- Share best practices and highlight learnings from interventions to create a conducive environment to facilitate uptake of family planning services, with a focus on spacing methods. Cross-learning from Rwanda and other countries on increased uptake of implants and injectable contraceptives and from India on community engagement schemes to raise awareness about family planning.
- Discuss strategies to promote greater public-private partnership for the provision of quality family planning services.
- Recognise the role of credible and informed voices in advocating for and raising awareness on family planning and explore opportunities to leverage their reach and scale up efforts.
- Establish a cross-country dialogue to encourage joint action and share policy innovations to prioritise family planning as a key health intervention.

Location: KCC AD4

Registration: Private (Invite Only) - All participants will be required to fill out a registration sheet before entering the meeting room

Primary & Partner(s) Organizations: Global Health Strategies

17:00–19:00

Faith celebration / Célébration de la foi

Event Description: This reception will be an opportunity to network with faith organizations to understand the work they do to promote family planning and address gaps in knowledge and services. The schedule allows time to learn, share experiences and develop partnerships. Light hors d'oeuvres will be served.

Location: KCC AD10**Registration:** Public - RSVP:<https://tinyurl.com/FaithCelebration>

IPUMS performance monitoring and accountability 2020 data workshop / Atelier IPUMS sur les données de Performance Monitoring and Accountability 2020

An introductory workshop for new and prospective users of the integrated version of the Performance Monitoring and Accountability 2020 data series (IPUMS PMA) will be held prior to the International Conference on Family Planning in Kigali, Rwanda. Performance Monitoring and Accountability 2020 (PMA2020) is a high-frequency survey series on family planning, sanitation, and health in Africa and Asia. The integration of PMA2020 offers unique opportunities for comparative research over time and across countries. All IPUMS data and resources are available for free, online, at ipums.org. The workshop will be presented by Devon Kristiansen and Risa Griffin. Participants are encouraged to bring a laptop, as there will be an opportunity to use IPUMS PMA data in your preferred statistical software. IPUMS PMA staff will also be available in exhibit booth #34 throughout the conference.

Location: KCC AD11**Registration:** Public**Primary & Partner(s) Organizations:** IPUMS

Delivering Contraceptive Choice, Convenience, and Control / Offrir du choix en contraceptifs, de la commodités et du contrôle

On average, women need about 30 years of active contraceptive use in order to achieve their desired fertility. During this time, contraceptive needs and preferences change dramatically. Today, a lack of convenient, women-controlled options means too many women who do not want to become pregnant either don't use, or stop using, contraception. One the eve of the International Conference on Family Planning, a dynamic discussion and cocktail reception will be hosted by the Population Council and partners to illuminate factors influencing method choice, use dynamics over a life course, and share insights about the Population Council's new one-year contraceptive ring recently approved by the US Food & Drug Administration. For more than 60 years, the Population Council has been a leader in developing and introducing new contraceptive technologies, including six contraceptive technologies being used by more than 17

ICFP youth mentorship meet-up / Rencontre des jeunes et mentors de l'ICFP

The ICFP Youth Sub-committee and 120 Under 40: The New Generation of Family Planning Leaders are organizing a mentorship program which will enable mentors to be matched with and guide youth conference delegates leading up to and during the International Conference on Family Planning (ICFP)! As one of the core activities, we will have a mentorship meet-up on November 11, 2018 from 7pm to 9pm in MH 2,3, 4. This is an invitation only event and attendees will be required to RSVP. The event will feature inspiring keynotes, an art battle and a unique opportunity for mentors and mentees to plan for the upcoming week. Many of us have been lucky enough to have had a supervisor, coach, or teacher who has been a mentor and made a positive difference in our lives. Our mentors have worn many hats, acting as advocates, cheerleaders, role models, delegates, policy enforcers and friends. This is a great opportunity to get to know youth in the field and equip them to overcome the challenges in their communities regarding access to contraception, SRHR, and family planning services, information and supplies. It's also a great opportunity to learn from

those younger than you; this is meant to be a two-way relationship, with learning happening on both sides. This year's ICFP expects 300-500 impressive youth participants under the age of 26 who are dedicated to creating a world in which everyone has access to family planning.

Location: KCC MH2, MH3, and MH4

Registration: Private (Invite Only) - Confirmation is by invitation only and an RSVP is required.

Primary & Partner(s) Organizations: 120 Under 40: The New Generation of Family Planning Leaders and International Youth Alliance for Family Planning (IYAFFP)

08:30–15:00

Strengthening family planning and contraceptive services using WHO contraception tools: key lessons and products / Renforcer la planification familiale et les services contraceptifs à l'aide des outils sur la contraception de l'OMS : Leçons clés et produits

The World Health Organization's (WHO) Department of Reproductive Health and Research (RHR) includes the UNDP-UNFPA-UNICEF-WHO-World Bank Special Programme of Research, Development and Research Training in Human Reproduction (HRP). The Department provides leadership in sexual reproductive health and rights by shaping the research agenda, coordinating high-impact research, setting norms and standards, articulating an ethical and human-rights-based approach and supporting research capacity building. During this pre-conference session you will be introduced to new and exciting tools developed to support countries strengthen the policy and health system level response to address unmet need. You will also learn how countries used these tools to promote equitable access to quality family planning services. The last session will offer an overview of WHO-led research on postpartum family planning in Burkina Faso and the Democratic Republic of Congo.

Location: KCC AD10

Registration: Public

Primary & Partner(s) Organizations: World Health Organization

10:00–13:00

Task sharing and injectable contraception: updates and new tools from FHI 360 / La délégation des tâches et la contraception injectable : Mises à jour et nouveaux outils de FHI 360

This meeting brings together technical experts and implementers to learn about new developments in community-based access to injectable contraception (CBA2I). FHI 360 will present findings from a recent randomized control trial in Pakistan and new guidance and tools for monitoring and evaluation of CBA2I, including standardized indicators. Case studies from Uganda, Senegal, and Malawi as well as user experiences and an updated CBA2I implementation handbook will also be shared. The resources and updates address WHO's recommendation to implement CBA2I with tailored M&E and contribute to the global efforts to increase task shifting in family planning, resulting in increased access to and quality of services. From FHI 360: Dr John Stanback, Scientist; Dr. Dawn Chin-Quee, Scientist; Ms. Jill Peterson, Research Associate; Ms. Kirsten Krueger, Technical Advisor; Dr. Bagrey Ngwira, Senior Lecturer, University of Malawi; Mr. Fredrick Mubiru, Project Director, Advancing Partners and Communities—Uganda

Location: KCC AD4

Registration: Private (Invite Only) - Contact Anya Luknight at aluknight@fhi360.org for registration details

13:30–15:30

India family planning caucus / Caucus de planification familiale de l'Inde

India Family Planning Caucus is a multi-stakeholder meeting to discuss India's Family Planning Commitments and recommend measures to achieve India's FP 2020 Goals. The caucus will bring together key stakeholders from India with the following objectives: a) Amplify collective voice for increased budgetary allocation and optimal utilization of funds for Family Planning and urge government of India to accelerate fulfilling FP2020 commitments, b) Launch the key research publication by PFI - 'Cost of Inaction in Family Planning'. The caucus will convene a high level panel discussion on the socio-economic implications of inaction in family planning.

The Speakers will include:

- (i) Members of Parliament
- (ii) Senior Government Officials
- (iii) Civil Society Leaders
- (iv) Development Partners.

Location: KCC AD1

Registration: Private (Invite Only) - Registration forms will be circulated at the event (for more details, please contact Ms. Purnima Khandelwal at pkhandelwal@populationfoundation.in)

14:00–16:00

Beyond the ABCs of FTPs: A deep dive into new considerations for first-time parent family planning programs and research / Au-delà de l'ABC des nouveaux parents : Examen approfondi des nouvelles considérations pour la recherche et les programmes de planification familiale pour les nouveaux parents

Join the Bill & Melinda Gates Foundation for a dynamic event exploring new evidence and emerging insights from programming and research around young, first time parents (FTPs). Each year, 13 million adolescents and many more young women between the ages of 20 and 24 give birth. This time of transition is fraught with challenges, including barriers to accessing and using contraception. Limited use of contraception in the post-partum period renders FTPs particularly vulnerable to rapid, repeat pregnancies and poor maternal and newborn health outcomes. In recent years, FTPs have received increasing attention in family planning research and programming. A body of evidence has emerged related to dedicated FTP programming on a small scale, and fundamental programming considerations have been documented. However, there is still a great deal to learn about programming and scale-up! This event will be the culmination of a deep dive into the literature and new (unpublished) insights emerging from across current FTP programs and research. A range of speakers from diverse organizations will share the cross-project findings from this holistic deep dive, including new insights into the specific needs of sub-groups of FTP; unique barriers FTPs face in accessing contraceptive services; and promising program innovations. We will go beyond project-specific learning, and highlight and discuss cross-country themes relevant to future FTP efforts, including efforts to scale-up. This will be a participatory and interactive event, coordinated by Save the Children, and is open to all participants.

Location: KCC AD12

Registration: Public

Primary & Partner(s) Organizations: Bill & Melinda Gates Foundation with Save the Children

14:00–16:00

High-level ministerial meeting on the demographic dividend (Gates Institute, World Bank and UNFPA) / Réunion ministérielle de haut niveau sur le dividende démographique (Institut Gates, Banque mondiale et UNFPA)

The High-Level Ministerial Meeting (HLMM) on the Demographic Dividend (DD) will bring together leaders from ministries of health, youth, economic planning and development, finance, members of parliaments, and distinguished guests from the donor community. The meeting will be an opportunity for leaders to learn from

one another and discuss commitments needed to meet the needs of their populations, particularly women and girls, in order to take optimal advantage of their countries' DD potential. They will discuss essential investments needed to effectively integrate the DD framework into their development strategies and policies, to allow their growing working-age population to achieve their fullest potential and contribute to the socio-economic growth of their countries. This HLMM will result in a communiqué with key themes, commitments, and specific policy recommendations that participating ministers will be encouraged to sign. This communiqué will be made available to the public health and development communities for reference and will be shared during the closing ceremony of the 2018 International Conference on Family Planning (ICFP). This year's HLMM will be co-hosted by the Bill & Melinda Gates Institute for Population and Reproductive Health, the World Bank and the United Nations Population Fund (UNFPA).

Session chairs:

Annete Dixon, VP of Human Development, World Bank Group; Julia Bunting, President, Population Council

Panelists and participants:

- Uzziel Ndagijimana, Minister of Finance and Economic Planning, Rwanda
- Ernesto Pernia, Secretary of Socioeconomic Planning, Philippines
- Mokhtar Ould Ajar, Minister of Economy and Finance, Mauritania
- Dalitso Kabambe, Governor of the Central Bank, Malawi
- Adama Tiemoko Diarra, Minister of Territorial Planning and Population, Mali
- Nicolas Meda, Minister of Health, Burkina Faso
- Jane Ruth Aceng, Minister of Health, Uganda
- Isaac Adewole, Federal Minister of Health, Nigeria
- Myint Htwe, Union Minister of Health and Sports, Myanmar
- Dr Patrick Ndimubanzi, State Minister of Public and Primary Healthcare
- Honourable Marie- Claude Bibeau, Minister of International Development

Location: KCC Auditorium Club 1, 2, & 3

Registration: Private (Invite Only)

Primary & Partner(s) Organizations: Gates Institute, World Bank, and UNFPA

ICFP SATELLITE SESSION

Community-Based Access to Injectables: New Tools and Research from FHI 360

Monday, November 12, 2018
10:00 AM – 1:00 PM SAST
AD4, Kigali Convention Center

- Learn about **new developments** in community-based access to injectable contraception (**CBA2I**)
- Hear **findings** from randomized control trial in Pakistan
- Learn about **new guidance and tools** for monitoring and evaluation (**M&E**) of CBA2I
- Hear **user experiences** and **case studies** from **Uganda, Senegal, and Malawi**
- See the updated **CBA2I handbook**

Register and direct questions to: jillpeterson@fhi360.org.

Presenters include:

Dr. John Stanback, Scientist, FHI 360

Dr. Dawn Chin-Quee, Scientist, FHI 360

Ms. Jill Peterson, Research Associate, FHI 360

Ms. Kirsten Krueger, Technical Advisor, FHI 360

Dr. Bagrey Ngwira, Senior Lecturer, University of Malawi

Mr. Fredrick Mubiru, Project Director,

Advancing Partners and Communities—Uganda

Partnering with medical and midwifery and nursing schools, CIRHT works to ensure that graduates have the knowledge and practical skills to meet the needs of patients and communities.

University of Rwanda students attend morning rounds

Skills lab demonstration at Hawassa University in Ethiopia

Our Toolkit

- Integrate competency-based family planning and abortion care training in the curricula of medical, midwifery and nursing students and Ob-Gyn residents
- Encourage and build research capacity for residents and faculty to advance evidence-based best practice in family planning and comprehensive abortion care
- Support faculty and staff development
- Implement a strong monitoring and evaluation (M&E) system to ensure sustainability

Implementing Best Practices (IBP)

The Implementing Best Practices (IBP) Initiative is a well-renowned and unique partnership created in 1999, grown from 12 original member organizations to 44 partner organizations. IBP aims to engage and foster collaboration among partners and the broader FP/RH community to identify, implement, and scale-up effective practices and to facilitate knowledge sharing to increase access of information and resources. This approach provides the building blocks for developing regional and country collaborative networks and formulating strategies and approaches that will improve access to and quality of reproductive health.

IBP's sessions at ICFP are focused on taking knowledge to practice with maximum time for interaction during the sessions. If you would like more information about IBP please go to www.ibpinitiative.org or sign up for the IBP Knowledge Gateway: <https://knowledge-gateway.org/>.

SESSIONS

Date	Time	Session Title	Location
Tuesday, 13 November	14:35-15:55	IBP Session 1: We tried that and it worked! Translating what works from one region to another / Nous l'avons essayé et ça a marché! Traduire ce qui fonctionne d'une région à une autre	AD10
	16:20-17:40	IBP Session 2: Battling information overload: How to stay informed and partner for better knowledge management / Combattre la surcharge d'informations : Comment se maintenir informés et créer des partenariats pour une meilleure gestion des connaissances	AD10
Wednesday, 14 November	10:25-11:45	IBP Session 3: How do you prioritize FP programming decisions? We have tools for that! / Comment prioriser les décisions de programmation de la PF? Nous avons les outils pour le faire!	AD10
	11:55-13:15	IBP session 4: Outils et expériences d'une Afrique Francophone en marche ! / Tools and Experiences of an Active Francophone Africa !	AD10
	14:35-15:55	IBP Session 5: Norm, Attitude or Belief? Making norms-shifting more normative within SRH Programs / Norme, attitude ou croyance? Rendre le changement de normes plus normatif dans les programmes de SSR	AD10
	16:20-17:40	IBP Session 6: Service Delivery Marketplace: WHO and other global tools to support universal health coverage and services in humanitarian settings / Le marché de la prestation des services : Outils de l'OMS et autres acteurs pour soutenir la couverture sanitaire universelle et les services en situation de crise humanitaire	AD10
Thursday, 15 November	10:25-11:45	IBP Session 7: Dollars and Sense: Strategies for Advocacy and Financing for Family Planning / Dollars et Sens : Stratégies pour le plaidoyer et le financement de la planification familiale	AD10
	11:55-13:15	IBP Session 8: Social accountability: A transformative approach to addressing access barriers to family planning / La responsabilité sociale : Une approche transformatrice de l'évaluation des barrières entravant l'accès à la planification familiale	AD10

IBP session 1:

We tried that and it worked! Translating what works from one region to another

Date & Time:

November 13, 14:35-15:55

Location: AD10

The session will discuss how the Latin America and the Caribbean region has moved to more sustainable models of providing family planning through innovative financing, improving equity and addressing and engaging youth. The session will lead participants to formulate ideas that could be implemented and tried in different contexts and regions of the world based on what has worked in the Americas. The session will be offered in English and Spanish.

Presenter: Ms. Claudia Rome, uRise Up based at the Public Health Institute

Co-Author(s): Dr. Rodrigo Barillas, WINGS (Women's International Network for Guatemalan Solutions); Mrs. Denise Dunning PhD, MPA, MARise Up; Mr. Ados May, IBP Initiative

<p>IBP Session 2:</p> <p>Battling information overload: How to stay informed and partner for better knowledge management</p> <p>Date & Time: November 13, 16:20-17:40</p> <p>Location: AD10</p>	<p>This session will be a series of coaching sessions related to sharing information, maintaining communication, and documenting implementation and scale up. Each participant will select a table based on the main knowledge management problem they face--for example, staying up-to-date on current research, connecting with peers, documenting and sharing knowledge, etc. Then, they will spend some time getting individualized and/or group coaching from knowledge management experts who will offer practical support in the form of strategies to collect, synthesize, and share knowledge. In addition to focusing on practical tools and approaches (such as share fairs and distance learning), we will also share tips on creative knowledge sharing approaches like storytelling. The session will be offered in English.</p>	<p>Presenter: Ms. Tara Sullivan, Johns Hopkins Center for Communication Programs</p> <p>Co-Author(s): Mrs. Anke van der Kwaak, KIT Royal Tropical Institute; Mr. Ados MayIBP Initiative</p>

<p>IBP Session 5:</p> <p>Norm, Attitude or Belief? Making norms-shifting more normative within SRH Programs</p> <p>Date & Time: November 14, 14:35-15:55</p> <p>Location: AD10</p>	<p>Social norms, or the unwritten rules in society that govern how we think and behave, play an important role in influencing sexual & reproductive health behaviors. Please join us in this interactive session to learn exactly what social norms are, how they operate in communities to influence attitudes and decision-making, and what principles to take into account when designing a norms-shifting intervention to improve SRH behaviors and outcomes. The session will be offered in French and English.</p>	<p>Presenter: Dr. Arzum Ciloglu MPH, DrPH, Johns Hopkins Center for Communication Programs</p> <p>Co-Author(s): Dr. Elizabeth Costenbader PhD, Fhi 360; Ms. Susan Igras Susan Igras MPH, Institute for Reproductive Health, Georgetown University; Pearson Malisau, African youth Safe Abortion Alliance (AYOSA); Ms. Gabrielle Nguyen, Save the Children; Dr. Nandita Thatte DrPH</p>

IBP Session 6:

Service Delivery Marketplace: WHO and other global tools to support universal health coverage and services in humanitarian settings

Date & Time:

November 14, 16:20–17:40

Location: AD10

The session will include 3 Marketplaces that will allow participants to learn about various implementation tools to support universal health coverage, humanitarian settings and WHO global guidance and recommendations. Participants will have an opportunity to trouble shoot with experts and share as their own country implementation experiences. The session will be offered in English.

Presenter: Ms. Elaine Charurat MHS, MBA, Jhpiego

Co-Author(s): Dr. Mario Philip Festin Dr, World Health Organization; Dr YuHsin Huang, IPPF; Ms. Asa Cuzin Kihl, The World Health Organization

IBP Session 7:

Dollars and Sense: Strategies for Advocacy and Financing for Family Planning

Date & Time:

November 15, 10:25–11:45

Location: AD10

With today's evolving landscape for family planning financing, advocates and champions must be nimble and seize emerging opportunities to secure dedicated resources. This session will feature an opening panel of "lightning talks" showcasing successful, country-led advocacy efforts to mobilize domestic funds for family planning—leveraging platforms such as the Global Financing Facility, Universal Health Coverage, and costed implementation plans. Participants will then have the chance to shape an interactive Q&A with panelists, crowdsourcing topics for small group discussions flowing from these talks. Finally, participants will be equipped with advocacy and accountability tools to put new knowledge into action, through a dynamic activity featuring speed-dating-like pitches. The session will be offered in English.

Presenter: Ms. Martha Brady, PATH

Co-Author(s): Jill Keesbury, Management Sciences for Health; Sarah Whitmarsh, Advance Family Planning, Bill & Melinda Gates Institute for Population and Reproductive Health, Johns Hopkins Bloomberg School of Public Health; Mr. Ados May, IBP Initiative

IBP Session 8:

Social accountability: A transformative approach to addressing access barriers to family planning

Date & Time:

November 15, 11:55–13:15

Location: AD10

Social accountability approaches bring communities and power-holders together to improve health outcomes and may be useful in improving reproductive health outcomes and access to family planning. The social accountability and community engagement session will bring together learning from multiple partners who work at the nexus of reproductive health and social accountability. This interactive session will explore the varied ways in which communities and providers have used social accountability approaches to help bridge issues at the core of access to family planning, including social/cultural norms, method mix, accessibility, and service quality related issues. The session is designed to articulate those intractable challenges that implementers continue to face, and discuss the utility of social accountability approaches in meeting these gaps. Meeting notes from this session will be compiled and shared to help inform the growing field of social accountability and reproductive health. The session will be offered in English.

Presenter: Dr. Victoria Boydell Dr, University of Cambridge

Co-Author(s): Dr. Petrus Steyn, Department of Reproductive Health and Research, World Health Organization; Ms. Etobssie Wako MPH, Care Usa, Dr.; Nandita Thatte DrPH, Dr.

EMPOWERING LIVES THROUGH REPRODUCTIVE HEALTH

As one of the largest private providers of family planning products in the world, DKT International uses business skill to address some of our society's biggest concerns: maternal and child mortality and HIV/AIDS.

Through the power of social marketing in some of the largest countries with the greatest needs for family planning, HIV/AIDS prevention and safe abortion, we have achieved tremendous positive health changes in our regions.

By increasing the availability and affordability of a full spectrum of modern birth control methods, strengthening the supply chain to increase availability of contraception, and inspiring new contraceptive users through advertising and educational campaigns, DKT improves people's lives.

Visit www.dktinternational.org for more information about our products and services.

INTERNATIONAL

MONDAY, 12 NOVEMBER

OPENING CEREMONY

AUDITORIUM / PLENARY HALL (16:30–17:30)

The 2018 International Conference on Family Planning will commence with an inspirational welcome to all attendees who travelled from near and far to Kigali, Rwanda, with the united mission to improve family planning worldwide through evidence-based practices.

Keynote address will be made by Dr. Edouard Ngirente, Prime Minister of Rwanda (invited). Additional speakers include Director General of WHO, Dr. Tedros Adhanom Ghebreyesus; UNFPA Executive Director, Dr. Natalia Kanem; Minister of Health, Dr. Diane Gashumba; UK Secretary of State for International Development, The Rt Hon Penny Mordaunt MP; Minister of International Development Canada, The Honourable Marie-Claude Bibeau; Bill & Melinda Gates Foundation President of Global Development Division, Dr. Chris Elias; Dean of the Johns Hopkins Bloomberg School of Public Health, Dr. Ellen MacKenzie; and youth speaker Sadia Rahman, Country Coordinator for the International Youth Alliance for Family Planning, Bangladesh.

The FP2020 Annual Report will be unveiled and The Global Humanitarian Award for Women's and Children's Health will be announced and conferred to Susan Packard Orr, which recognizes the tremendous contributions of an individual who, with great vision and leadership, has invested private wealth to advance reproductive, maternal, neonatal and child health, especially family planning, at the country and global level. Through the gifts and commitments made by the honoree of the Global Humanitarian Award, significant progress is being made toward enabling access to life-saving family planning resources and advancing maternal and child health and well-being — saving lives worldwide—thousands, if not millions, at a time.

16:30	Call to Order by Master of Ceremonies	
	Welcome Remarks	Dr. Diane Gashumba , Minister of Health of Rwanda
	Major Addresses	<p>Jose “Oying” G. Rimon II, Director and Senior Scientist of the Bill & Melinda Gates Institute for Population and Reproductive Health, Johns Hopkins Bloomberg School of Public Health</p> <p>ICFP Opening Welcome Video</p> <p>Dr. Ellen MacKenzie, Dean of the Johns Hopkins Bloomberg School of Public Health</p> <p>Special video from The Rt Hon Penny Mordaunt MP, UK Secretary of State for International Development</p> <p>Dr. Natalia Kanem, UNFPA Executive Director</p> <p>Special Video & remarks by Dr. Chris Elias, President of Global Development Division for Bill & Melinda Gates Foundation</p> <p>The Honorable Marie-Elaugh Bibeau, Canadian Minister of International Development</p> <p>Special Video from Dr. Tedros Adhanom Ghebreyesus, Director General World Health Organization</p> <p>Ms. Sadia Rahman, Youth Delegate</p>
	Presentation of the Global Humanitarian Awards for Women's and Children's Health	Awardee: Susan Packard Orr , The David and Lucile Packard Foundation
	Keynote Address	Dr. Edouard Ngirente , Prime Minister of Rwanda (invited)
17:30	Welcome Reception (sponsored by the Government of Rwanda)	
	Rwandan Cultural Performance	

Dr. Edouard Ngirente was born in Rwanda in 1973.

Since August 30th, 2017, he is the 11th Prime Minister of the Republic of Rwanda (after the country's independence in 1962).

Dr. Edouard Ngirente

Prime Minister of Rwanda

Prior to his appointment, he occupied different posts: Senior Advisor to the World Bank Executive Director (2017); Advisor to the World Bank Executive Director (from 2011 to 2017); Senior Economic Advisor to the Rwandan

Ministry of Finance and Economic Planning; Director General of National Development Planning and Research in Ministry of Finance and Economic Planning; Senior Lecturer at the former National University of Rwanda (now University of Rwanda); Head of Department of Agricultural Economics at the same University, independent Consultant and Project Manager.

The Premier holds a Ph.D in Economics from the Catholic University of Louvain, Belgium (UCL); a Master's degree (MSc) in Agricultural Economics from the Catholic University of Louvain, Belgium (UCL), a Master's degree (MA) in Financial Risk Management from the Facultés Universitaires Saint-Louis in Belgium; University certificate in Statistics from the Catholic University of Louvain, Belgium (UCL); and a Bachelor's degree in Economics/International Economics from the National University of Rwanda.

The Prime Minister can be followed on Twitter: @EdNgirente

Dr. Natalia Kanem, United Nations Under-Secretary-General and Executive Director of UNFPA, the United Nations Population Fund

Dr. Kanem brings to the position more than 30 years of strategic leadership experience in medicine, public and reproductive health, social justice and philanthropy. She started her career in academia with the Johns Hopkins and Columbia University schools of medicine and public health.

Dr. Natalia Kanem

UNFPA Executive Director

While serving as a Ford Foundation Officer from 1992 to 2005, she helped pioneer work in women's reproductive health and sexuality.

From 2014 to 2016, Dr. Kanem served as UNFPA Representative in the United Republic of Tanzania. In July 2016, she was named Deputy Executive Director of UNFPA in charge of programmes.

Dr. Kanem holds a medical degree from Columbia University, New York, and a Master's degree in Public Health, with specializations in epidemiology and preventive medicine, from the University of Washington, Seattle. She is also a magna cum laude graduate of Harvard University, where she studied history and science.

Dr. Kanem is the fifth Executive Director of UNFPA since the Fund became operational in 1969.

Dr. Tedros Adhanom Ghebreyesus was elected as WHO Director-General for a five-year term by WHO Member States at the Seventieth World Health Assembly in May 2017.

Dr. Tedros Adhanom Ghebreyesus

Director General World Health Organization

He is the first WHO Director-General to have been elected from multiple candidates by the World Health Assembly, and is the first person from the WHO African Region to serve as WHO's chief technical and administrative officer.

Prior to his election as WHO Director-General, Dr. Tedros served as Ethiopia's Minister of Foreign Affairs from 2012-2016. In this role he led efforts to negotiate the Addis Ababa Action Agenda, in which 193 countries committed to the financing necessary to achieve the Sustainable Development Goals.

Dr. Tedros' was elected as Chair of the Global Fund to Fight AIDS, Tuberculosis, and Malaria Board in 2009, and previously served as Chair of the Roll Back Malaria Partnership Board, and Co-chair of the Partnership for Maternal, Newborn and Child Health Board.

Born in the city of Asmara, Eritrea, Dr. Tedros holds a Doctorate of Philosophy (PhD) in Community Health from the University of Nottingham and a Master of Science (MSc) in Immunology of Infectious Diseases from the University of London. Dr. Tedros is globally recognized as a health scholar, researcher, and diplomat with first-hand experience in research, operations, and leadership in emergency responses to epidemics.

Throughout his career Dr. Tedros has published numerous articles in prominent scientific journals, and received awards and recognition from across the globe. He received the Decoration of the Order of Serbian Flag in 2016, and was awarded the Jimmy and Rosalynn Carter Humanitarian Award in recognition of his contributions to the field of public health in 2011.

The Honourable Marie-Claude Bibeau was elected as the Member of Parliament for Compton-Stanstead in October 2015 and was appointed Minister of International Development by Prime Minister Justin Trudeau.

The Honourable Marie-Claude Bibeau

Minister of International Development Canada

In her capacity as Minister of International Development, Minister Bibeau has a mandate to refocus Canada's international assistance on helping the poorest and most vulnerable people. In June 2017, Minister Bibeau launched Canada's new Feminist International Assistance Policy. This innovative new

vision will make Canada a leader in the fight against poverty by prioritizing gender equality in the country's international assistance programming.

Minister Bibeau is at the heart of Canada's strategy for implementing the 2030 Agenda for Sustainable Development objectives both at home and around the world. In recognition of her commitment to the cause of women around the world, she received the CARE Global Leaders Network Humanitarian Award last May. She was also named one of Canada's 25 Most Powerful Women in September 2017 by Women of Influence.

Sadia Rahman

Youth Delegate

Sadia Rahman is a youth activist, a trainer and advocate of youth rights. Sadia is currently working with SERAC-Bangladesh, a youth led organization, and also serves as country coordinator of IYAFFP (International Youth Alliance for Family Planning) in Bangladesh. Sadia has led advocacy focused projects such as Right Here Right Now and Busting stigma on abortion among youth that are focused on improv-

ing women and young people's SRHR. She is the youth focal point of Family planning 2020 team in Bangladesh and working towards making a bridge between youth and policy makers to implement Family Planning 2020 youth focused commitments of Bangladesh. Broaching the issue through a feminist lens, addressing consent, gender roles, and sexual and reproductive rights helped prepared her for her current role at SERAC and IYAFFP. These different opportunities helped her discover her passion for learning, leading and form her ideals of working in partnerships and respecting diversity.

The Rt Hon Penny Mordaunt MP

Secretary of State for International Development

Penny Mordaunt was appointed Secretary of State for International Development in November 2017 and Minister for Women and Equalities in April 2018. She was Minister of State for Department for Work and Pensions from July 2016 to November 2017. She was elected Conservative MP for Portsmouth North in 2010. She has served on the European Scrutiny Committee, Defence Select Committee and as Chairman of the APPGs for Life Science and for Ageing and Older People. In autumn 2013 she was appointed Parliamentary Private Secretary to the Secretary of State for Defence.

She served as Minister of State for the Armed Forces from May 2015 until July 2016. Before entering Parliament she worked for Conservative Central Office, becoming Head of Broadcasting under William Hague, and in 2000 she served as Head of Foreign Press for George W. Bush's presidential election campaign.

Dr. Diane Gashumba

Minister of Health of Rwanda

Dr. Diane Gashumba has served as the Minister of Health for the Republic of Rwanda since October 2016. Prior to this position, she was the Minister of Gender and Family Promotion. Minister Gashumba is a pediatrician by profession bringing 17 years' experience in global maternal, new-born and child health with focus on gender issues. She worked with the USAID-funded Rwanda Family Health Project and as Deputy Chief of Party focusing on improving the quality of and access to services in Maternal, Child and New Born

Health, Family Planning, Reproductive Health, HIV, Nutrition, Malaria and Gender Equality.

Dr Gashumba has a strong background in clinical experience especially in managing maternal, new born and child health programs, including 3 years as Director of Hospital. Adept at building capacity and improving quality within the Rwandan Health system, she has led the design and implementation of the baseline assessment and midterm evaluation of the quality of Maternal New born and Child Health care in 2015 and contributed to various abstracts including topics such as health seeking behaviors of pregnant women, Immunitum study, integration of HIV services into MCH, and assessment of available equipment in health facilities in Rwanda.

Minister Gashumba holds a MD Degree from the University of Rwanda and completed a Master of Medicine specializing in pediatrics.

Dr. Ellen MacKenzie

Dean of the Johns Hopkins Bloomberg School of Public Health

Ellen MacKenzie is the 11th Dean of the Johns Hopkins Bloomberg School of Public Health, the world’s oldest and largest independent school of public health. Dean MacKenzie leads an organization that includes 700 full-time faculty working in 130 countries and teaching more than 2,300 students from 79 nations.

A leading injury prevention and trauma services research expert, she was named Bloomberg Distinguished Professor in 2017, recognizing her interdisciplinary work in trauma care and rehabilitation. She founded the

Major Extremity Trauma Research Consortium, a national network of more than 50 civilian and military trauma centers. She has held key leadership positions at the Bloomberg School including Chair of the Department of Health Policy and Management, Director of the Center for Injury Research and Policy and Senior Associate Dean for Academic Affairs. She has joint appointments in the Department of Biostatistics and the School of Medicine’s departments of Orthopaedics, Physical Medicine Rehabilitation and Emergency Medicine. The Centers for Disease Control and Prevention named her one of 20 leaders and visionaries who have had a transformative effect on the field of violence and injury prevention in the past 20 years. She has authored more than 240 publications.

Dean MacKenzie received a BA in Mathematics from Douglass College – Rutgers University and a Master of Science and Doctor of Philosophy from the Department of Biostatistics at the Bloomberg School.

Dr. Chris Elias,

President of Global Development Division for Bill & Melinda Gates Foundation

Dr. Chris Elias is president of the Global Development Program at the Bill & Melinda Gates Foundation. Focusing on areas with potential for high-impact, sustainable solutions that can reach hundreds of millions of people, Chris oversees the foundation’s work in Emergency Response; Family Planning; Maternal, Newborn, & Child Health; Nutrition; Polio Eradication; Vaccine Delivery; and the work in our Africa and India regional offices.

Prior to joining the Gates Foundation, Chris worked in various positions and countries for international nonprofit organizations, most recently serving as the president and CEO of PATH, an international, nonprofit organization dedicated to improving the health of people around the world by advancing technologies, strengthening systems and encouraging healthy behaviors.

Chris holds an MD from Creighton University, is a member of the Institute of Medicine and completed post-graduate training in internal medicine at the University of California San Francisco. Chris has an MPH from the University of Washington, where he was a fellow in the Robert Wood Johnson Clinical Scholars Program.

Jose ‘Oying’ G. Rimon II

Director and Senior Scientist of the Bill & Melinda Gates Institute for Population and Reproductive Health, Johns Hopkins Bloomberg School of Public Health

Jose ‘Oying’ Rimon is Director of the Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins Bloomberg School of Public Health. He is also a Senior Scientist in the faculty of the Department of Population, Family, and Reproductive Health.

Prior to joining Hopkins in 2012, Oying was a senior officer at the Global Health Policy and Advocacy group of the Bill & Melinda Gates Foundation. He led the development and management of a global portfolio of policy and advocacy grants and partnerships covering family planning and reproductive health; maternal, neonatal and child health; and nutrition.

Oying has more than 30 years of entrepreneurial leadership experience in public health and is a recognized expert in evidence-based policy and advocacy, social and behavioral change, establishing private/public partnerships and managing large and complex multi-issue international health programs. Before joining the Gates Foundation in 2008, he was a founding member and the Senior Deputy Director of the Center for Communication Programs (CCP) covering health and behavioral knowledge management programs in at least 45 countries.

THE GLOBAL HUMANITARIAN AWARD FOR WOMEN'S AND CHILDREN'S HEALTH

The Global Humanitarian Award recognizes individuals who, with great vision and leadership, have invested private wealth to advance reproductive, maternal, neonatal and child health, especially family planning, at the country and global level.

Family planning—the ability to choose the number and spacing of children—is an issue of tremendous importance to women around the world. Access to contraception has been scientifically documented to reduce maternal and under-5 mortality in developing countries by at least one-third and one-fifth respectively. The results of fulfilling women's unmet needs in family planning are far-reaching and profound, including higher socioeconomic status for women and girls and economic growth for entire countries.

Through the giving and commitments made by the honorees of the Global Humanitarian Award for Women's and Children's Health, significant progress will be made toward enabling access to life-saving family planning resources and advancing maternal and child health and well-being. The Award recognizes the tremendous contributions that these honorees have made toward the goal of saving lives worldwide—thousands, if not millions, at a time.

AWARDEE:

Susan Packard Orr

Susan Packard Orr is the founder and CEO of Telosa Software, a company started in 1986 to provide fundraising and other software to nonprofit organizations. Prior to starting Telosa, Susan worked as a programmer at Health Computer Services at the University of Minnesota and as an economist at the National Institutes of Health.

Susan currently serves as a trustee of the Lucile Packard Children's Hospital, the Monterey Bay Aquarium, and the Packard Humanities Institute and previously served as a trustee of the Lucile Packard Foundation for Children's Health. She served for seven years on the board of the Hewlett Packard Company.

In May 2014, Ms. Orr was named the first Distinguished Fellow in Family Philanthropy by the National Center for Family Philanthropy (NCFP). In her role as Distinguished Fellow, she will work with NCFP to inform and shape resources for the field.

Susan holds an M.S. in computer science from New Mexico Tech, and an M.B.A. and B.A. in economics from Stanford University.

WELCOME RECEPTION

KIGALI CONVENTION CENTRE (17:30-20:00)

The Government of Rwanda invites all to join them throughout the Kigali Convention Centre for a welcome reception celebrating the official start of the 2018 International Conference on Family Planning.

**MARIE STOPES
INTERNATIONAL**
Children by choice, not chance

Her Body, Her Choice, Her Future

Our promise to deliver high-quality
contraception and safe abortion
around the world

Marie Stopes International is delighted to be sponsoring ICFP 2018 and to have colleagues from around the globe presenting. Please join our keynote events:

A breakthrough on adolescents

Technical Briefing

7.00 – 8.30am Tuesday 13 November
Room AD4, Kigali Convention Centre

Join Marie Stopes International and the World Health Organization to explore data-driven insights and exciting results from our most successful intervention with adolescents to date. The panel and audience will explore what the data is currently telling us about what works, and what it costs. Breakfast will be served and all are welcome.

Solutions from the adolescent frontline

Side Event

7.00 – 8.30pm Wednesday 14 November
Auditorium Lounge, Kigali
Convention Centre

In 2017 Marie Stopes International doubled the number of adolescents we served. Join Carole Sekimpi (Country Director, Uganda) and Caroline Nambeye (Teen Connector, Zambia) to talk about how they successfully integrated adolescent programming and advocacy into their country programmes. Moderated by our new Chair of the Board, Suzanna Taverne. Drinks and refreshments will be served, and all are welcome.

Contraception for the 21st century: What will it take to realize universal access?

Panel Session

4:20 – 5:40pm Tuesday 13 November
Room MH1, Kigali Convention Centre

Explore the opportunities and emerging drivers of SRHR investment within the framework of the SDGs, under the reimposition of the Mexico City Policy, and as new leaders join with long-term champions. (Speakers subject to schedule).

- Honourable Marie-Claude Bibeau (Minister of International Development, Canada)
- Prof. Isaac Folorunso Adewole (Minister of Health, Nigeria)
- Dereje Wordofa (UNFPA, Deputy Executive Director)
- Robin Gorna (She Decides)
- Dr Alvaro Bermejo (Director General, IPPF)
- Simon Cooke (CEO, Marie Stopes International)

TUESDAY, 13 NOVEMBER

TUESDAY PLENARY

Investing in Family Planning for a Lifetime of Returns

AUDITORIUM / PLENARY HALL (8:30-10:00)

The Day 1 Plenary brings into focus the vast returns on investment in family planning both locally and globally. Two roundtable discussions will take place followed by a Q&A period with questions from the live and virtual audiences.

The first roundtable includes invited discussants Dr. Uzziel Ndagijimana, Minister of Finance and Economic Planning of Rwanda; Ernesto Pernia, Director of National Economic and Development Authority of the Philippines; and Ms. Kate Hampton, CEO of the Children's Investment Fund Foundation. This discussion will highlight the role of policies, practice and the demographic dividend in the return on investment in family planning. The second roundtable includes invited discussants Dr. Hans-Peter Kohler of the University of Pennsylvania and Ms. Jane Nyathi, a selected ICFP youth leader who is a District Facilitator with FHI360 Zimbabwe. The second roundtable will explore returns on investment in family planning related to health, finance, security and the environment. The discussions will be moderated by Dr. Chris Elias, President of the Global Development Division of the Bill & Melinda Gates Foundation.

Dr. Ernesto Pernia

*Economic Planning
Minister of the Philippines*

Dr. Ernesto M. Pernia is the Secretary of Socioeconomic Planning, National Economic and Development Authority, Philippines. He is also Professor Emeritus of Economics, University of the Philippines.

Dr. Pernia was Lead Economist at the Asian Development Bank. His work experience covered investment climate and productivity, economic growth and poverty reduction, education and health, population and development, and regional economic cooperation in Asia. He was also Regional Adviser on population and employment policy for Asia and the Pacific with the International Labour Organization.

He served as chair of the board of trustees of the University of San Carlos, and a director on the board of the Philippine-American Academy of Science and Engineering. He is also on the boards of some NGOs involved in education and health concerns, and population and development.

He obtained his PhD degree from the University of California Berkeley on a Ford Foundation scholarship. He received the first award as Outstanding Young Scientist (economics and social sciences) from the National Academy of Science and Technology. He was chosen by the Philippine-American Academy of Science and Engineering for the 2015 Science Lectureship Award. He was a former President of the Philippine Economic Society.

Dr. Pernia has authored several books and articles in national and international journals. He was an occasional contributor of public-interest commentaries in major Philippine and some international dailies.

Dr. Uzziel NDAGIJIMANA is the Minister of Finance and Economic Planning (MINECOFIN).

Before his appointment as Minister of Finance and Economic Planning, Dr. NDAGIJIMANA was Minister of State in charge of Economic Planning. Prior to that, Dr. NDAGIJIMANA was the Permanent Secretary of the Ministry of Health, Republic of Rwanda from May 2011 to July 2014.

Uzziel Ngadgijimana

Minister of Finance of Rwanda

Dr. NDAGIJIMANA has served at different leadership positions in the academia where he was the Vice Rector of the National University of Rwanda from (2007 - 2011), and as the Rector of School of Finance and Banking in Kigali, Rwanda (2002 -2007).

Dr. Uzziel NDAGIJIMANA is an Economist, holding a PhD in Economics (1998) and a MSc. Economics, specializing in International Trade. He started his career as a Lecturer at the National University of Rwanda in 1999, Faculty of Economics, Social Sciences, and Management, before he moved to leadership positions of the Government of Rwanda from 2002. He is author of papers in national and international journals. He speaks Kinyarwanda, French, English, Swahili, Polish, and basic Portuguese.

Jane Goodall was born on April 3, 1934, in London, England. At the young age of 26, she followed her passion for animals and Africa to Gombe, Tanzania, where she began her landmark study of chimpanzees in the wild - immersing herself in thier habitat as a neighbor rather than a distant observer. Her discovery in 1960 that chimpanzees make and use tools rocked the scientific world and redefined the relationship between humans and animals.

Jane Goodall

Cofounder of the Institute for Wildlife Research Education and Conservation

In 1977, she established the Jane Goodall Institute (JGI) to advance her work aroundnd the world and for generations to come. JGI continues the field research at Gombe and builds on Dr. Goodall’s innovative approach to conservation, which recognizes the central role that people play in the well-being of animals and the environment. In 1991, she founded Roots & Shoots, a global program that guides young people in nearly 100 countries in becoming conservation activists and leaders in their daily lives.

Today, Dr. Goodall travels the world, speaking about the threats facing chimpanzees, environmental crises and her reasons for hope. In her books and speeches, she emphasizes the interconnectedness of all loving things and the collective power of individual action. Dr. Goodall is a UN Messenger of Peace and Dame Commander of the British Empire.

Annette Dixon is the Vice President for Human Development at the World Bank Group, overseeing the Global Practices for education; health, nutrition, and population; gender; and social protection and jobs.

Annette Dixon

Vice President for Human Development at the World Bank Group (Invited)

She was previously the Bank’s Vice President for the South Asia Region. In managing the World Bank’s engagement in South Asia to end extreme poverty and boost shared prosperity, Annette led relations with eight countries, including

India—the institution’s biggest client. She also oversaw lending operations and trust-funded projects worth more than \$10 billion a year.

Before joining the region, Annette was Director, Strategic Planning in the Budget, Performance Review and Strategic Planning Vice Presidency and Country Director to Central Asia, then South East Asia. She joined the Bank in 1999 and worked as Sector Director to Human Development in the ECA region.

Annette is a long-standing champion on gender issues. In South Asia, she has set a target to deliver 100 percent gender-informed projects and interventions, going beyond the global corporate requirements. Under her leadership, the regional priority for South Asia is to support countries to improve Women’s Labor Force Participation.

Prior to joining the World Bank, Annette Dixon worked for the Government of New Zealand as Chief Executive of the Ministry of Youth Affairs. She also served as General Manager, Sector Policy; Deputy Director-General in the Ministry of Health; Director of Health Policy, Department of the Prime Minister; and Manager Policy Division, Ministry of Women’s Affairs.

Born in New Zealand, Annette holds a Master of Public Policy. She was also awarded the Harkness Fellowship in Health Policy and Management at the George Washington University in 1994-1995.

Hans Peter Kohler

*Co-author
Copenhagen
Consensus*

Dr Kohler is a social and economic demographer whose research focuses on health, demography and social change in developing and developed countries. He has been awarded the Clifford C. Clogg Award for Early Career Achievement by the Population Association of America for his interdisciplinary work on fertility and health, and has been honored with the Otis Dudley Duncan Award for Outstanding Scholarship in Social Demography by the American Sociological Association. He directs the Malawi Longitudinal Study of Families and Health, has been a Fellow at the Center for Advanced Studies at the Norwegian Academy of Science, and was engaged with the Copenhagen Consensus Project to evaluate policies to prevent the sexual transmission of HIV, address population growth, and achieve the post-2015 UN Development Goals in the area of Population and Demography.

Jane Nyathi

*Youth Video
Contest Winner,
Zimbabwe*

Jane A. Nyathi, a District Facilitator at FHI 360 is a leader and youth advocate who seeks to empower young people on their sexual and reproductive health and rights, (SRHR). She has been working with the community for the past 2 years. Before joining FHI 360 as a District Facilitator, she was a community volunteer under Bekezela Home Based Care under the DREAMS program. She then joined SAfAIDS in May 2017 as a district facilitator and later moved in October the same year to FHI 360 where she continues reaching out and empowering young people on SRHR. Raised in Bulawayo, Zimbabwe by a nurse and retired technician she attained her Bachelor of Social Science Honours Degree in Geography and Population Studies at Lupane state University in 2017.

Dr. Chris Elias,

A breakthrough on adolescents - technical briefing / Une découverte capitale sur les adolescents (MSI & WHO)

Join Marie Stopes International and the World Health Organization to explore data-driven insights and exciting results from our most successful intervention with adolescents to date. The panel and audience will explore what the data is currently telling us about what works, and what it costs. Breakfast will be served and all are welcome.

Location: KCC AD4

Registration: Public - Please register at www.surveymonkey.co.uk/r/8X8PCFR

07:00–08:25

Implant removal: delivering on the promise of quality FP services / Le retrait de l'implant : Tenir la promesse des services de PF de qualité (Global Implant Removal Task Force)

Are we delivering on the “R” in LARC? Implant use has grown rapidly in recent years, and while the expansion of implant availability and access are remarkable, emerging data indicates that service delivery capacity for implant removals has not kept pace with that for insertion. Please join the Global Implant Removal Task Force for the “Implant Removal: Delivering on the Promise of Quality FP Services.” During this breakfast meeting, participants will gain a better understanding of the current status of implant removal globally, learn about country examples of addressing identified gaps in implant removal services, and be introduced to key resources in the Implant Removal Toolkit. In late 2015, the Global Implant Removal Task Force was initiated to bring together implementing partners and donors to identify existing best practices and call attention to research and programming gaps for expanding access to quality contraceptive implant removal services. Among the task force’s activities is an effort to identify gaps related to implant removal and develop resources to address these gaps to contribute to greater access to quality implant removal services.

Location: KCC AD10

Registration: Public

Abortion service quality resource group / Groupe de ressources pour les services d'avortement de qualité (Ipas, Metrics for Management & Ibis)

Participation by invitation only. Led by Metrics for Management, Ibis Reproductive Health, and Ipas, the Abortion Service Quality (ASQ) Initiative is a group of organizations collaborating to develop the first ever global standard for measuring the quality of abortion services in low- and middle-income countries, both in and out of health care facilities. Our goal is to facilitate widespread adoption and use of a standard client-centered metric of abortion quality of care that is actionable, simple, and valid. The initiative is guided by technical and dissemination input and support from the ASQ Resource Group (ASQ-RG). Any recognized abortion provider, researcher, advocate, or health services leader is eligible to be considered for membership in the ASQ-RG. We welcome the opportunity to expand the diversity of voices informing our work, including additional representatives from low- and middle-income country offices or organizations (particularly from ASQ focus countries: Argentina, Nigeria, Ethiopia, and Bangladesh). For more information about the ASQ Initiative and ASQ-RG, email communications@m4mgmt.org.

Location: KCC AD12

Young people: we deserve better / Nous les jeunes : Nous valons mieux que ça (IPPF)

To ensure solutions to emerging sexual and reproductive health issues truly serve the young people we work with; it is not enough just to listen to them. Young people need to be recognized as leaders and co-creators and their lived experiences must form the basis of any intervention. Attendees will have the opportunity to hear from young people across the globe on issues ranging from access to services to comprehensive sexuality education. Speakers: The new IPPF Director General Dr. Alvaro Bermejo and young people representing IPPF global member associations and partners.

Location: KCC Auditorium Club**Registration:** Private (Invite Only)**Primary & Partner(s) Organizations:** IPPF

07:00–08:25

Closing the gap: sustainable financing for family planning / Refermer la brèche : le financement durable de la planification familiale (UNFPA)

No woman or girl should have to choose between contraception and other basic needs. Many are already facing prohibitive out-of-pocket payments, and in a climate of changing donor architecture, governments must devise health financing systems to ensure sustainable investment in women and girls' access to sexual and reproductive health. Join us for an evening reception where countries and partners will share what works around commodity financing and domestic resource mobilization for family planning as an essential part of achieving universal health coverage. Breakfast will be served.

Location: KCC AD11

Registration: Public - Please RSVP at: goo.gl/forms/5V0ulfqMCqLAqH6o1 or contact: Beatriz de la Mora (delamora@unfpa.org)

Primary & Partner(s) Organizations: UNFPA

Data + communication for effective advocacy & accountability / Données + communication pour le plaidoyer & la redevabilité efficaces (Jhpiego/The Advocacy Collaborative & FP2020)

This interactive, skills-building workshop will bring together advocates, data and communications experts to offer tips for making the numbers work for advocates to help drive action. Using the new FP2020 Annual Progress report, experts will assist advocates in interpreting and packaging the latest data to influence key stakeholders, to communicate the need for action and convert data into tailored messages for decision makers. Participants will examine the latest measures of progress in their countries, and craft targeted, evidence-informed advocacy messages designed to move stakeholders to invest in family planning.

Location: Radisson Blu Royal Suite**Registration:** Private (Invite Only)**Primary & Partner(s) Organizations:** Jhpiego/The Advocacy Collaborative with FP2020

WOMEN OF IMPACT

Global Leaders Creating Positive Change

AUDITORIUM / PLENARY HALL (11:55 - 13:15)

The Women of Impact: Global Leaders Creating Positive Change panel discussion will focus on women in leadership roles around the world who are agents of change in their communities and countries.

Through their philanthropic achievements, work within humanitarian settings, youth outreach efforts and beyond, women have impacted the family planning, economic empowerment and social justice fields in extraordinary ways. These high-profile female leaders from the social, economic and political spheres will discuss how to create a culture that empowers women to become positive disruptors.

This year's Women of Impact panel includes the following invited global female leaders and change-makers:

**Her Excellency
Mrs. Jeannette Kagame,**
First Lady of the Republic
of Rwanda

**Her Excellency
Martine Moïse,**
First Lady of Haiti

**Her Royal Highness
Sarah Zeid,**
Princess of Jordan

**Her Excellency Toyin
Ojora-Saraki,**
Founder of the Wellbeing
Foundation Africa

Session Chair

Dr. Alma Golden
Senior Deputy Assistant Administrator,
USAID Bureau for Global Health

Sessions - Timeblock 1

10:25 - 11:45

1.1.00 **Women of impact: global leaders creating positive change / Femmes d'impact : Ces leaders mondiales qui créent du changement positif**

1.1.01 **A new agenda: investing in a bold and inclusive vision for sexual and reproductive health and rights / Un nouvel agenda: Investir dans une vision audacieuse et inclusive pour la santé et les droits sexuels et reproductifs**

TYPE: Preformed Panel

TRACK: Integration of family planning into health and development programs

LOCATION: MH 1 (Includes French translation)

CHAIR(S): Cynthia Summers, Guttmacher Institute

Gaps in sexual and reproductive health and rights (SRHR) take an enormous toll on individuals, communities and economies around the world. Closing these gaps requires a holistic approach that encompasses the rights of all individuals to make decisions about their bodies—free of stigma, discrimination and coercion—and to have access to essential package of comprehensive and high-quality sexual and reproductive health interventions.

In May, the Guttmacher-Lancet Commission released a new vision for how to achieve universal access to SRHR, one that is affordable, attainable and essential to the achievement of health, equitable development and human rights for all. The Commission called on governments, UN agencies, civil society organizations and other key stakeholders to adopt this new, comprehensive definition of SRHR that integrates the full range of people's needs and services including those that are rarely recognized or addressed in global discussions, such as abortion, infertility and adolescent sexuality. This definition offers a universal framework to guide stakeholders in developing policies, services and programs that address all aspects of SRHR effectively and appropriately.

Turning this vision into reality will require continued and expanded investment in successful interventions such as providing contraceptive services and maternal and newborn care, and prevention and treatment of HIV/AIDS and other STIs and new efforts to address services that have been neglected. It will also require greater collaboration across fields;

generating new evidence to understand the needs of those most often left out of policy and program discussions; sustained advocacy and investment to advance and implement favorable laws and policies; and commitment to change social norms that often exclude those most vulnerable from access to health care.

This panel will discuss the report recommendations, highlight the costs and benefits of investing in SRHR, and explore new areas for research, policy, advocacy and programs that work towards advancing this new SRHR agenda. Participants can expect a robust and engaging panel discussion followed by an open dialogue among the audience and panelists. The panelists will consist of two Commissioners, a youth advocate on the need to leverage technology and creativity to reach young people, and a health expert working to integrate SRHR care, including counselling for gender-based violence, into refugee camps.

1.1.02 **Maximizing returns on family planning through cross-sector approaches to family planning, environment and development integration in Africa / Maximiser les rétributions de la planification familiale à travers des approches inter-sectorielles de l'intégration de la planification familiale, l'environnement et le développement en Afrique**

TYPE: Preformed Panel

TRACK: Returns on investment in family planning and the Demographic Dividend

LOCATION: AD7

CHAIR(S): Sandra Jordan, Family Planning 2020

Objectives:

to present data and experiences of multi-sector, multi-level responses to interconnected population, environment and livelihoods challenges in Ethiopia and Uganda; to present novel advocacy and research strategies to demonstrate the necessity of multi-disciplinary, multi-sector approaches to promoting family planning within complex development settings; to challenge participants to understand the interconnections between sectors that are necessary to promote family planning in the context of the SDGs; to debate what research, policy and practice responses can be developed, adapted and scaled to build on current experiences to promote family planning in the context of the SDGs.

Description:

Cross-sector linkages between anthropogenic climate change, environmental sustainability, population growth and mobility, and human and ecosystem health are increasingly evident and pose significant development challenges (Crist et al. 2017 Science; Aukema et al. 2017 PlosOne; Newman et al 2015 RepHlthMatters). Current population dynamics, including

natural population growth (fuelled by lack of access to, and use of, contraception), economic and stress- and conflict-driven migration, frequently overwhelm the capacity of governments and development efforts to make progress towards achieving the SDGs. Core to progress, family planning investments can offer multiple returns across multiple sectors if they are integrated into cross-sector programming. Yet, the necessary multi-sector approaches remain elusive. This session provides an analysis of integrated approaches to programmes and partnerships that are being implemented in Ethiopia and Uganda and critical reflections on advocacy and multi-disciplinary research efforts to maximise cross-sector implementation efforts. The target audience is practitioners, academics, NGOs, think tanks, activists and policy makers at national, regional and global levels. This session takes up core conference themes in Track 1 and Track 9 and brings empirical evidence and practical experiences to bear on central debates of how to meaningfully implement and evaluate multi-sector responses to promote investments in family planning in creative ways and to maximise the returns on those investments.

Research/program/policy implications:

Findings and lessons from this session underline the importance of cross-sector action to address dual interrelated goals of expanded access to family planning, particularly for last-mile communities, and sustainable development through protecting natural resources. Integrated programming, and multi-disciplinary evaluation, are critical for promoting FP2020 goals, contributing meaningfully to SDG attainment, and significantly expanding access to the benefits of family planning, not only for human health but also for habitat protection and ecosystem health. In this way, returns on family planning investments will be truly maximised for future generations.

1.1.03 **Meeting the needs of women and men in achieving their reproductive intentions: identifying priority data and research gaps in scaling up four new and under-utilized FP / Répondre aux besoins des femmes et des hommes pour réaliser leurs intentions de procréation : Identifier les données prioritaires et les lacunes de la recherche dans le passage à échelle de méthodes de PF/SR nouvelles et sous-utilisées**

TYPE: Preformed Panel

TRACK: Advances in contraceptive technology and contraceptive commodity security

LOCATION: AD4

CHAIR(S): Linnea Zimmerman, Bloomberg School of Public Health, Johns Hopkins University

Panel objectives

A high quality, rights-based approach to family planning must include a range of contraceptive methods, that can be used and discontinued per the needs of the client, and abortion services. The presentations on this panel will review currently available data and identify priority research and monitoring gaps for four methods of contraception and abortion that are growing as a share of family planning programs; contraceptive implants, emergency contraception, DMPA sub-cutaneous injection (DMPA-SC), and medical abortion.

Description

Providing access to a wide variety of family planning methods, including short- and long-acting contraceptive methods and abortion services, is critical to meeting the needs of women and providing high quality care. With the introduction of new methods and/or the scale-up of low prevalence methods within a country, new research and monitoring needs arise. Along with effectively monitoring coverage and uptake, questions surrounding user preferences, service environment limitations, including removal of long-acting methods, and barriers to access are critical to answer to ensure methods can be introduced and scaled-up successfully.

This panel will feature three speakers who will discuss a range of questions related to the introduction and scale-up of new or under-utilized methods.

- **Elizabeth Larson, PMA2020 (Performance Monitoring and Accountability 2020)**, will present on how different definitions of current EC use influence the method prevalence rate, modern method prevalence rate, and method mix across nine-countries in sub-Saharan Africa and recommend how to define and measure EC use for effective program monitoring.
- **Jennifer Drake, PATH**, will review the currently available evidence base on DMPA-SC and self-injection in order to help clarify research and evaluation questions that should be prioritized by donors, governments, and implementers.
- **Ernestina Coast, LSE**, will review the evidence base regarding how women seek and receive information about self-use of abortion in low and middle income countries and will identify key research gaps, and the data and evidence needed to fill these gaps.

The session will be chaired by Linnea Zimmerman, Associate Director of Research, PMA2020.

IMPLICATIONS

Using current data and evidence assists policy and program implementers in successfully incorporating new and under-utilized methods to expand method choice, while identifying and prioritizing remaining research gaps can guide the development of new and ongoing measurement strategies.

- **Approaches to estimate use of Emergency Contraception**
CO-AUTHOR(S): Ms. Elizabeth Larson MSPH, PMA2020

- **Medical abortion self-use in low and middle income countries: a systematic mapping of evidence**
CO-AUTHOR(S): Dr. Ernestina Coast Professor, London School of Economics

1.1.04 **Using evidence to meet the contraceptive needs of women / Utiliser les données probantes pour satisfaire les besoins de contraception des femmes**

TYPE: Preformed Panel

TRACK: Policy, financing, and accountability

LOCATION: MH 2 (Includes French translation)

CHAIR(S): Rubina Hussain, Guttmacher Institute

Over 200 million women in Africa, Asia and Latin America and the Caribbean want to avoid pregnancies, but are not using modern contraception. Recent research from the Guttmacher Institute explores the far-reaching benefits of meeting women's contraceptive needs in several countries. Findings show that improving contraceptive access and services can reduce direct health expenditures (related to pregnancy, delivery, abortion and newborn care) and social costs including maternal and perinatal deaths and DALYs. Investing in contraception may also have indirect advantages such as improving women's educational attainment and workforce participation, ultimately benefitting individual families, the economy and society as a whole.

Using this country-level information, ministries of health, women's health advocates, NGOs and development agencies can identify the needs of women locally and funnel the appropriate resources, via policies and programs directed on reproductive health. Meeting these needs requires government agencies to focus both on ensuring adequate contraceptive supplies and reaching women with unmet need, particularly in vulnerable populations.

This panel presents evidence on the tangible benefits of meeting the contraceptive needs of women at the country-level, offers perspectives on how to prioritize women's health, especially among vulnerable subpopulations, and strategizes ways governments can feasibly improve women's health outcomes by funneling investments in contraceptive care.

Panel Objectives:

- Illustrate how investing in meeting women's contraceptive needs can improve individual health and socioeconomic outcomes and benefit the health sector by averting medical costs associated with unintended pregnancies.
- Emphasize reproductive health services as essential healthcare and strategize practical ways for advocates to use cost-benefit data to influence policymakers to focus on meeting women's contraceptive needs, particularly among vulnerable populations.
- Offer perspectives on how research can be used to prioritize reproductive health in Ministry of Health budgets and to create evidence-based policies to improve health outcomes.

Research, program and policy implications:

Several implications arise from examining the costs and benefits of investing in meeting women's unmet need for contraception. Research presented in this panel is at the country-level with some regional and poverty breakdowns, though often programs are focused on small areas or populations within a country. Panelists will discuss how large, broad data can be used to help inform programs and policies nationally as well as locally. Government investments in contraception may bring modest immediate fiscal savings, but can offer broad long-term benefits and therefore, policies and programs focusing on women's health should be implemented and evaluated with this in mind.

1.1.05 **Youth-led SRHR activities in francophone West Africa: learnings & insights from young advocates in the op region / Activités pour les droits de SSR dirigées par les jeunes en Afrique de l'Ouest francophone : Apprentissages & perspectives de jeunes plaideurs de la région du PO**

TYPE: Preformed Panel

TRACK: Sexual and reproductive health and rights among adolescents and youth

LOCATION: Auditorium Club 3 (Includes French translation)

CHAIR(S): Stephanie Kimou, PopWorks Africa

Compared to Anglophone Africa, Francophone countries have the highest rates of maternal and child mortality, the highest fertility rates, and lowest contraceptive prevalence rates. To address these developmental issues (which often times impact young women the most) there has been an increasingly large youth movement assuming leadership roles in SRHR advocacy regionally.

As international organizations, donors, and governments are looking to address the specific needs of young people in francophone Africa, young advocates are in turn looking to speak to the issues of their peers, and offer youth led solutions. This panel's objectives will be for young advocates to share advocacy and programmatic wins, challenges, and lessons learned coming from youth-led SRHR efforts across the Ouagadougou Partnership (OP) countries. We want this to be an interactive panel for peer to peer exchanges, AND a space to provide insight to adult allies to better meaningfully engage with young advocates. To do so panelists will share:

- Advocacy goals and messages
- Challenges faced
- Success stories
- Best practices in meaningfully engaging with young advocates

This panel will give a glimpse into the lived experiences of young SRHR advocates in francophone Africa and open up discussion around what adult allies (from governments to donors) can do to further support their work. This will not only be presentations on successes and challenges, but a rare opportunity for francophone advocates to exchange and utilize each other as resources to advance advocacy and programmatic SRHR goals. The panel will thus be structured as such:

Flash-presentations: How has youth led advocacy played out in francophone Africa?

- Youth Mission for Education, Health, Solidarity and Inclusion, Cote d'Ivoire
- International Youth Alliance for Family Planning, DRC and Togo
- Ouagadougou Partnership Young Ambassadors, Burkina Faso
- Population Works Africa, Washington, DC

Rotating Hack-a-thons: One representative from each above stated organization will sit in a corner of the rooms and lead a

10-15 min conversation on the following topics:

- How to mobilize young advocates for policy and behavior change (IYAFP, DRC)
- How to leverage your network of adult allies for maximum impact (OP YAs, Burkina Faso)
- How to communicate with decision makers for policy impact (MESSI, Cote d'Ivoire)
- Insights for adult allies into meaningful youth engagement (PopWorks, DC)

These conversations will be based on the experiences of the young advocate leading the discussion; but will focus heavily on questions/comments from participants (peer to peer exchanges.)

- **Best Practices in Meaningful Youth Engagement: How Adult Allies can Support an SRH Youth Movement in the OP Region**
CO-AUTHOR(S): Ms. Stephanie Kimou, PopWorks Africa

Sessions - Timeblock 2

11:55 - 13:15

1.2.00 **Rwanda community-based provision program of family planning services by community health workers: overcoming barriers to access / Programme de distribution à base communautaire du Rwanda des services de planification familiale par les agents de santé communautaire : Surmonter les barrières de l'accès.**

TYPE: Preformed Panel

CHAIR(S): Catherine Mugeni, Maternal, Child, and Community Health (MCCH) Unit, Rwanda Biomedical Center

This session aims at sharing the process and implementation aspects of Community Based Provision program for Family Planning, the role of stakeholders in the implementation of community-based family planning services, the community based family planning package, training of service providers, service provision and data collection tools. The session will also further describe the supply chain of FP products in the community and monitoring of the program for knowledge management.

This session will be an opportunity to hear directly from community health workers their experience regarding the training and validation process, implementation, challenges and the way forward of the community distribution program. This will give a room to other countries willing to initiate the program to learn from the best practices from Rwanda.

– **History and evolution of Community Based Provision of Family Planning in Rwanda**

– **Lessons learnt and way forward for community based provision of Family Planning in Rwanda**

CO-AUTHOR(S): Beatrice Magnifique, Community Health Worker-Kicukiro District

middle-income countries (LMICs) over the past four decades. There, however, persist wide variations in modern contraceptive prevalence rate (mCPR) between and within LMICs. As of 2015, for instance, mCPR was more than two times higher in Asia (62%) and Latin America and the Caribbean (67%) than in sub-Saharan Africa (24%). Unmet need for contraception was, on the other hand, more than two times higher in sub-Saharan Africa (24%) than in Asia (10%) or Latin America and the Caribbean (11%). Within sub-Saharan Africa, estimates from the most recent Demographic and Health Surveys (DHS) show that mCPR ranged from 3% in Central African Republic to 66% in Zimbabwe while unmet need for contraception ranged from 10% in Zimbabwe to 38% in Angola. Literature shows that uptake of modern methods in LMICs is partly influenced by myths and misconceptions about contraception. There is, however, limited understanding of how these myths and misconceptions affect choice of particular methods. In addition, the method mix in many of these settings is dominated by a few methods. In sub-Saharan Africa, injectables and pills have been the dominant methods for a long time although uptake of implants has been on the rise during the past five to ten years. The proposed panel brings together evidence from different settings of LMICs that improves our understanding of the extent to which method-specific beliefs and fertility preferences influence choice, discontinuation, and switching in the context of limited method mix.

Program implications

The evidence contributes to the current global discourse on the importance of improving method mix and addressing discontinuation in order to sustain or improve further mCPR in settings that have made remarkable progress in uptake and to bring in new users in settings that are still lagging behind if the commitment of reaching 120 million women with unmet need by the year 2020 is to be realized.

1.2.01 **Fertility preferences, contraceptive beliefs and choice in contexts of limited method mix / Préférences de fécondité, croyances sur la contraception et choix contraceptifs dans les contextes où la diversité de l'offre des méthodes est limitée**

TYPE: Preformed Panel

TRACK: Fertility intention and family planning

LOCATION: AD4

CHAIR(S): Harriet Birungi, Population Council

Panel Objectives

- Gain a better understanding of reasons for unmet need for contraception with a focus on method-specific beliefs and fertility preferences in resource-constrained settings.
- Highlight factors influencing method choice, discontinuation and switching in the context of limited method mix.
- Define family planning program interventions that could enhance client choice, minimize discontinuation and reduce unmet need for contraception in resource-constrained settings.

Panel Description

There has been remarkable progress in expanding the availability and use of modern family methods in low and

1.2.02 **Fulfilling the promise of contraceptive implants: recommendations for removal-inclusive family planning programming / Tenir la promesse des implants contraceptifs: Recommandations pour les programmes de planification familiale incluant leur retrait**

TYPE: Preformed Panel

TRACK: Expanding access to family planning

LOCATION: MH 2 (Includes French translation)

CHAIR(S): Maryjane Lacoste, Bill & Melinda Gates Foundation

Panel Objectives:

- Present evidence on the status of implant removal accessibility around the world, and highlight remaining learning and information gaps.
- Provide critical recommendations for family planning programmers, donors, and policy makers that address how to expand implant removal service access in various settings, including at the community level, at facilities, and through various other service delivery channels.
- Orient participants to the products newly available through the K4Health Implant Removal Resources page of the Implants Toolkit, with brief examples of their use.
- Deliver a “Call to Action” for governments, donors and implementing partners to implement recommendations.

Description: With contraceptive implant uptake on the rise, governments, family planning programs, and other stakeholders (including users themselves) are eager to ensure that access to quality removal services are within reach for clients using implants. Emerging data demonstrate that this accessibility has not been achieved. The Implant Removal Task Force, with representatives from 20 institutions, has over the past 2+ years identified the most prominent and common gaps in implant removal services and convened regularly to address these gaps through experience sharing, advocacy, and the development of critical resources. These resources, now available on K4Health, span a variety of purposes: job aids for providers, data briefs for advocates, a learning agenda and research tools for researchers, equipment and supplier lists for program managers, and more. To enable stakeholders to adopt these resources, panelists will highlight these tools and how they’ve been used, while sharing their deeper insights on how programming can truly be adapted through a “removal-inclusive” lens. So too will participants be invited to share their insights on how universal access to removal can be achieved. The panelists represent a variety of projects funded by various donors, and will share experience from around the world.

Research/program/policy implications: Participants will walk away with clear, evidence based recommendations that they can employ in their own family planning work to adapt programs and policies in order to expand access to quality implant removal services. For example, those engaged in provider capacity building will hear about best practices for mobilizing implant removal clients during training events and the need for targeted refresher courses on side effect management and removal. Those providing implants in community settings, whether CHWs or outreach, will learn how partners are building programs in a way that ensures clients don’t face disproportionate barriers attempting to access removal services.

- **Understanding the problem: What do we know about implant users’ access to removal services?**
CO-AUTHOR(S): Dr. Rebecca Callahan PhD, MPH, Fhi 360
- **Expanding access to removal-inclusive LARC services in the community, experience and recommendations from Ethiopia**

CO-AUTHOR(S): Mr. Dadirai Nguwo Master in Development studies, Marie Stopes International, Zimbabwe

1.2.03 **Living up to expectations? Exploring client perspectives and experiences to improve quality of care / A la hauteur des attentes ? Explorer les perspectives et expériences des clientes pour améliorer la qualité des soins**

TYPE: Preformed Panel

TRACK: Improving quality of care

LOCATION: AD5

CHAIR(S): Coley Gray, Packard Foundation

Objectives

- To understand the importance and relevance of client expectations, preferences, and feedback in programs and research in addressing quality of care
- To highlight three approaches to gathering and applying these client perspectives in different contexts
- To link client perspectives to efforts to improve quality of care

Description

Despite decades of emphasis on quality of care, attention to the expectations, preferences, and perspectives of clients has been often missing from the discussions. We know that client expectations and experiences matter to contraceptive adoption, use, and continuation, and that expectations also influence satisfaction with services. This panel is important because it unpacks this dimension of quality of care, drawing on recent research and interventions in several contexts and using different methodologies.

The three presentations will look, first, at the preferences of women for counselling content and provider-client interaction, which provide insights into improving quality and satisfaction with counseling; second, at the influences of past experiences and experiences of neighbors and friends on decisions about contraceptive choice and sources of service; and, third, at the experiences of young people empowered to assess and give feedback on youth-friendly services as a critical component of improving quality of care.

Taken together these three projects provide a rich understanding of what matters to family planning users, how experiences that live up to, or fail to live up to, expectations can affect choices and use of family planning, and how clients themselves are able to make a difference in what care is provided and how. These presentations draw on largely recent experiences from India, Ethiopia, and Malawi, but their lessons are globally relevant.

The moderator, a leading funder of quality of care initiatives, will frame the panel’s theme focusing on the critical importance of understanding and addressing client perspectives and draw out similarities and differences in findings across settings that point to avenues for future research and program implementation.

Implications

As FP/RH programs increasingly look to implementing nuanced quality of care approaches, understanding and addressing what matters to clients is crucial. Looking across these results shows there are promising and diverse approaches to gathering insights from clients (and potential clients) that can be turned into concrete research and programmatic follow-up to improve quality of care. By providing tangible examples, this panel will catalyze interest in investing in ways to capture all aspects of client experiences both to increase quality of care provided and to maximize the impact of current investments in family planning programs.

1.2.04 **No woman denied – prioritizing family planning during acute emergencies / Aucune femme refusée : Prioriser la planification familiale en situation d'urgence grave**

TYPE: Performed Panel

TRACK: Family planning and reproductive health in humanitarian settings

LOCATION: Auditorium Club 2

CHAIR(S): Michelle Gayer

Panel objectives

This panel will 1) describe effective strategies for providing comprehensive family planning services during acute emergencies and 2) explore the implications for revised humanitarian guidelines that include FP as part of the minimum package of reproductive health services in acute settings. From the Pacific to Bangladesh to Yemen and Uganda, no woman or girl should be denied feasible, necessary and, most importantly, lifesaving contraceptive services.

Description

For the past few years, the Interagency Working Group on Reproductive Health in Crisis (IAWG), a coalition of key health organizations, has worked to strengthen family planning programs in humanitarian settings and make the case for prioritizing family planning as part of the minimum package of services offered at the onset of a crisis. Through these efforts, IAWG has revised the Minimum Initial Service Package (MISP) for RH in crises– a set of priority interventions designed to save lives and avert preventable injuries, illness and suffering, particularly among women and girls, at the onset of a crisis – to include a focused objective to prevent unintended pregnancies. Its inclusion as a lifesaving health service in acute crises ensures that all possible methods of contraception, including long-acting methods, be offered in crisis settings so women and girls can truly have choice.

The International Rescue Committee, CARE, Save the Children, and IPPF support MISP responses in humanitarian settings throughout the world. Family planning is an essential pillar of these responses. Presenters will describe successes, challenges and lessons learned from responses in some of the hardest places to work and offer recommendations for how other humanitarian organizations can effectively reduce unintended pregnancies in crises.

Implications

This panel contributes to the growing evidence base and existing guidelines, like the revised MISP, for the necessary inclusion of the entire range of family planning methods at the onset of crisis.

1.2.05 **Reaching the urban poor with FP services: business unusual approaches demonstrating impact and early wins / Faire parvenir des services de PF aux populations pauvres en milieu urbain: Les approches**

TYPE: Performed Panel

TRACK: Urbanization and reproductive health

LOCATION: AD11 (Includes French translation)

CHAIR(S): J.M. Ian Salas, Johns Hopkins Bloomberg School of Public Health

Objectives: This panel session will showcase several approaches being championed by various organizations that aim to address existing gaps in reproductive health services for the urban poor. It will highlight how these organizations are partnering with many local governments to bring about better access to family planning (FP) services in slums and peri-urban communities. It will discuss how proven FP strategies have been adapted to the local urban context and are now demonstrating impact on the ground.

Description: The United Nations projects that by 2050, nearly 70% of the world's population will be urban, with 90% of that urbanization occurring in Asia and Africa. Almost all that growth will be concentrated in poor urban settlements. Slum dwellers have considerably worse health outcomes compared to their wealthier urban counterparts, and in some places even worse health outcomes than rural residents. It is likely that increased urbanization will only exacerbate this disparity. As urbanization marches on, there is a pressing need to ensure that the urban poor are not forgotten.

In policy circles, much attention has been given to addressing urban challenges like crime, traffic congestion, poor sanitation, and pollution. However, approaches that tackle the reproductive health needs of the urban poor are lacking. Due to limited knowledge of and access to modern contraceptive methods, the urban poor have less agency over their sexual and reproductive health. Most of them end up providing for a large family, putting a strain on their financial resources, compromising their quality of life and reducing their chances of escaping poverty. Providing women and their partners the means to choose the number and spacing of their children would have a substantial positive impact to their family and communities.

Program implications: This panel session will offer practical guidance on the crucial components of FP strategies that work in urban poor settings. It will help inform program efforts geared towards delivering the SDG promise of "mak[ing] cities and human settlements inclusive, safe, resilient and sustainable."

1.2.06 **Value of family planning for resilience, livelihoods and conservation / La valeur de la planification familiale pour la résilience, la subsistance et la conservation**

TYPE: Preformed Panel

TRACK: Integration of family planning into health and development programs

LOCATION: AD1

CHAIR(S): Kathleen Mogelgaard, Population Institute

Objectives

This panel will highlight how family planning (FP) contributes to broader development goals such as resilience, improved livelihoods, environmental conservation, and sustainable use of natural resources, and demonstrate why FP is relevant for making progress towards those goals. Panelists representing four organizations operating in multiple countries will highlight how FP adds value and enhances equity for people in last-mile communities, in alignment with FP2020 goals. Panelists will provide insights on the return on investment of integrated interventions, using data-driven evidence at both the global level and from project sites, including Population, Health, and Environment (PHE) projects in Madagascar, South Africa, and Tanzania. Recognition of the value of voluntary FP for broader development goals in non-health sectors is an effective way to achieve sexual and reproductive health and rights (SRHR) for more people, while enhancing development outcomes across multiple sectors.

Description

The panel will present on the return on investment of FP for building resilience, enabling women to balance their productive and reproductive roles to undertake sustainable livelihoods, furthering environmental objectives through female empowerment and more broadly. The panel will present research and development models that highlight the pathways between FP and these non-health development priorities. Example PHE projects will illuminate the value FP provides for sustainable livelihoods, income generation and environmental conservation outcomes. These projects demonstrate how the integration of community-based reproductive health services with conservation initiatives can be a win-win approach for community and ecosystem health.

Insights will be shared demonstrating what can motivate environmental conservation organizations to incorporate FP within their projects, and how analyzing population dynamics creates a strong rationale for doing so.

Research/program/policy implications

This panel demonstrates how and why non-health sectors, including resilience, livelihoods, and conservation, are increasingly recognizing the value of FP for their work. Integrated programming contributes to and reinforces the work of the population and reproductive health community. Raising awareness of the value of voluntary FP in non-health sectors will create new champions and potential funding sources for SRHR, helping to attain FP2020 goals and the Sustainable Development Goals, enhancing equity within last-mile communities.

- **Family planning: A key factor of building resilience through an integrated Population, Health, Environment (PHE) project in western Tanzania**

South-south collaboration for family planning session / Collaboration Sud-Sud pour la planification familiale

TYPE: Meeting - By Invitation Only

CHAIR(S): Soyoltuya Bayaraa, UNFPA

The United Nations Population Fund (UNFPA), the Gates Institute for Population and Reproductive Health, the International Planned Parenthood Foundation (IPPF) and the Partners in Population and Development (PPD) have organized the 2nd Ministerial Roundtable meeting on SSC4FP, building on discussions and developments since the previous one held in January 2016 in Indonesia. This dialogue will advance the thinking among key stakeholders committed to the achievement of the zero unmet needs in family planning by 2030.

The roundtable meeting aims at discussing progress achieved to date in systematizing the experience sharing and learning of family planning successes, challenges faced by countries, and opportunities presented by evolving socio-economic developments in countries, regions and globally. In addition, the participants will be invited to share their experiences in advancing the rights-based voluntary family planning, including specific areas of request for and contribution to learning and exchange through SSC.

The overall objectives of the 2018 SSTC4FP Roundtable are:

- Review the progress and renew national commitments to the rights-based family planning as essential element of national development planning;
- Based on exchange of experiences and expectations for SSC4FP, identify priorities and actions to strengthen systematic learning and skills building in Family Planning.

Lunch Side Event

ONSITE

13:25-14:25

TUESDAY LUNCH SYMPOSIUM

2018 Quality Innovation Challenge

MH1 + MH2, KIGALI CONVENTION CENTER (13:25 - 14:25)

With the goal of ensuring everyone's right to quality sexual and reproductive health information and services, the David and Lucile Packard Foundation is hosting its third Quality Innovation Challenge. Designed as a working session to facilitate bold and informed innovations to improve quality of care, participants will hear from the Packard Foundation's Population and Reproductive Health Program Director, Tamara Kreinin, and Program Officer, Lana Dakan, on why quality matters in sexual and reproductive health and rights.

YLabs, a 2016 QIC awardee, will share insight from CyberRwanda, a digital education resource for urban adolescents and healthcare providers that provides quality adolescent sexual and reproductive health resources while teaching about financial literacy, healthy relationships, and healthy lifestyles. Session participants will have 30 minutes to develop grant proposals for the 2018 Quality Innovation Challenge, ask questions, and get feedback from experts in the field. Submissions are due at 16:00 that afternoon and finalists will be announced at the ICFP closing plenary on Thursday, 15 November. In-person submissions are eligible for one of five grants of up to \$100,000 each. There is also an online challenge open to all participants, including those participating in the virtual conference, for one of four grants of up to \$50,000 each.

More details about the Quality Innovation Challenge, past awardees and the online challenge are available at www.packard.org/quality.

KNOWLEDGE. CHOICES. POWER.

2018 Quality Innovation Challenge

Every woman and girl has the right to live with dignity and have a choice in decisions that affect her life.

We're looking for innovative ideas to improve quality in sexual and reproductive health and empower women and girls in new ways.

Application is open to 2018 International Conference of Family Planning attendees.

Two ways to participate:

+ Apply In-Person

Up to 5 grants of \$100,000 each
Tuesday, November 13, 1:25-2:25 pm
MH 1+2, Kigali Convention Center

+ Apply Online

Up to 4 grants of \$50,000 each
Applications accepted from
November 13-15

Submission guidelines will be announced on November 13 at the launch event and online at www.packard.org/quality

TUESDAY LUNCH SYMPOSIUM

Her Health, Her Family: Collective Innovations in Family Planning & Integrated Healthcare Delivery

MH3 (13:25-14:25)

From advances in technology to integrated, new healthcare service and delivery models, this dynamic panel will explore the importance of innovation and public-private partnerships in increasing access to family planning services and resources for women in under-resourced settings.

Panelists will provide insightful and practical best practices to overcome barriers to access and improve care on global and local levels, and furthermore, results will be unveiled from a recently completed academic study of four NGO partner programs in five African countries.

Speakers include representatives from the Bill & Melinda Gates Foundation, PATH, World Vision and the Pfizer Foundation; Moderated by John Skibiak, Director, Reproductive Health Services

For over 160 years, we have helped individuals around the world live healthier lives.

That's why we are supporting women in underserved communities by increasing access to family planning services.

Learn how we're improving global public health, including for women and children, at [Pfizer.com/Purpose](https://www.pfizer.com/Purpose)

TABLE TOPIC LUNCH DISCUSSIONS

AD12 (13:25–14:25)

Held during lunch on Tuesday, 13 November and Wednesday, 14 November, Topical Roundtables expand the coverage of topics during the conference and serve as opportunities for more intimate conversations about these topics. No sign-up is required to sit at a topical roundtable; seating is first-come, first-served.

The following table topics are brought to you by the ICFP International Steering Committee Faith Sub-committee:

Table 1	Resources for engaging faith communities in FP. / Come and learn and share resources that have been used to engage faith communities in FP. CCIH will specifically share low-literacy tools developed for use in Uganda and translated into two local languages; in addition to discussion guides in English & French; and an advocacy guide in English & French.	Facilitator: Mona Bormet, Christian Connections for International Health (CCIH)
Table 2	Form ... or content? How to constructively communicate with people of faith on family planning (in English).	Facilitator: Karen Hoehn, Independent Consultant and European Board Member, Faith to Action Network
Table 3	Improving maternal and child health: FBOs response towards the government/EDRPS/Vision 2020/FP2020 targets. Materials will include sermon guide based on Qur'an and Bible, other community mobilization and service delivery materials. Language: English.	Facilitator: Rwanda Faith Subcommittee – Rwanda Interfaith Committee on Health (RICH).

The ICFP Youth Sub-committee invites delegates 15-30 years of age, to share their thoughts and ideas with other youth family planning leaders on the following table topics:

Table 4	Paving the way as change makers – Is there a recipe?	Facilitator: Burcu Bozkurt
Table 5	Virtual youth movements and social media.	Facilitator: Fila Magnus
Table 6	Are we being redundant and duplicating efforts as youth?	Facilitator: William Otuck
Table 7	Money, money, money, how youth movements manage finances.	Facilitator: Kemar Holder
Table 8	Can we help you raise funds and network?	Facilitator: Siobhonn Job
Table 9	It has to be about data!	Facilitator: Michalina Drejza
Table 10	Local, National, Global, our impact should be obvious.	Facilitator: Ramya Jawahar

Sessions - Timeblock 3

14:35 - 15:55

1.3.00 **The changing landscape of philanthropy: implications for the development community / Évolution de l'environnement de la philanthropie : Implications pour la communauté du développement**

TYPE: Preformed Panel

TRACK: Policy, financing, and accountability

LOCATION: Auditorium/Plenary Hall (Includes French translation)

CHAIR(S): Kojo Lokko, Gates Institute, Johns Hopkins University

Background: The London Summit for Family Planning in 2012 secured impressive financial commitments from governments and funders alike to reignite global support for family planning. Yet 2016 marked the second year in a row that global spending for family planning declined among traditional donor governments, who have provided the majority of external aid dollars historically. According to the Kaiser Family Foundation, eighty percent of donor government funding in 2016 came from only three countries: the USA, UK, and the Netherlands. At the same time, the landscape for international funding for family planning is shifting as private sources and new partnerships have emerged and are generating important changes in the way global health and family planning operates. What does this mean for family planning? How can our field engage with these emerging private sources and approach new ways of mobilizing funds for family planning? The discussion will center around emerging trends and strategic investments with private funding sources that will include high net worth individuals, family foundations and philanthropic networks.

Objectives:

- Examine emerging trends and opportunities in a changing funding landscape for global health and outline implications for reproductive, maternal and neonatal health program support
- Discuss examples of novel funding partnerships to draw lessons from engaging with new actors and mechanisms
- Articulate different approaches to strategically engage new players in the changing landscape

Panelists

- Amanda Glassman, Chief Operating Officer, Center for Global Development
- Ann Morris, Maverick Collective Member
- Carol Lawson, Chief Executive Officer, Packard Foundation
- David Zuellig, Trustee, Zuellig Family Foundation
- Natalie Revelle, Deputy Director, Strategic Investment Fund, the Bill and Melinda Gates Foundation

1.3.01 **Achieving sexual and reproductive health and rights for young people with disabilities / Réaliser les droits de santé sexuelle et reproductive des jeunes ayant un handicap**

TYPE: Preformed Panel

TRACK: Sexual and reproductive health and rights among adolescents and youth

LOCATION: AD7

CHAIR(S): Megan McCloskey, Lotus Circle

An estimated 180 to 200 million people with disabilities globally are between the ages of 10 and 24. Adolescents and young persons with disabilities have the same sexual and reproductive health needs and rights as their non-disabled peers. Yet too often those needs go unmet due to a variety of factors, such as a lack of accessible SRH services, limited personal autonomy, and a lack of empowerment, which can be exacerbated by a lack of education. The ICPD Programme of

Action calls on states to recognise the rights of all adolescents, including adolescents and young people with disabilities, to 'appropriate direction and guidance in sexual and reproductive matters', and to ensure they have access to the services and information they need to live healthy and fulfilling lives. Each of the organizations represented on the panel is taking steps to advocate for the rights of young people with disabilities to enjoy sexual and reproductive health, and support inclusive access to comprehensive sexuality education for young people with disabilities. They were each participants in a forthcoming global study conducted for UNFPA as part of the WE DECIDE campaign, a global programme to support the efforts of young people with disabilities to have their voices heard and increase their visibility to policymakers. The panelists will speak to current research by their organizations on the barriers faced by adolescents and youth with disabilities seeking SRH services as well as best practices in ensuring young people with disabilities are included in programmes designed to achieve the full enjoyment of sexual and reproductive health and rights for all. The panel consists of three organizations whose missions include advocating for the rights of persons with disabilities, including reproductive health rights, and two who offer programs on SRHR for young people that are inclusive of young persons with disabilities. The panel is designed to represent the twin-track model called for by the CRPD, recognizing that full inclusion requires both a mainstreaming strategy that includes persons with disabilities in policies and programmes relevant to SRH, and a disability-specific strategy that includes developing and implementing disability-specific laws, policies, and programme activities designed for the purpose of promoting the sexual and reproductive health and rights of persons with disabilities when particular supports are required. The panelists also work in diverse contexts and have expertise in reaching those most marginalized, such as in Kenya's remote rural communities and Nairobi's urban slums, as well as developing effective partnerships with government entities.

1.3.02 **Enhancing pre-service training to expand access to family planning and comprehensive abortion care in Ethiopia / Améliorer la formation pré-service pour élargir l'accès à la planification familiale et aux soins d'avortement complets en Éthiopie**

TYPE: Preformed Panel

TRACK: Expanding access to family planning

LOCATION: AD6

CHAIR(S): Yolanda Smith

Panel objectives

The panel posits that integration of competency-based contraception and comprehensive abortion care (CAC) training into pre-service health education is an effective strategy to

improve access. We present the experience of ten universities in Ethiopia in partnership with the Center for International Reproductive Health Training (CIRHT) at the University of Michigan. The panel will:

- Describe the state of contraception and CAC training in medical and midwifery schools in Ethiopia
- Present CIRHT's pre-service training approach to equip graduates with requisite skills
- Demonstrate the effectiveness of pre-service training in contraception and CAC in improving knowledge and skills
- Present faculty development initiatives to enhance clinical, teaching, and research skills
- Describe the introduction of simulation-based training in contraception and CAC
- Discuss the role of quality improvement (QI) initiatives to strengthen training and RH service provision
- Present the experience of a pioneer model reproductive health clinic founded on the principles of providing comprehensive, women-centered, respectful care

Panel Description

The panel includes technical experts from CIRHT and faculty from universities across Ethiopia who are partnering with CIRHT to improve pre-service training in family planning and CAC, to ultimately improve access and reduce morbidity and mortality from unintended pregnancies.

CIRHT will discuss its approach to introduce structured integration of competency based training in contraception and CAC for medical and midwifery students and OBGYN residents, through academic partnerships.

Bahir Dar University will describe their experience in successfully introducing simulation-based training for medical students to enhance skills teaching in contraception and CAC.

St. Paul's Hospital Millennium Medical College will describe their experience of setting up a model reproductive health clinic, providing women-centered comprehensive services and a training platform and how this supports its vision to be a Center of Excellence in reproductive health in the region. Adama General Hospital Medical College will describe their experience implementing QI initiatives and its impact on family planning and CAC services and pre-service training.

Policy Implication

CIRHT's signature program of supporting formal integration of contraception and CAC training into pre-education has been scaled up to 10 universities in Ethiopia. This program has supported faculty to improve their skills in providing these services and inspired them to teach more effectively. Based on these results, the Ethiopia Federal Ministry of Health is advocating and supporting scale up of this approach to universities and facilities across Ethiopia. The program is now expanding to Rwanda and will continue to expand to additional developing countries.

- **Enhancing competencies of medical and midwifery graduates for provision of contraception and abortion in a pre-service training**
CO-AUTHOR(S): Dr. Solomon Worku Beza MD, IMPH, CIRHT
- **Role of simulation-based training in advancing skills in provision of contraception and abortion services: Experience from Bahir Dar School of Medicine, Ethiopia**
CO-AUTHOR(S): Dr. Eyaya Misgan Asress Dr., Bahir Dar University
- **'Michu' model of Women-centered Family planning and Comprehensive abortion care in a teaching hospital**
CO-AUTHOR(S): Dr. Tesfaye Hurissa Doctor, Saint Paul's Hospital Millennium Medical College; Feiruz Surur Awcash

– Implementing Quality Improvement (QI) Projects to Enhance Contraception and Abortion Care Services and Pre-Service Training at Adama General Hospital and Medical College

CO-AUTHOR(S): Mr. Shumi Negesse Wami, Adama Hospital Medical College

1.3.03

From tokenism to inclusion in West Africa: youth leadership pays! / Du symbolisme à l'inclusion en Afrique de l'Ouest: Le leadership des jeunes porte ses fruits!

TYPE: Preformed Panel

TRACK: Sexual and reproductive health and rights among adolescents and youth

LOCATION: MH 2 (Includes French translation)

CHAIR(S): Adam Dicko, Association des Jeunes pour la Citoyennete Active et la Democratie

Objective: This francophone panel unites **5 West-African youth leaders** to showcase how youth leadership literally pays off when programmatic, policy and strategic processes include them unequivocally, from start to finish.

Background: Youth and adolescents make up at least half the population in the 9 Ouagadougou Partnership (OP) countries and this number will increase, as will their unique reproductive health (RH) and family planning (FP) needs.

As countries generate their FP strategies and policies, the unique adolescent and youth sexual and reproductive health and rights (AYSRHR) needs, should be considered. The costed implementation plans (CIPs) are a valuable instrument in this process.

Meaningful youth participation has long been a buzzword, but there are few examples of youth-led approaches resulting in better policies and increased financing. This panel unites five youth leaders active in the West-African youth movement, to showcase how their leadership literally paid because they were involved unequivocally from start to finish and thus able to hold their governments accountable.

Methods: The panelists and moderator, all youth leaders, will provide an insider perspective into an exceptional collaboration between youth, local CSOs, INGOs and the public sector, and underline the urgency to scale-up inclusive AYSRHR program, policy and strategy development. The idea for the successful systematic approach stemmed from a regional Youth ThinkTank led by the OP (panelist 1); was grounded in meticulous analysis and evidence (panelist 2); and co-conceptualized, implemented and monitored by youth at the national level (panelist 3). Opportunities to adapt and replicate the approach are numerous and urgent (panelist 4) as inaction not an option.

Results: The panelists will present the stand-alone but mutually reinforcing approaches, leading to: increased coordination and transparency between AYSRHR focused actors in the region, accessible data to inform advocacy for AYSRHR; more effective and additional AYSRHR actions and increased funding nationally, an institutionalized role for youth in all processes that concern them and a replicable methodology. Moreover, through innovative skills honing and a youth serving philosophy, youth amplified their voice and agency; essential assets of the future FP leaders the region needs.

Conclusion: The chance to include youth systematically and consistently, in line with a human rights based approach to development, should not be missed if the FP community is serious about improving the health of youth and backing the acceleration phase of the OP which aims to reach 2.2 million additional users of modern contraceptives by 2020.

- 1.3.04 **Improving FP outcomes: exploring four supply chain interventions that have supported success in Rwanda / Améliorer les résultats de PF: Exploration de quatre interventions sur la chaîne d'approvisionnement qui ont soutenu le succès du Rwanda**
TYPE: Preformed Panel
TRACK: Rwanda Sessions
LOCATION: MH 1 (Includes French translation)
CHAIR(S): Ines Kaze Gege Buki, Chemonics International (GHSC-PSM)

Rwanda has a mature supply chain system with a strong coordinated procurement and distribution mechanism. The system is integrated and therefore can address all supply chain-related issues, ensuring quality of logistics data through a strong reporting system.

Due in large part to strengthened supply chains and the resulting increase in commodity availability and commodity security, the consumption trend of contraceptives has increased for FP methods since 2011. As availability of long-term implants increased by 324%, from 32,896 units to 139,385 units, demand and distribution of shorter-term methods stayed flat or decreased:

- 38% increase for condoms, from 6.61 million to 9.09 million pieces
 - 1% increase for IUDs, from 11,487 to 11,638 units
 - .3% increase for contraceptive pills, from 1,373,589 to 1,377,043 cycles
 - 16% decrease for injectables, from 1,534,070 to 1,295,198 vials
 - 31% decrease in cycle beads, from 5,388 to 3,703 units
- The panel seeks to improve understanding of the:
- relationship between a well-performing supply chain and increased availability of contraceptives and family planning (FP) uptake
 - impact of increased investments in FP commodities and improved couple years protection (CYP) on reducing unmet need, unplanned pregnancies, and maternal and infant mortality
 - best practices of supply chain system to improve FP access in Rwanda over 15 years

These presentations aim to share Rwanda's best practices and the contribution of a supply chain management system in improving FP uptake. Each presentation demonstrates a significant role in attainment of a successful supply chain system in the health sector, from strategy and planning to routine monitoring and data analysis.

The presentations cover four topics: The first presentation focuses on the link between effective distribution of contraceptives and improved FP outcomes. The second describes community distribution of injectable contraceptives and its impact in terms of improved access to contraception. The third explores how logistics data management improves supply chain indicators through the electronic logistics management information system (e-LMIS). The fourth explores

- 1.3.05 **The use of Bayesian methods to monitor progress in family planning: From the global to the sub-national / L'utilisation des méthodes bayésiennes pour suivre le progrès de la planification familiale: De l'international à l'infranational**
TYPE: Preformed Panel

TRACK: Advances in monitoring and evaluation methods
LOCATION: Auditorium Club 2

CHAIR(S): Vladimira Kantorova, Population Division, United Nations

Monitoring progress on expanding access to contraception and reducing unmet need for family planning is crucial for stakeholders at multiple perspectives; the global, regional, national, and sub-national levels. This preformed panel aims to inform the family planning community of a shared model used by the United Nations Population Division (UNPD), Track20 (Avenir Health), and University of Massachusetts, to produce family planning indicators at different levels. The audience will learn about the availability of a dataset containing family planning indicators at the global, regional and national level (United Nations Population Division, 2018), the availability of the Family Planning Estimation Tool (FPET) for country monitoring (New & Alkema, 2015), and the use for sub-national monitoring. It will be explained how the estimates and projections are used for the Sustainable Development Goals (SDGs) and FP2020 monitoring. New developments will be described, including the extension from married-women to all-women and the methods for progress assessment (Cahill et al., 2017). The panel will highlight the extensive efforts undertaken to standardize (where possible) between the initiatives. Whilst there are some small differences between sets of estimates, the key messages are the same and the projects have consistent conclusions about the progress in specific countries.

1.3.06 **Using data for strategizing women's access to comprehensive abortion care in India: Results from a six state study on abortion incidence in India / Utiliser les données pour établir des stratégies visant l'accès des femmes aux soins d'avortement complets en Inde: Résultats d'une étude menée dans six états sur l'incidence de l'avortement en Inde**

TYPE: Preformed Panel

TRACK: Reproductive rights and gender empowerment

LOCATION: AD1

CHAIR(S): Anand Sinha, The David and Lucile Packard Foundation

Induced abortion has been legal in India on a broad range of grounds since the Medical Termination of Pregnancy Act was passed in 1971. India, at that time, was among the 15 countries to have a liberal abortion law. However, unsafe abortion is still the third largest cause for maternal deaths in the country. Each day, ten women die as a result of unsafe abortion related reasons (SRS 2002-03). This classification is based on earlier definition of unsafe abortion. There is a change in the landscape for abortion services in India with close to 73% of abortions in India using medical abortion outside the facility. The last available incidence of 6.4 Million abortion in India is from 2002. These estimates did not provide state specific findings or recommendations for strengthening access. A large-scale study of abortion incidence and service provision was conducted by the Guttmacher Institute (New York); International Institute for Population Sciences (Mumbai) and the Population Council (New Delhi). This study included a representative survey of public and private sector facilities, conducted in six states of India—Assam, Bihar, Gujarat, Madhya Pradesh, Uttar Pradesh and Tamil Nadu—that together comprise about 45% of the country's population. These states were chosen to represent demographic, economic, social and cultural variation across the country. The study also captures abortions that take place outside of health facilities, and therefore provides reliable estimates of the overall incidence of abortion. The report for the six state study is in the process of being finalized and shall be ready for dissemination at the conference.

Objectives: The objectives of this panel are to: Share findings from a representative sample of health facilities in six states on abortion care provided by public and private health facilities Present the policy recommendations which emerged from the study on strengthening the health system to respond to women's need for safe abortion services Discuss the challenges in strengthening CAC services in the country

Expected outcomes: This panel shall highlight the key findings from the six state study highlighting the role of public sector, private sector and out of facility medical abortion for strengthening CAC services in India. The panellists shall also discuss the policy implications for this data and the importance of having data for effective strategies for strengthening CAC interventions at the state level that could be replicated for other states in the country too.

1.4.02 **Introducing generic family planning health products to improve supply security / Introduire les produits génériques de santé et planification familiale pour améliorer la sécurité contraceptive**

TYPE: Preformed Panel**TRACK:** Expanding access to family planning**LOCATION:** AD4**CHAIR(S):** Andrea Bare, William Davidson Institute

Overall Panel Objectives: This panel seeks to highlight the important role that generic family planning products can play in the public sector market for reproductive health — showcasing the value that can come from investing in healthy, competitive markets.

Description of the Panel Overall: The global community has focused on ensuring that quality-assured reproductive health products are available at affordable prices. Generic manufacturers are critical to achieve these efforts, mitigate supply risks, and improve overall market health. In addition to price and risk reduction, the introduction of generic manufacturers into the public sector reproductive health market can have an even more important impact in terms of

lives improved/saved. The introduction of generic family planning (FP) suppliers into the public donor market can improve market health along all market health dimensions: 1) Global supplier capacity to meet demand; 2) Affordability; 3) Supplier/market stability and sustainability; and 4) Appropriate product choices.

– Perspectives on access to generic FP products in Sub-Saharan Africa

CO-AUTHOR(S): Lester Chinery

– Let's talk about quality generics—from 0 to 60 in 6

CO-AUTHOR(S): Ms. Seloi Mogatle, UNFPA

– Assessing the introduction of generic oral contraceptives to support healthy market development at the global and local level

CO-AUTHOR(S): Morgan Simon

1.4.03 **Seizing an often-missed opportunity: the perinatal service provider's role in addressing women's concerns about contraceptive side effects / Saisir une opportunité souvent manquée: Le rôle du prestataire de services périnatals pour répondre aux préoccupations des femmes concernant les effets secondaires des contraceptifs**

TYPE: Preformed Panel**TRACK:** Demand generation and social and behavior change**LOCATION:** AD5**CHAIR(S):** Lillian Collins, Johns Hopkins Bloomberg School of Public Health**Panel Objectives:**

- To disseminate findings from three provider-guided approaches to improving postpartum family planning uptake by increasing women's understanding of contraceptives and facilitating access to services.
- To share best practices in contraceptive counseling during the perinatal period for dispelling myths and misconceptions related to use of specific methods.

Panel Description:

In areas of low-contraceptive prevalence, rumors and misconceptions about the side effects of family planning can generate concerns about safety and impaired fertility associated with use. Such concerns often prevent women who would like to delay or limit childbearing from using contraceptives. The antenatal and postpartum periods present opportunities for provider engagement to address women's concerns, helping them to develop perspective on the actual risks and benefits of contraceptive use. This preformed panel will highlight three approaches to improving postpartum family planning uptake by addressing women's concerns about contraceptive side effects during antenatal and postpartum visits to support their contraceptive uptake. Panelists will represent perinatal care providers at the facility and community levels, including Group Antenatal Care providers in Nigeria, Roving Auxiliary Nurse Midwives in Nepal, and hospital-based physicians in the United States.

Panelists will share their first-hand experiences addressing women's concerns regarding contraceptive side-effects and will share recommendations on how both providers and programs can seize the opportunity of perinatal care provision to improve contraceptive understanding and uptake in the postpartum period.

Research/Program/Policy implications:

The programmatic and policy approaches shared in this panel may be adapted for different settings to improve perinatal counseling to address concerns regarding contraceptive side effects, leading to improved uptake and use in the

postpartum period. Baltimore-based physicians recently influenced state policy on postpartum LARC use, and this can be shared as a model for policy change in other settings. Success of the group care model may influence antenatal care guidelines, increasing implementation of this model in low and middle-income countries, and presenting an opportunity to make comprehensive discussions on contraceptive side effects a routine part of antenatal care. The Roving Auxiliary Nurse Midwives' work to address concerns among hard to reach women in urban Nepal similarly serves as a model for improving understanding and uptake of contraceptives among vulnerable populations.

expertise, with those in the UHC community, to identify ways to advance both agendas in parallel.

With representation from government, donors, civil society and global standard setters, participants will engage in an interactive, solutions-oriented discussion on why and how SRH services, and family planning, can be incorporated into the UHC agenda. Panelists will also help outline where the opportunities for the SRH/FP community lie to get involved in the UHC agenda and importantly how sectors can work together toward this goal.

Dr. Anders Nordström, Sweden's Global Health Ambassador, would moderate the discussion, and audience members would be encouraged to ask questions and engage in dialogue.

1.4.04 **Sexual and reproductive health services in universal health coverage / Les services de santé sexuelle et reproductive dans la couverture sanitaire universelle**

TYPE: Preformed Panel

TRACK: Policy, financing, and accountability

LOCATION: MH 2 (Includes French translation)

CHAIR(S): Elisha Dunn-Georgiou, PPAI

The panel will provide a roadmap for the sexual and reproductive health (SRH)/family planning (FP) community on technical and policy engagement in the Universal Health Coverage (UHC) agenda, exploring the global and regional normative frameworks, country priority setting process, research and data gaps, and CSO's critical role. The overall aim of the panel is to contribute to building a movement that ensures that SRH services, including family planning, are included in essential health services packages and covered through national health insurance benefits packages. The growing momentum and global consensus on UHC has created a unique opportunity to expand access to all health services, but particularly SRH services, including family planning. SRH-related conditions continue to cause a significant portion of the morbidity and mortality in developing countries, much of which is preventable through providing a discrete set of services to women and girls. Many SRH services are potentially sustainable at low cost, making it a feasible proposition when prioritizing the package of services to be included. The broader economic benefits of investing in SRH services are also well-established, further incentivizing the prioritization of women and girls in these efforts. Because of UHC's strong focus on national ownership and equity, ensuring SRH services are incorporated into this agenda could also help increase domestic ownership (and eventually financing) of these services.

That said, there is no guarantee that SRH services will be included in the operationalization of the UHC agenda. Indeed, while family planning is often listed in countries' essential health services packages, it is not always included in health benefits packages. Of course, while what specific services are included in any country's UHC package is decided by countries through a consultative process, this panel will help link the community at ICFP with deep SRH and family planning

1.4.05 **The promise of new methods - going beyond "the what": monitoring and evaluation challenges for projects using human-centered design / La promesse des nouvelles méthodes - Au-delà du**

TYPE: Preformed Panel

TRACK: Advances in monitoring and evaluation methods

LOCATION: AD7

CHAIR(S): Reshma Trasi, Pathfinder International

Objectives:

1. Expose and examine the methods and issues in monitoring and evaluating (M&E) projects using human-centered design principles and methods;
2. Explore the relevance of traditional Institutional Review Boards in assessing protocol for iterative methods and practices; and
3. Discuss how public health evaluation and research systems will need to adapt (or not) to support methods that demonstrate potential in unpacking and addressing demand-side barriers.

Description:

In recent years, there has been an increasing interest within global health in private sector methodologies used to unpack consumer needs, desires, and behaviors to design customized products, services, and experiences for customers. Much of this impetus has come from global concern that 'more of the same' is being done, while aiming for better results. Implementing organizations are using design thinking to generate insights around why specific populations choose to use family planning methods (or not). Discovered insights are used to build and test 'prototypes' through user testing, rapid experimentation, and refinement through iteration and feedback. Prototypes demonstrating promising results are then evaluated more rigorously. These non-traditional disciplines that design to the local context are being implemented within programs and health systems generally governed by conventional public health

standards prioritizing scale, reach, impact, and global best practice. This 'context-scale tension' spills over into the M&E of programs that engage these methods. Implementing partners have had to rapidly innovate and advance ways to collect, document, monitor, and evaluate these methods and interventions to address M&E best practice questions. Join us in an experiential debate based on the solutions, lessons, and results emerging from multi-country projects. Our panelists will share their rationales, results, and lessons learned along one of two "debate-axes" – projects using design principles must focus their evaluation on results produced by the solutions; and projects using design principles must not be subject to ethical reviews. Each taking a "pro" or "anti" stance while debating based on their implementation experience. Audiences will be engaged through "voting with their feet" on each topic and will be asked to share their own experiences within each issue. Our aim is to expose, explore, and examine the issues, solutions, and trade-offs recognizing the potential of newer methods to moving the needle in enabling 120 million more women and girls to use contraceptives by 2020.

Research/program/policy implications:

1. Reference community of practice
 2. Learning agenda development
 3. Link to iterative programming and CLA
 4. Developing and advancing new standards that are more aligned with these methods-

1.4.06 **The role of religious leaders as social change agents for family planning: Grassroots perspectives from four african contexts / Le rôle des chefs religieux comme agents de changement social pour la planification familiale: Perspectives locales de quatre contextes africains**

TYPE: Preformed Panel

TRACK: Faith and family planning

LOCATION: AD9

CHAIR(S): Lauren VanEnk, World Vision

Objectives:

- Describe approaches to sensitizing Muslim and Christian religious leaders in family planning
- Learn how religious leaders respond to and utilize new family planning information
- Share recommendations and key considerations for replication

Description: More than 200 million women in the developing world want to avoid pregnancy but currently are not using family planning (FP). At the London Summit in 2012, policy makers called for initiatives to expand access to FP. Achieving these goals requires broad mobilization of resources and engagement by all sectors, including religious leaders to reach beyond the traditional health system and expand FP access.

Primary reasons for non-use of FP are real or perceived side effects of methods, inaccurate perceptions of pregnancy risk, and social opposition. Preferences for family size and use of FP are reinforced through social norms and community structures, including religion. While many see religion as perpetuating harmful social norms, it can also be part of the solution. Faith communities shape individual and collective values such as human dignity, forgiveness, and respect and care for people as image-bearers of God. These values affect relationships from the most intimate to the most distant. Religious leaders and individual congregations at the grassroots level are important gatekeepers in disseminating reproductive health messages and influencing positive behavior change within communities

Implications: Many religious leaders are confronted with the same myths and misconceptions about FP as their followers. By equipping them with accurate and appropriate information, they can begin to shift norms that hinder FP access. Working with religious leaders "where they are", and engaging with them on issues that expand their ability to reach the communities they serve in ways that are consistent with their underlying values (e.g., the importance of the family as a social unit, the nurturing role of parents, respect between husbands and wives, birth spacing) can open up new avenues for dialog and remove barriers to FP access. Religious leaders have the power to increase significantly the demand for and use of health services, reduce stigma and myths related to FP, and increase male engagement. Therefore, it is important to share challenges and lessons learned from these experiences across a variety of contexts.

TYPE: Preformed Panel

TRACK: Policy, financing, and accountability

LOCATION: MH 1 (Includes French translation)

CHAIR(S): Jane Hobson, DFID

Access to contraception has long been framed within a potentially archaic lens of 'family planning', with key conversations about how it supports women and girls' agency coming second. The SDGs don't just see contraception as health issue however, but also frame it as central to achieving gender equality. How women and girls decide whether to use contraception matters, as does the impact it has on their lives and what it enables them to do. With significant unmet need for contraception amongst adolescents, we also need to think about how we make 'family planning' fit for purpose, speaking to young people's needs and potential.

New leadership is leaning forward in support of this agenda, joining with long-term champions. For example, the government of Canada's Feminist International Assistance Policy puts women and girls at the forefront of development, with sexual and reproductive health and rights an essential enabler on the path towards gender equality.

This panel will provide ICFP with the opportunity to explore, with high-level representation, the challenges around contraception delivery and push for a pathway to acceleration of universal access to rights-based sexual and reproductive health services.

Objectives

1) To explore **the challenges to delivering investment in contraception** in a world of rising boldness and coordination in the opposition to sexual and reproductive health and rights, a development dialogue in an unstable world that tilts towards prioritising a security and migration agenda, and the implications of current funding challenges such as, the Mexico City Policy. The panel will showcase data and testimonies from the world's two largest reproductive health delivery organisations, and from countries (e.g. Nigeria, Uganda and Zimbabwe) where there is enormous opportunity for progress, but also significant risk from the challenges identified in the discussion.

For example the ramifications of changes in funding landscape since 2016 has depleted the funding Marie Stopes International needs to fulfil its FP2020 pledge. While more people than ever are using a method of contraception provided by Marie Stopes International – up 6% in 2017 to 26.9 million – progress has slowed considerably from the 20% increase the previous year.

IPPF has been affected across its whole range of integrated SRHR services including family planning, HIV, sexual and gender based violence, healthcare for men, women and young people. IPPF have estimated that the prevention of 4.8 million unintended pregnancies over three years is a potential reality in the new landscape.

2) To explore the **emerging drivers of investments in contraception** within the framework of delivering the Sustainable Development Goals. More governments are joining together to recognise the importance of working across development efforts to promote gender equality, applying a gender lens to make programming decisions. Multilaterals such as UNFPA are dedicated to the realisation of the SDGs, and so also bring a broader view of the value of universal access to contraception than only immediate health outcomes. Finally, national governments such as that of Nigeria are building their own business cases for indigenous investment in achieving a demographic dividend for their countries. The panel will explore how these areas can and should drive a different attitude to investment in access to rights-based SRHR services.

3. To **identify key opportunities to driving investment – at national and international level - in delivering increased access to rights-based contraception**, building on the world's commitment to the SDGs.

Presenters:

- Honourable Marie-Claude Bibeau, Minister of International Development, Canada
- Prof. Isaac Folorunso Adewole, Minister of Health, Nigeria
- Dereje Wordofa, UNFPA Deputy Executive Director
- Robin Gorna, She Decides
- Alvaro Bermejo, Director General, IPPF
- Simon Cooke, CEO, Marie Stopes International

A CRITICAL NEED
 Visit our photo exhibit to learn more about the critical need for sexual and reproductive health care in emergency settings and how Ipas and partners are meeting this need with Rohingya refugees. AT BOOTH #38

Poster session 1 / Session de posters 1

08:00 - 11:00

AUDITORIUM TERRACE

1.001 **Post Abortion Contraception Model: A Comprehensive Package for Improving Safe Abortion Care In Developing Countries**
PRESENTER: Dr. Fred Yao Gbagbo PhD, University of Education Winneba, Ghana.

1.008 **Unmet contraception needs among women who inject drugs in coastal Kenya: Findings from a qualitative study**
PRESENTER: Ms. Sylvia Ayon Masters, KANCO
CO-AUTHOR(S): Mr. Bangyuan Wang, International HIV/AIDS Alliance

1.002 **Family Planning and the Samburu: A Qualitative Study Exploring the Thoughts of Men on a Population Health and Environment Programme in Rural Kenya.**
PRESENTER: Mr. Loren Kock MSc, UCL
CO-AUTHOR(S): Dr. Audrey Prost

1.009 **Previous Marriage Outcome and Fertility Preference among Re-partnered Women in Nigeria**
PRESENTER: Mr. Olugbenga Olaseinde, Adekunle Ajasin University, Akungba Akoko, Nigeria
CO-AUTHOR(S): Dr. Femi Tinuola PhD Health & Demography, Adekunle Ajasin University, Akungba Akoko, Nigeria

1.003 **Return of fertility after discontinuation of contraception: a systematic review and meta-analysis**
PRESENTER: Tadele Girum
CO-AUTHOR(S): Mr. Abebaw Wasie Master of public health, Wolkite university

1.010 **Mentorship of primary health care providers on postpartum family planning: evidence from a quasi-experimental study in Wakiso District, Uganda.**
PRESENTER: Dr. Mathias Seviiri MD, DIMA, DRH, MPH, Wakiso District Local Government
CO-AUTHOR(S): Olive Sentumbwe-mugisa, WHO:UGANDA; Dr. Blandina Nakiganda-Busiku MBChB, MPH, DPME, Reproductive Health Division, Ministry of Health Uganda ; Dr. Mihayo Placid Dr, Ministry of Health, Uganda

-
- 3.124 **Erosion of the urban advantage: Contraceptive use among low income urban women in Ethiopia**
PRESENTER: Ms. Lina Nurhussien, Boston University School of Public Health/JSI, Inc.

RED CARPET CELEBRATION

Evening Among the Stars

AUDITORIUM/PLENARY HALL (17:45-19:00)

Walk the red carpet and join the ICFP and PSI to raise a glass to international family planning advocates, leaders and celebrity supporters who have helped pave the way toward worldwide access to family planning. The inaugural **Lifetime Achievement Awards** will be given in recognition of several individuals who, through their sustained dedication to family planning and reproductive health, have made a deep and enduring impact on the field.

This award acknowledges the significant commitments and accomplishments the honorees have made to family planning throughout their lives — providing exemplary leadership and becoming role models as a result of their exceptional accomplishments in increasing access to family planning information, services, and/or supplies. These honorees have inspired others to take action on pressing issues, creating lasting positive change for women, families, communities, and countries around the world, symbolizing the lifelong returns on investment that family planning provides at many levels and in many sectors of society. PSI will also acknowledge a young philanthropist (under 40), who has worked with the Maverick Next initiative to revolutionize access to reproductive healthcare for girls and young women, catalyzing ground-breaking healthcare solutions while becoming a bold and creative advocate for change.

LIFETIME ACHIEVEMENT AWARD IN FAMILY PLANNING & REPRODUCTIVE HEALTH

William “Bill” H. Gates Sr.

Co-chair of the Bill & Melinda Gates Foundation

William H. Gates Sr.’s early support for family planning and reproductive health, has been essential to alleviating global inequalities in health and wealth. His vision to reinvigorate the family planning field and invest in the best and brightest talent, has proven prescient many times over. His commitment spans decades, from serving on the board of Planned Parenthood, to investing in the establishment of the Bill & Melinda Gates Institute at the Johns Hopkins Bloomberg School of Public Health, and championing family planning and reproductive health as a trustee of the Bill & Melinda Gates Foundation. He has been a leading voice across the many endeavors that have increased family planning access and improved reproductive health for women and men, communities, and countries throughout the world.

William H. Gates Sr. earned his bachelor’s and law degrees from the University of Washington, following three years of U.S. Army service in World War II. A founding partner at Preston Gates & Ellis, Mr. Gates has served as president of both the Seattle/King County Bar Association and the Washington State Bar Association. He has served as trustee, officer, and volunteer for more than two dozen Northwest organizations, including the Greater Seattle Chamber of Commerce and King County United Way. In 1995, he founded the Technology Alliance, a cooperative regional effort to expand technology-based employment in Washington.

Bill Gates Sr. and his late wife, Mary Maxwell Gates, raised three children: Kristianne, Bill, and Libby. Now married to Mimi Gardner Gates, Bill continues his lifelong commitment to many civic programs, cultural organizations and business initiatives.

LIFETIME ACHIEVEMENT AWARD IN FAMILY PLANNING & REPRODUCTIVE HEALTH

Chief Dr Grace Ebum Delano

Co-founder, Trustee, Board Member, Foundation Vice President, Association for Reproductive and Family Health, Ibadan, Nigeria

Grace Delano is a veteran Midwife with an outstanding career in reproductive health/family planning management spanning over 55 years. Inspired by her tenacity to duty as a midwife at the University College Hospital, Ibadan between 1962 and 1970, late Prof. A.O. Ojo, the first Nigerian head of department of Obstetrics/Gynaecology invited her to coordinate the population programme. Thereafter, she has been part of the initiatives that established and integrated family planning clinics into governmental and non-governmental set-ups in Nigeria.

Grace, a recognized outstanding visionary, co-founded the Association for Reproductive and Family Health with Prof O.A. Ladipo, her professional partner since the 80s. Both of them have continued to champion unique initiatives that provide access to FP both in Nigeria and West Africa. Both have also assisted in strengthening a number of NGOs across Nigeria and West Africa to establish family planning.

Grace has authored and co-authored several FP textbooks and is the author of the first family planning textbooks written in three major Nigerian languages. She has over 50 years working relationship with local and international agencies in various capacities. She has attended numerous conferences and workshops and presented scholastic papers.

Grace is a recipient of several awards including the WHO Sasakawa prize for health jointly won with Prof Ladipo in 1993. Columbia University (NY, USA) awarded her an honorary doctor of philosophy in community development in 1990.

She is happily married to the retired Chief Judge of Ogun state and blessed with 4 children and 8 grandchildren.

LIFETIME ACHIEVEMENT AWARD IN FAMILY PLANNING & REPRODUCTIVE HEALTH

Prof. Oladapo A. Ladipo

President/ Chief Executive Officer of Association for Reproductive and Family Health, Ibadan, Nigeria

Professor Oladapo A. Ladipo an Obstetrician and Gynaecologist has over 40 years' experience in health-care delivery and development work. He was the immediate past President of African Federation of Obstetrics and Gynaecology (AFOG), and also a member of IPPF's International Medical Advisory Panel (IMAP).

Prof Ladipo received his medical degree at the University of Wales, Cardiff, UK in 1967 and later specialized in Obstetrics and Gynaecology. In 1972, he joined the department of O&G, University College Hospital, Ibadan where he introduced innovative programs and research which led to the introduction of new technologies in particular the use of laproscope, intrauterine contraceptive devices, implants and third generation oral contraceptive pills, and innovative adolescent and community based project. On retirement from UCH, he served as the Executive Secretary and Program Director for South-to-South Cooperation in Reproductive Health in Bahia, Brazil where he coordinated research in 15 countries in Africa, Asia and Latin America with a focus on the development of new contraceptive technologies and microbicides.

Prof. Ladipo has dedicated over 40 years of his life to improving access to quality family planning. By founding the Association for Reproductive and Family Health in Nigeria, he has made incredible contributions towards improving sexual and reproductive health and rights, impacting the lives of thousands of women and girls. He is a leader, mentor and technical advisor to many local, state and federal agencies in Nigeria. Dr. Ladipo has been a strong leader and advocate for social and political change and continues to champion for an improved quality of life for all.

He is an erudite scholar with over 180 publications and he has also earned international and national awards. Notable among these awards are the National Merit award and the WHO Sasakawa Health award for which he was the first African recipient.

He is an erudite scholar with over 180 publications and he has also earned international and national awards. Notable among these awards are the National Merit award and the WHO Sasakawa Health award for which he was the first African recipient.

Klaus Brill

Senior Advisor, Bayer

Klaus Brill served as Vice President of Global HealthCare Programs at Bayer AG, Berlin. In 1982 he joined Schering AG as Medical Advisor in various fields (fertility control, hormone replacement therapy, gynecological therapy, prostatic cancer).

Klaus Brill's continuous dedication to improving contraceptive technologies, as well as his contributions to the scientific community, have been

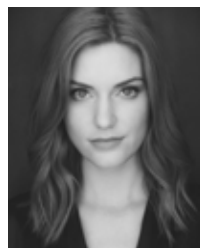

crucial to the advancements in family planning and reproductive health worldwide. During his leadership in Bayer, Bayer became the first pharmaceutical company to be accepted as a member of the Reproductive Health Supplies Coalition in 2007, paving the way for other private sector companies to take action towards reaching the Family Planning goals of 2020. Mr. Brill realized early on, the important role pharmaceutical companies can play in making family planning more accessible. He was also one of the early champions for youth sexual health education and appreciated the importance of harnessing their potential for social change. His visionary work in the private sector, for over 35 years, ensuring safe and reliable contraceptives are readily available, has resulted in life changing returns on investment for millions globally.

He is a biologist by training and has written a number of papers on reproductive health and contraception. Since March 2018 he has functioned as a senior adviser to Bayer.

THE FUTURE IS FEMALE AWARDEE

The **Future is Female Award** is given to a young woman who dedicates her time, resources and intellect to help create a world where every girl and woman has the agency to decide her own future.

Jess Jacobs is the first recipient of the Future is Female Award.

Jess Jacobs

Jess is an actress, speaker and advocate. She is a member of Maverick Collective and co-founder of a women-led, New York based production company, Invisible Pictures, whose mission is to produce film, television, documentary and digital content with a focus on creating space for people and communities to tell their own stories, achieved through an inclusive development process in which any community centrally represented on-screen is a leading voice in the creative and production process off-screen.

India family planning caucus / Caucus de la planification familiale de l'Inde (Population Foundation of India)

India Family Planning Caucus is a multi-stakeholder meeting to discuss India's Family Planning Commitments and recommend measures to achieve India's FP 2020 Goals. The caucus will bring together key stakeholders from India with the following objectives: a) Amplify collective voice for increased budgetary allocation and optimal utilization of funds for Family Planning and urge government of India to accelerate fulfilling FP2020 commitments b) Launch the key research publication by PFI – 'Cost of Inaction in Family Planning'. The caucus will convene a high level panel discussion on the socio-economic implications of inaction in family planning. The Speakers will include: (i) Members of Parliament, (ii) Senior Government Officials, (iii) Civil Society Leaders, and (iv) Development Partners. For more details, please contact Ms. Purnima Khandelwal at pkhandelwal@populationfoundation.in

Location: KCC AD11

Registration: Private (Invite Only)

Getting to equal: an ICFP reception and discussion on SRHR, male engagement and gender equality / Arriver à l'égalité : une réception de l'ICFP et une discussion sur les droits de SSR, l'implication des hommes et l'égalité de genre (Promundo US)

Achieving full equality needs men – not in charge of women's reproductive decisions – but as full, equitable partners, invested in their own health and supportive of women's autonomy. As the international community moves beyond 2020, it will be important to ensure that engaging men in sexual and reproductive health and rights (SRHR) and gender equality is included in global and country plans to further increase family planning uptake within a rights-based and gender-transformative paradigm. Join us for a reception and discussion at the International Conference on Family Planning (ICFP) 2018 to advance the conversation; network with a community of SRHR and gender-equality practitioners; and learn about Promundo's new Getting to Equal initiative and resources on engaging men in SRHR and gender equality – including the upcoming release of new evidence on the global state of affairs in this area. Refreshments will be served. Questions? Please email Christopher Hook at c.hook@promundoglobal.org. We thank the Bill & Melinda Gates Foundation for their generous support that has made the Getting to Equal initiative and this event possible.

Location: KCC AD1

Registration: Public - Suggested RSVP at www.eventbrite.com/e/getting-to-equal-an-icfp-reception-and-discussion-tickets-50078257416

18:00–21:00

Manual vacuum aspiration: training and technical information for medical providers / L'aspiration manuelle intra-utérine : formation et informations techniques pour les prestataires médicaux (DKT International, WomanCare Global & Ipas)

This seminar will convene medical providers in small groups to review the utility of manual vacuum aspirators (MVAs) for various clinical indications. This seminar is aimed at medical providers with working knowledge of how to use MVA technology. The seminar will be followed by a complimentary cocktail hour where providers can discuss further.

Location: KCC Auditorium Club

Registration: Public - This training is for medical providers familiar with MVA technology. If this applies to you, please send an email to True Overholt at true@dktinternational.org with "ICFP MVA training" in the subject line and your details in the body of the email.

18:30–20:30

Comprehensive sexuality education in sub-Saharan Africa: implementation, effectiveness, and opportunities / L'éducation complète à la sexualité en Afrique sub-saharienne : mise en oeuvre efficacité et opportunités (APHRC and the Packard Foundation)

Comprehensive school-based sexuality education (CSE) has for long been recommended as an important tool for providing accurate information and skills and for supporting young people to achieve positive reproductive health outcomes. International debate and thinking on the issue have evolved rapidly over the past decade, as epitomized in the release, this year, of revised UN global guidance on CSE. The new global frame implies consequences for existing CSE policy and practice in individual SSA countries. Conversely, insights on-the-ground experiences of CSE programming in SSA contexts can further illuminate both regional and global debates on the issue. This side event will bring together researchers, program staff, donors, and advocates to (i) share findings from a set of in-depth case studies on challenges, opportunities and factors shaping CSE design and implementation fidelity, and (ii) with reference to the global guidance, discuss their implications for local practice, advocacy and research and international debates. A set of incisive presentations will (i) offer a brief overview of regional and sub-regional data on the context and need for CSE (ii) distil key elements of the new global CSE frame and evidence base, and (iii) distil key findings - relating to the design, and

the extent and drivers of implementation fidelity of present CSE programming in select countries. A subsequent moderated panel discussion will reflect on the perspectives presented; pinpoint implications for action, advocacy and further research to enhance CSE practice in SSA; and highlight emerging issues or angles to be considered in scientific and policy debates on CSE in Africa and globally.

18:30–21:00

Interact with business unusual - The Challenge Initiative's urban family planning tools / Intéragissez avec le modèle "business unusual" - Les outils de planification familiale urbaine de The Challenge Initiative (TCI)

Event Description: Are you committed to a healthy and sustainable future for your city? According to the United Nations, 70% of the world's population will be urban by 2050 and 90% of that urbanization will be in Africa and Asia. Most of this growth will be concentrated in poor urban slums. Join us for Interact with Business Unusual: The Challenge Initiative's Urban Family Planning Tools. This interactive opportunity demonstrates how we are implementing our innovative program in our four regional hubs: East Africa, Francophone West Africa, Nigeria and India. During this event, you will have the opportunity to explore our evidence-based solutions through a variety of media. You will also have the chance to network with colleagues working in urban reproductive health. Learn more about the Initiative at a time when a woman's access to contraception is being threatened as cities throughout Africa and Asia continue to rapidly grow. Finally, we will spotlight the newest addition to our portfolio, Adolescent and Youth Sexual and Reproductive Health. This critical area also needs to be addressed with rapidly scalable and sustainable proven approaches. Refreshments will be served.

Location: Radisson Blu Royal Suite

Registration: Private (Invite Only) - Register Here: www.eventbrite.com/e/interact-with-business-unusual-registration-47858440885

18:45–21:00

Guttmacher-Lancet Commission reception / Réception de Guttmacher-la Commission Lancet (Guttmacher)

In May 2018, the Guttmacher-Lancet Commission on Sexual and Reproductive Health and Rights—a collaboration of 16 global health, development and human rights

experts from around the world—issued a report that put forth a comprehensive, evidence-based and bold agenda to achieve universal access to sexual and reproductive health and rights. This global agenda is actionable and affordable, and encompasses the right of all individuals to make decisions about their bodies and lives—free of stigma, discrimination and coercion—and to have access to essential sexual and reproductive health interventions. At this reception, high-level stakeholders across a range of disciplines will join Commissioners and Advisory Group members of the Guttmacher-Lancet Commission to celebrate the progress of a range of global efforts to advance universal sexual and reproductive health and rights, including the contributions and impact of the Guttmacher-Lancet Commission in its first year.

Location: KCC Filini Restaurant

Perils and promise: engaging the private sector in reaching FP2020 goals / Périls et promesses: impliquer le secteur privé dans l'atteinte des objectifs de FP2020 (MSD for Mothers, BMGF, FP2020, Living Goods, Society for Family Health, Nigeria)

Join us as we explore how local businesses can collaborate with governments to meet the needs of women, wherever they seek contraception. Experts from across sectors will share how they have leveraged public-private partnerships to improve access to family planning.

Location: KCC MH1

Registration: Public - MSD for Mothers will distribute via email a link to register for the event

Primary & Partner(s) Organizations: MSD for Mothers with Bill & Melinda Gates Foundation, FP2020, Living Goods, and Society for Family Health, Nigeria

19:00–21:00

Advancing family planning and voluntary contraceptive choices in humanitarian settings / Faire avancer la planification familiale et le libre choix contraceptif en situation de crise humanitaire (UNFPA & IAWG)

Humanitarian crises are increasing in scale and complexity, which may be triggered by epidemics, technological, climate change or environmental catastrophes, or other natural or man-made causes, have caused a dramatic rise in the number of displaced people, both within and across national borders. In 2017, 65.6 million people were displaced; crises now typically last more than 2 decades and populations are typically displaced for 25 years. As the number, frequency, and intensity of crises have intensified, so has the impact they have on people's lives. Women and girls are affected disproportionately and face multiple sexual and reproductive health risks. 1 in 5 women in these contexts experience sexual violence,

yet a 2014 review found they were unable to access contraceptive services, particularly long acting methods, so many suffer not only violence but also an unintended pregnancy. There are currently an estimated 26 million women and girls of reproductive age living in emergency situations, all of whom require access to sexual and reproductive health services. During the FP Summit in London in 2017, it was highlighted the need to strengthen access to short and long term voluntary contraceptive in humanitarian settings and to improve data collection, monitoring and accountability. The side event will examine what progress had been made since the FP Summit.

Location: KCC AD12

Registration: Public - RVSP by 15 of October 2018 by sending an email to ICFP-2018@unfpa.org

19:00–21:00

From evidence to action: driving the next generation of family planning programming / Des données de recherche à l'action : insuffler la prochaine génération de programmes de planification familiale (E2A, Pathfinder International, PATH, MSH, IntraHealth, ExpandNet)

The Evidence to Action Project (E2A) is the US Agency for International Development's (USAID) global flagship for strengthening family planning and reproductive health service delivery. The project, which began in 2011, is slated to end in September of 2019. E2A will take this opportunity to highlight the project's most significant contributions, the evidence generated to support them, and its scale-up methodology and tools that will continue to be used to strengthen family planning practice and policy for years to come. The session will include the voices and stories of youth, policy makers, multilateral organizations, and USAID, who will share their collaborative experience with E2A. E2A worked with these partners to implement and scale up innovative programming for first-time parents, advance programs and policies that expand method choice for youth to space second and subsequent pregnancies, adapt evidence-based tools to foster a stronger family planning workforce, support task-shifting to expand access to contraception in underserved communities, offer youth-friendly post-abortion care, and contribute to national plans and policies that are responsive to the family planning and reproductive health care of adolescents and youth. The session will highlight the strategic partnerships that have enabled E2A to have a systemic impact at country, regional, and global levels. An interactive dialogue at the end of the session will allow participants to engage with E2A staff and partners to learn about specific initiatives that are laying the foundation for the next generation of family planning programs.

Location: KCC AD10

Registration: Private (Invite Only)

WEDNESDAY, 14 NOVEMBER

WEDNESDAY PLENARY

I SEE FP: Our Stories — See, Hear, Engage

AUDITORIUM/PLENARY HALL (8:30-10:00)

More than half of the world's population is under the age of 25. Youth are passionate, energetic and powerful, and will inherit the world, including the challenges that come with it. Issues that affect youth — education, the prevention of teenage pregnancy, gender equity and employment, to name a few — deserve the attention of leaders, policy-makers, researchers and advocates of all ages.

This youth plenary session will focus on diversity in family planning. When we talk about diversity, we talk about unity. Unity among us all to work together and to work with groups that we don't normally work with to further our efforts. The plenary which will be non-traditional and include monologues and interactive elements will be focused on diversity in family planning and highlight the lived realities of youth from all over the world and programs that have successfully integrated diversity around family planning. Monologues will be interspersed with visuals focused on bringing out the data which back-up the stories or highlights solutions in different regions.

The plenary will include leaders/CEOs of organizations, experienced family planning experts and youth adolescent sexual and reproductive health and rights advocates.

People should walk away:

- With a peak into the daily lives and experiences of those served or targeted by their work.
- Knowing that Family Planning is for everyone.
- Knowing that young people are not homogenous -- there is so much diversity in terms of their backgrounds, their experiences, their perspectives, their families, etc.
- Understanding that effective approaches to SRH are diverse -- there is no one-size-fit-all approach and most likely a conventional family planning (pregnancy prevention) program/ message is not relevant for youth. To be relevant for youth we need to embed the conversation about contraception into conversations and programs that youth prioritize (which might be financial planning/livelihoods, education, skills programs, mentoring, etc.)
- With a call to action to connect with a young person/organization/network that is working in a relevant youth space, but not family planning
- With a call to action to get uncomfortable, reach outside our traditional partner groups

Kiswendsida Seybatou Compaore,
Youth Delegate

Youth Delegate

Born on August 30, 1995 in Kombisiri, Burkina Faso, Seybatou COM-PAORE is the elder daughter of a family with two children.

After she graduated from high-school in 2013, she enrolled in medical school at the University of Saint Thomas d'Aquin, more as a result of family pressure than out of passion.

However, she adapted very quickly to the health sector and very soon fell in love with the Association of

Medical Students, whose mission is to promote health. She joined this association in 2014 as a member, and was appointed Secretary General for Human Rights and Peace in 2015. Following this experience, she joined the Sexual and Reproductive Health Committee, on which she served as Vice-President of Finance and soon became a strong advocate for sexual and reproductive health. Her passion for sexual and reproductive health is her driving force.

Through this social commitment, she spends her time studying medicine and conducting outreach and screening campaigns to promote community health, particularly sexual and reproductive health.

Marietta Wildt

Youth Delegate

Marietta Wildt works as Advocacy Officer for DSW where she focuses on youth, gender and population dynamics. Passionate about youth participation and/in sexual and reproductive health and rights, her background is in youth leadership and youth-led advocacy, like in her former position with the International Youth Alliance for Family Planning (IYAFP). She has founded

her own organization on social connectedness and is deeply rooted in social justice and creating resilient communities. Marietta graduated with an MA and MSc in Global Studies from universities in Poland, Canada and Denmark, doing research on poetry as a matter of resistance against gender-based violence.

Nthanda Manduwi

Youth Delegate

Nthanda is an author, public speaker, blogger and media producer. She runs a lifestyle media Company in Malawi called "By Ntha Media" that produces television shows, lifestyle and travel websites and magazines, and several advertisements. By Ntha Media is a social enterprise that works hand in hand with her non-profit organisation, The Nyenyezi Ya Ku M'mawa Founda-

tion. Nyenyezi Ya Ku M'mawa is her native tongue - Chichewa, meaning "Morning Star" in English. The two organisations believe in building up other young creatives (Morning Stars) to also establish their brands by giving them mentorship, internship and employment opportunities - and in turn use their talents to champion social causes.

Nthanda is a recent graduate from the University of Malawi, holding a Bachelor's degree in Social Sciences - with a double major in Economics and Demography. She works as a Revenue Officer for the Malawi Revenue Authority, but follows her passion of story-telling through writing, speaking and media production.

Innocent Grant Mkosyange

Youth Delegate

Innocent Grant is 21 years old. He comes from a family of 4 siblings; He comes from United Republic of Tanzania. He is a Clinical Officer with much interest in improving sexual and reproductive health services to young people in Tanzania and all over the world. Innocent likes to work for his community's development and inspiring young people to work hard achieving their goals. He likes travelling, learning new things and reading novels.

Dereje Wordofa

UN Assistant Secretary General and UNFPA Deputy Executive Director

Mr Wordofa, a national of Ethiopia, brings to UNFPA over 28 years of successful and broad range of experience in providing strategic leadership, advocacy, programme development and managing operations in complex and challenging environments in promoting peace and social justice in Africa. He represented international organizations at high-level fora, including various strategic networks, alliances, governments, donors and non-governmental organizations.

Before joining UNFPA, Mr Wordofa had worked as International Director Region for Eastern and Southern Africa for SOS Children's Village International and Regional Director for Africa at the American Friends Service Committee. Previously, he was Head of Regional Policy Team based in Oxford and Country Representative for Oxfam in Uganda.

Mr. Wordofa holds a Master's degree in Business Administration from the Oxford Brooks University, Master of Science degree in Social Policy in Developing Countries from the London School of Economics. He also has and a Bachelor of Arts in Business Management from Addis Ababa University, Ethiopia.

Fila Magnus

Director of Communications, IYAFP

Fila sits on the Executive Board of Carefugees, an organization that works with refugee families in Malaysia, as well as the Youth Advisory Council of Child Helpline International. Hailing from sunny Malaysia, where child marriage is prevalent, and baby dumping remains to be an issue that plagues the society, and refugees continue to go unrecognised, Fila is driven by the passion to ensure that one day these problems will no longer be a reality.

Serving as the Director of Communications for the International Youth Alliance for Family Planning, Fila is committed to ensuring that youth from all walks of life are granted access to knowledge and resources that they require in order to be able to make informed decisions with regards to their autonomy and sexuality.

Fila is also a Women Deliver young leader for the 2015/2016 cohort, a blogger on the Huffington Post UK, and the founder of Exploratrice.Co

Joshua Lozman

Director, Program Advocacy & Communications; Lead, Melinda Gates Advocacy & Communications; Global Policy and Advocacy; Bill & Melinda Gates Foundation

Josh Lozman is Director of Program Advocacy & Communications for women's and children's health and gender equality at the Bill and Melinda Gates Foundation. In this role, he leads the Foundation's advocacy and communications strategies in those areas. Josh also leads the foundation's strategy and execution of co-chair Melinda Gates advocacy and communication time, priorities and message.

Immediately prior to joining the Gates Foundation, Josh served in the Obama Administration as the Chief of Staff to the National Economic Council in the White House. He spent more than four years at the global advocacy organization, ONE, including roles as Policy Director and Chief of Staff. Josh has worked at development policy organizations including the Global Health Council and the Center for Global Development and has worked on several election campaigns.

Josh holds a Masters in Business Administration and a Masters in Public Health from Johns Hopkins University and graduated from Dartmouth College.

Yidnekchew Mogessie

Youth Delegate

Mr. Mogessie is a 22 year old medical student in Ethiopia currently serving as the senior adviser for North and East Africa in Global health Focus initiative, an international initiative with the aim of developing critical thinkers and leaders in global health.

Under this initiative, he was able to deliver this course to more than a thousand participants in East Africa and now he is working to expand it to North Africa. He is also An SRHR advocate and project coordinator of one of the Rex Crossely Award winning projects, sexual health education for better awareness (SHEBA) project. He has trained many youth-led organizations and students as Essential Leadership Skills trainer, International Federation of Medical Students Association trainer, Women's Health and Safe Abortion trainer, Setawet Trainer and Global Health trainer.

Currently he serves as a voluntary medical consultant for a team of social entrepreneurs to develop an application called VIRAGO, first-of-its kind mobile application in Ethiopia to create awareness about cervical and breast cancer.

Leticia Corona

Fellow, Global Development and Population, The William and Flora Hewlett Foundation

Leticia Corona is a Global Development and Population Fellow at the William and Flora Hewlett Foundation. She focuses on deepening the foundation’s support to organizations advocating for access to affordable, high quality reproductive health services in the United States and applying principles around diversity, equity and inclusion in their international grantmaking.

Before joining the foundation, Leticia was the director of community advocacy at Leadership Counsel for Justice in Accountability where

she led the groundwork for setting policy priorities and developing new strategies for investments in long-term water projects in disadvantaged rural communities in the state. Leticia previously worked with the U.S.-Mexico Border Philanthropy Partnership and for the Whitaker and Peace and Development Initiative in partnership with UNESCO in Tijuana, Mexico, where she contributed to the development and implementation of their programs.

Leticia received her bachelor’s degree from the University of California, Berkeley, where she double majored in Chicano studies and social and cultural anthropology. She also received a master’s degree in international relations from the University of San Diego.

Rosemary Nazar

Youth Delegate

Rosemary Nazar is a 25-year old advocate for sexual and reproductive rights of young women in Tanzania. She is a Youth Officer with Population Services International (PSI), working in a program called Kuwa Mjanja which seeks to increase voluntary contraception for girls aged 15 to 19. Her work involves engaging girls both in health facilities and within their community across Tanzania and showing them how modern con-

traception can help safeguard their futures. They work together to figure out ways to open up access to modern contraception, using proven approaches grounded in Human-Centered design to tackle cultural norms, economic barriers, negative value systems and non-supportive social systems.

With a Bachelor’s degree in Health Systems Management, she was always destined for healthcare. I love working within my community to give young women and girls’ choice – to give them control over their bodies and their lives.

Maria Celeste Velasquez Cojolon

Youth Delegate

Celeste Velasquez lives in Alotenango, Guatemala with her mother and older brother. In 2016, Celeste began as a youth peer educator in the education program for adolescents at WINGS Guatemala. Having graduated from the program as one of the star educators, Celeste was hired in January 2018 to the WINGS staff as a Community Health Promoter. In her current role, Celeste coordinates logistical details for reproductive health mobile clinics and provides educational talks to patients across the central region of Guatemala. Celeste is pursuing a degree in Psychology at Mariano Galvez University and is fascinated by social marketing. In her limited free time, you can find Celeste dancing or reading a good book.

Divin Adamo

Youth Delegate

Born and raised in the DRC, Divin has significant experience in supporting young people in the fight against gender inequalities, and for reproductive health and peace building.

In the past 5 years, Divin worked as a volunteer at the Children’s Parliament under the “Sisi Vijana” Project, supported by CARE INTERNATIONAL/DRC & Burundi, where he facilitated youth programs and discussions. In February 2017, Divin founded an organization named “Youth Engaged for Change” (YEC), where he currently serves as the Coordinator. This organization focuses on capacity building for youth in entrepreneurship and leadership skills, active non-violence and gender equality.

In July 2018, Divin participated in the Young African Leaders Initiative (YALI) in Kenya, focusing on public stewardship/governance. This program was initiated by former President of the United States of America, Barack Obama. He graduated in Rural Economy at the University of Goma.

Sekulu Nyakha

Youth Delegate

Sekulu Nyakha is a 20 year old college student from India and is part of Hidden Pockets Collective as an experience designer. She strongly believe in family planning, as it constructs the very foundation of a child and plays a major role in the well-being of parents as well.

Sekulu is humbled to be selected as a youth delegate in a conference as meaningful as ICFP. She looks forward to learning from everyone. In her free time, she is passionate about story telling through films and poetry.

Dr. Josephine Kibaru-Mbae

Director General of the National Council for Population and Development

involved in population programs.

Dr. Mbae is a medical doctor by training, and specialized in gynecology, obstetrics and public health. She has over 25 years' experience in the public health sector, with about 20 of these years in leadership and management positions at different levels of the health sector in the Republic of Kenya and the region.

Dr. Mbae received the Presidential commendation of the Order of the Grand Warrior (OGW) for Excellency in 2015.

Katja Iversen

President/CEO of Women Deliver

she held the position as Chief of Strategic Communication and Public Advocacy with UNICEF.

She is a member of Prime Minister Trudeau's G7 Gender Equality Council, the Unilever Sustainability Advisory Council, the MIT Women & Technology Solve Leadership Group, and an International Gender Champion. Iversen was recently named in the top 10 of Apolitical's Top 100 Most Influential People in Gender Policy.

Iversen has worked in global development for more than 20 years and has an extensive network within the UN, development communities, and global media. She holds a master's degree in communications, bachelor's degree in public administration and certificates in management, conflict resolution, and international development.

Dr. Josephine Kibaru-Mbae is the Director General of the National Council for Population and Development (NCPD), which is responsible for coordinating the multisectoral implementation of the National Population Policy. Dr. Mbae has been at the helm of NCPD since February 2014 and is responsible for planning, managing and coordinating all the activities of the Council on behalf of the Board. She is responsible for managing all of the Council's resources and maintaining amicable relationships with Ministries, Donors, NGOs and CSOs

Kobe Smith

Youth Delegate

He is a member of the UNFPA – Youth Advisory Group and a Women Deliver Young Leader (Class of 2018). In 2017, Kobe was awarded the National Youth Award for his dedicated volunteer service in providing and promoting health education for adolescents in Guyana.

He was recently elected to serve as Youth Director on the Regional Board of the International Planned Parenthood Federation/Western Hemisphere Region (IPPF/WHR), and Alternate Youth Director on the Governing Council of the IPPF.

Kobe Smith is a youth advocate from Guyana. He is pursuing a Bachelor of Law degree at the University of Guyana, and works part-time at the Guyana Bank for Trade & Industry Limited. He has been involved in sexual and reproductive health and rights advocacy for more than five years. He is the Vice President of GRPA's Youth Advocacy Movement and has been integrally involved in outreach activities, advocacy campaigns and Comprehensive Sexuality Education for thousands of young people.

Tanzila Khan

Life-skills Trainer, Author, Activist

Tanzila has also been a public speaker and has spoken across 15 countries. Her day job is serving as Manager Entrepreneurship Development Program at Hashoo Foundation.

Tanzila Khan is a wheelchair user since birth from Lahore, Pakistan. She wrote her first book, 'A story of Mexico' when she was 16 and then went on to publish her second book, 'The Perfect Situation' later. She has sold her books to fund community projects in the fields of disability, women empowerment, education and environment. Her NGO Creative Alley trains and empowers the community through events and projects. She launched her company, Iwish to create sustainable solutions to achieve the SDGs which includes a mobile application, Girlythings that delivers sanitary products to women with disabilities.

Charles Mchacho Neema

Youth Delegate

Later he joined the Youth reporters program and helps manage different radio shows and public talks on youth issues especially on SRH, STDs, Family planning and economic empowerment.

When Charles was in form two, he joined the Young reporters Program, a program run by Mwanza Youth and Children Network, where children are trained on their rights, responsibilities and basic media skills. He stayed in the program for three years doing radio and TV shows on child rights, responsibilities, health issues particularly TB, HIV, Menstrual hygiene, breast feeding, and attended International conference on maternal health in South Africa.

**Paul Amany
Philippe
N'guessan**

Youth Delegate

Paul is an undergraduate student in Information and Communication Sciences at the University of Felix Houphouët Boigny in Abidjan. Shy yet ambitious, and committed to social cause, he is a young activist for family planning and comprehensive sexuality education.

Convinced of the importance of family planning and comprehensive sexuality education to fulfill the demographic dividend, he joined

the Action Movement of the Ivorian Youth Association for Family Well-Being and a national network of Youth Ambassadors for RH/FP in Cote d'Ivoire.

As early as during high-school, I contributed to the implementation of several actions, including the governmental program "Zéro grossesses à l'école" ("Zero pregnancies at school"). In addition, he participated in the Togolese MAJ camp in Lomé, in the 19th ICASA Conference in Abidjan, and in the European Union and African Union Summit in 2017.

Today, a young student and blogger, he is the Secretary General of MAJ/AIBEF's Chapter in Abidjan, and Communication Officer of the National Network of Youth Ambassadors for RH/FP in Cote d'Ivoire.

**Kate
Baye-Easton**

*Director
for Country
Coordinators
of the
International
Youth Alliance
for Family
Planning*

Catherine "Kate" Baye-Easton is a physician and public health professional with experience in clinical care, project management, research and advocacy. She serves as the Director for Country Coordinators of the International Youth Alliance for Family Planning which she co-founded alongside a group of dynamic young people during the International Conference on Family planning (ICFP) 2013. She is currently the co-chair of the ICFP International youth sub-committee.

Kate Baye-Easton completed her medical degree in Cameroon in 2013 where she carried out research on the knowledge, attitudes

and practice of the female condom. She is an MSPH graduate from JHSPH and was the Youth Coordinator and co-chair of the Youth Sub-Committee for the 2016 International Conference on Family Planning. Previously, she served as consultant for Pharmacie La Référence, the Quality Healthcare Unit of the SHEMA Foundation and Women in Alternative Action, WAA Cameroon which was the host of the 6th African Conference on Sexual Health and Rights. She has a strong passion for youth and women's issues, sexual and reproductive health advocacy and policy strategies.

**Tanaka
Chirombo**

Youth Delegate

Tanaka Chirombo is an HIV/AIDS Facilitator and Health Rights Activist currently working with Youth and Society (YAS), a human rights and governance watchdog with focus on youth and marginalized groups. His core work is to champion rights and freedoms of young people living with HIV (YPLHIV) and promote positive living.

He is also a co-founder and current chairperson of the National Association of Young People Living with HIV (Mzuzu Chapter). In addition, he is a 'Team Leader' of the Mzuzu central Hospital teen club, advocating for quality health services for YPLHIV and mobilizing YPLHIV for HIV services including treatment. He is also the SRHR program coordinator for Youth hub Malawi under SAT Malawi.

Tanaka started his debating venture in 2012 at Mzuzu International Academy and also went with the team in 2013 to represent the country at the Books Botswana debate championship where countries from southern Africa competed for the grand prize in debate and public speaking. He now practices debate with Luwingu secondary school.

**Alexandre
Edgard Murinzi**

Youth Delegate

Alexandre Edgard MURINZI is a 22-year-old medical student and peer educator. He holds a Rwandan Advanced level education certificate and is currently pursuing his bachelors' degree of clinical medicine and surgery at University of Rwanda.

He is a strong advocate for sexual and reproductive health, and family planning, and is currently the coordinator of "Video for Health

Education Initiative" project done by Inepu Health Organization. He involves young people in activities that help them to learn about their health especially by using multimedia platforms like videos, booklets, website, mobile-App and podcasts. In addition, he is an I.T enthusiast who was trained about web-design, video production, public speaking and project management.

He has been honored with awards on the national and international level from UNFPA, Commonwealth, Imbuto Foundation, JICA, OHCEA and TNHF for demonstrating innovation, writing and leadership skills. In 2013, he was given a second-place award in Africa by African Leadership Academy for providing exceptional ideas about the development of the continent on International Youth Day. He is also a leader in different associations and youth organizations including IYAFP-Rwanda where he serves as the strategic vision officer.

**Naveeni
Sharmila
Athanasious
Phillip (Naveen)**

Musician

Sharmila Athanasious Philip (Navz) is first and foremost a musician. A vocalist, rapper, lyricist and composer who is part of the Sri Lankan Tamil Diaspora in Canada. Having lived in Colombo, Montreal and now a resident of the vibrant city of Toronto, Navz is able to transition seamlessly between Tamil, French and English. Navz uses the power of music to communicate and resonate with her audience. Culture, language and authenticity emanate from her style of music to connect with a broad audience. Her music has reached across the world and has been recognized by many South Indian music composers. Her goal is to create thought provoking lyrics and to raise social awareness among young adults. In addition to her passion to write lyrics and create music, Navz is passionate about supporting organizations with a mission to end human trafficking.

**Baye Leinyuy
Bongla**

Youth Delegate

Baye Leinyuy Bongla is a medical doctor practicing in Cameroon. She is the Co-founder and Vice President of Youth Health International, a youth-led organization that works to address the major health challenges faced by women and young people. She works tirelessly to ensure that women and young people have full access to the information and services they need. She has 4 years of experience in research, youth communication, public speaking, advocacy and project management.

She has represented the voices of young people in many high-level meetings and has been highly involved in empowering other young people as youth advocates for Sexual and Reproductive Health and Rights in Cameroon. Her passion and enthusiasm for family planning fueled her development and management of three large grants: one YOUACCESS grant from Population Action International (PAI) and two FP2020 Rapid Response Mechanism grants from United Nations Foundation. As a result of her achievements and groundbreaking results, she was selected as one of the 2018 Women Deliver Young Leaders by Women Deliver.

Siobhonn Job

*Director of
Sustainability
and Fundraising,
IYAFP*

Siobhonn Job hails from Trinidad and Tobago. Her research in abortion led her to the SRHR arena and where every single day is awed by the commitment the family planning community demonstrates to advocating for women's rights, holding those in power accountable and challenging the status quo.

Amr Awad

*Senior Policy
Officer HRST
Youth Division,
African Union
Commission*

When Siobhonn is not working on abortion rights she is advocating for mental health and breaking the stigma surrounding mental health. Everyone deserves a safe space to share whatever is on their mind. She is working towards licensure as a clinical counsellor to create those spaces for the people that aren't fortunate to have them.

Amr Awad is the Senior Policy Officer in the Youth division in HRST department in the African Union Commission. He is a medical doctor who holds a master of epidemiology and population from the American University of Beirut. Amr has 14 years of experience in youth development area with particular focus on multisectoral development of youth issues. Before joining AUC, Amr worked as a research and evaluation consultant for different international agencies like UNFPA, WHO, Save the Children, Plan International, American Bar Association, Management Sciences for Health and ICFI. He also worked as M&E specialist staff with UNAIDS, UN WOMEN, USAID, and IPPF.

Jose "Oying" G. Rimon II

*Director and Senior Scientist of
the Bill & Melinda Gates Institute
for Population and Reproductive
Health, Johns Hopkins Bloomberg
School of Public Health*

Morning Side Events

ONSITE

07:00-08:25

From research to policy: current issues and advances in abortion research in sub-saharan Africa / De la recherche à la politique : sujets et avancées actuelles sur l'avortement en Afrique sub-saharienne (Ipas & Africa Population Health Research Center, Guttmacher Institute, Gynuity Health Projects, & Ibis Reproductive Health)

Research on abortion is critical to drive evidence-based advocacy and policies and inform service delivery improvements so all women are able to access safe, affordable, high-quality abortion care. Join colleagues who attended The 2016 Africa Regional Conference on Abortion: From Research to Policy in Addis Ababa—as well as others involved in abortion research—for networking and discussion. This interactive session will feature presentations on current topics in abortion research and facilitated small group discussion. Come to meet emerging and seasoned researchers and everyone in between! Event is open to all conference attendees (with prior registration). Breakfast, tea, and coffee will be provided.

Location: KCC AD12

Registration: Public - Registration required; email schwartzr@ipas.org

Primary & Partner(s) Organizations: Ipas with Africa Population Health Research Center, Guttmacher Institute, Gynuity Health Projects, and Ibis Reproductive Health

07:00-08:25

Improving reproductive health quality and rights: finding the connections between research, advocacy, and change / Améliorer les droits de santé sexuelle et reproductive : trouver le lien entre la recherche, le plaidoyer et le changement (PAI, Ibis, & PopCouncil)

Population Council, PAI and Ibis Reproductive Health will host a breakfast discussion on ensuring access to high-quality reproductive health services. The presenters will share their current work, evidence, and lessons learned, and identify key opportunities and strategies to improve the quality of reproductive health to ensure all people can access high-quality care and exercise their right to information, products, and services.

Location: KCC AD1

Registration: Public

Primary & Partner(s) Organizations: PAI with IBIS and Population Council

07:00-08:25

Exploring men's roles as partners and activists in supporting women's access to safe abortion / Explorer les rôles des hommes en tant que partenaires dans le soutien de l'accès des femmes à l'avortement (Promundo, Ipas, HDI-Rwanda, ICRW-India)

The side event will highlight new research and work from Promundo and Ipas, and their partners, on men's roles in women's abortion decision-making and in activism to promote access to safe abortion. Discussion will focus on research and activist efforts in Rwanda, research from India, as well as work with the police, bar and bench in Nigeria. Breakfast will be served for attendees.

Location: KCC AD10

Registration: Public

Primary & Partner(s) Organizations: Promundo with Ipas, Health Development Initiative-Rwanda, and ICRW India

07:00-08:25

Comprehensive Sexuality Education in Sub-Saharan Africa: Implementation, Effectiveness, and Opportunities / L'éducation complète à la sexualité en Afrique sub-saharienne : mise en oeuvre, efficacité et opportunités (APHRC & The Packard Foundation)

Comprehensive school-based sexuality education (CSE) has for long been recommended as an important tool for providing accurate information and skills and for supporting young people to achieve positive reproductive health outcomes. International debate and thinking on the issue have evolved rapidly over the past decade, as epitomized in the release, this year, of revised UN global guidance on CSE. The new global frame implies consequences for existing CSE policy and practice in individual SSA countries. Conversely, insights on-the-ground experiences of CSE programming in SSA contexts can further illuminate both regional and global debates on the issue. This side event will bring together researchers, program staff, donors, and advocates to (i) share findings from a set of in-depth case studies on challenges, opportunities and factors shaping CSE design and implementation fidelity, and (ii) with reference to the global guidance, discuss their implications for local practice, advocacy and research and international debates. A set of incisive presentations will (i) offer a brief overview of regional and sub-regional data on the context and need for CSE (ii) distil key elements of the new global CSE frame and evidence base, and (iii)

distil key findings - relating to the design, and the extent and drivers of implementation fidelity of present CSE programming in select countries. A subsequent moderated panel discussion will reflect on the perspectives presented; pinpoint implications for action, advocacy and further research to enhance CSE practice in SSA; and highlight emerging issues or angles to be considered in scientific and policy debates on CSE in Africa and globally.

Location: KCC AD1

Registration: Public

From ICFP to Women Deliver 2019 and beyond: the power of advocacy to drive progress in family planning / De l'ICFP à Women Deliver 2019 et au-delà : le pouvoir du plaidoyer pour promouvoir le progrès en planification familiale

The bedrock of gender equality is women's ability to decide on their own bodies and fertility. Today, groundbreaking advocacy efforts are helping increase access to family planning, and drive the gender equality agenda forward. This side event will highlight examples of family planning advocacy linked to the three different dimensions of Power - individual, structural, and the power of movements - reflecting the theme of the upcoming Women Deliver 2019 Conference. The conference, which is the world's largest conference on gender equality and the health and rights of girls and women, will bring together 6-7000 people in Vancouver, Canada in June 2019. The latter part of the event will provide an open forum to discuss how these topics and themes will be covered and expanded on at Women Deliver 2019, how we can work together to use the Conference as a pit stop and fueling station for advocacy on family planning and gender equality, and how advocates, family planning practitioners, and partners can engage in Women Deliver 2019 and make it their own.

2.1.01 **Access-to-Use: what we know about contraceptive supply dynamics that underlie use / De l'accès à l'utilisation: Ce que nous savons des dynamiques de l'offre contraceptive qui sous-tendent l'utilisation de la contraception**

TYPE: Preformed Panel

TRACK: Advances in monitoring and evaluation methods

LOCATION: AD1

CHAIR(S): J. Brian McKenna, Reproductive Health Supplies Coalition (RHSC)

Over the past five years, new facility survey data have come available that enable the tracking of contraceptive commodity availability over time and across multiple countries, providing trends data on method availability and service quality. When linked with population-based surveys, we gain further insights on how the availability affects contraceptive use. This session considers advances that have been made across two monitoring and evaluation survey programs: UNFPA Supplies Facility Surveys, a facility-based survey conducted in over 30 countries since 2013; and Performance Monitoring and Accountability 2020 (PMA2020), linked household and service delivery point surveys conducted in 11 countries across 47 rounds since 2013. Both surveys have improved availability of facility-level data in resource-poor settings, which has been lacking compared to population-based data. They encompass data across multiple countries in Africa, where in many instances there has been dramatic recent changes in contraceptive use. UNFPA Supplies Facility Surveys includes client exit interviews providing data on experiential quality, whereas PMA2020 survey design allows measuring population's access methods and its impact on use. Understanding the survey methodologies and recent trend data will improve data use by various stakeholders and facilitate identification of data and research gap in supply, access, quality, and use. In addition, country experience in conducting the two surveys and utilizing the data will provide further comparison and contrast of the methods and opportunity and challenges in using the data. The final panelist will present impact of current and past availability of a method on use of the method at the community level, using the linked household and facility surveys in PMA2020.

The session objectives are to:

- (1) provide an overview of new survey data that enable analyses of contraceptive supply dynamics and their relationship to use,
- (2) demonstrate how these data can be used to: monitor trends in contraceptive method availability, access, and quality; and evaluate the impact of access to methods on contraceptive use over time, and
- (3) compare and contrast two survey programs in Ethiopia.

Implications for policies, programs, research: This session will present data and analyses that reveal important supply-access-quality-use dynamics that can inform policies and programs in the countries of focus – and can be adapted in other countries for the benefit of policy leaders and program managers. It will also provide insights into new facility survey methodologies that can inform other survey research programs.

2.1.02 **Choice under any circumstances: Improving contraceptive use in humanitarian settings / Avoir le choix en toute circonstance : Améliorer l'utilisation de la contraception en situation de crise humanitaire**

TYPE: Preformed Panel

TRACK: Family planning and reproductive health in humanitarian settings

LOCATION: MH 2 (Includes French translation)

CHAIR(S): Sara Casey, RAISE Initiative, Heilbrunn Department of Population and Family Health, Mailman School of Public Health, Columbia University

Panel objectives

Evidence showing successful implementation of contraceptive services in humanitarian settings has been limited. The purpose of this panel is to demonstrate the successful implementation of contraceptive programs, including increasing utilization of long-acting and permanent methods (LAPM), in a variety of humanitarian settings and share strategies that contributed to this success.

Description:

The ten countries with the highest maternal mortality ratios in the world are affected by, or emerging from, war; these countries are also characterized by low contraceptive prevalence. Despite the inclusion of sexual and reproductive (SRH) services in the minimum standards of health care in humanitarian settings, access to SRH services is often compromised in war. Although evidence that demand for contraception exists in humanitarian settings, contraceptive services are rarely provided. Although a broad range of methods is an essential component of good contraceptive programming, LAPM are rarely provided in humanitarian settings.

CARE, International Rescue Committee (IRC) and Save the Children, in collaboration with the RAISE Initiative, support the provision of contraceptive services, including LAPM, in public-sector health facilities in humanitarian settings across Africa and Asia. Support includes competency-based training and supportive supervision of providers, ensuring supply of contraceptive methods and supplies and community mobilization activities.

Presenters will demonstrate that the provision of good quality contraceptive services, including LARC, is feasible in humanitarian settings, and that women will use them by sharing the results of contraceptive prevalence surveys in program areas in the Democratic Republic of the Congo (23%

modern method prevalence, 11% LAMP prevalence) and method mix program data from multiple countries showing over 50% use of LAMP. Presenters will then share programmatic strategies used to achieve these successful results including the integration of post-partum IUDs and ongoing clinical coaching of providers.

Research/program/policy implications

Making good quality contraceptive services available is challenging and requires sustained effort, funding and program adjustments. These programs demonstrate their success in providing services in humanitarian settings. Given true choice, when a range of methods was routinely available, women were able to choose the method that best served their needs, increasingly LARCs. The results contribute to the limited evidence on contraception in humanitarian settings, and demonstrate that even in remote and unstable settings, when good quality contraceptive services, with a choice of short-acting, long-acting and permanent methods, are in place, women will exercise their right to reproductive choice.

years), and 2.4% per year for South Asia (doubling every 29 years).

Cities are more unequal than rural areas. Most are struggling to keep pace with rapid population growth in terms of vital infrastructure. Roughly one in three urban residents in Asia and Africa lives in slums with limited access to basic services, including health and FP services, sanitation, clean water and education. While urban fertility has fallen in recent years, unmet need for modern contraception and unwanted fertility are high, and the rapid growth in the number of adolescents and other disadvantaged subgroups living in cities translates into enormous needs for targeted sexual and reproductive health services.

Implications: Universal access to high quality FP services should be an integral part of efforts aimed at building sustainable cities and economic prosperity for all, with implications for gender equity, women's economic empowerment and the demographic dividend. Reducing unwanted fertility also benefits maternal health and poverty alleviation, and the slower pace of urban growth will facilitate the achievement of other goals. However, to date, policy discussions on urban development and health, as well as on "sustainable cities" (SDG 11), generally neglect the important role of FP as an influence on various dimensions of urban life. Discussion will focus on the most vulnerable with limited access to FP/RH services: adolescents, recent migrants, and residents of urban slums.

2.1.03 Family planning, fertility and urban welfare in the rapidly growing cities of sub-Saharan Africa and South Asia: Policy implications / La planification familiale, la fécondité et le bien-être urbain dans les villes en forte croissance en Afrique subsaharienne et en Asie du Sud: Implications pour la politique

TYPE: Preformed Panel

TRACK: Urbanization and reproductive health

LOCATION: AD11 (Includes French translation)

CHAIR(S): Zeba Sathar, Population Council, Pakistan

Objectives: Through a moderated discussion led by the International Union for the Scientific Study of Population (IUSSP) with four leading experts in urban fertility and family planning (FP) issues, and interaction with the audience, this panel will address the pressing issues of FP, fertility and welfare in urban sub-Saharan Africa and South Asia.

Description: World population will grow by 2.4 billion between 2015 and 2050, an increase of close to one-third. Three-fourths of this increase will occur in sub-Saharan Africa and South Asia, regions that account for over 80% of the world population living in absolute poverty. Future population growth will occur almost entirely in urban areas, and the world urban population is projected to increase by two-thirds by 2050. While many new arrivals in the informal neighborhoods of cities are rural-urban migrants, much of this growth will be due to the larger number of births than deaths among urban residents. Sub-Saharan Africa and South Asia exhibit the highest rates of urban population growth, currently estimated at 3.8% per year for sub-Saharan Africa (doubling every 18

2.1.04 **Innovate to meet the SRH needs of women and girls: R&D progress and gaps to improve access to adopted and appropriate contraceptive products / Innover pour remplir les besoins de SSR des femmes et des filles: Progrès et lacunes de la R&D pour améliorer l'accès aux produits contraceptifs adoptés et appropriés**

TYPE: Preformed Panel

TRACK: Advances in contraceptive technology and contraceptive commodity security

LOCATION: AD7

CHAIR(S): Cecile Vernant, Deutsche Stiftung Weltbevölkerung (DSW)

There are **numerous and various forms of effective, and safe contraception** on the market today, and yet millions of women and men, mainly in low-and middle-income countries (LMICs), still have an **unmet need for family planning**. Accessibility of contraception methods does not only depend on their availability and affordability, but also, importantly, on their **suitability for the individual user** and their circumstances. For example, products might have to be self-administrable without the help of health workers. In some contexts, tools have to be discreet so they cannot require a daily routine, in other contexts, multipurpose tools are needed that can at the same time prevent disease and pregnancy. **New and improved tools** are thus critically needed to fill these gaps and enable women and men worldwide to access voluntary, quality contraception that suits their needs.

Contraceptive R&D, when targeted to vulnerable populations in LMICs who currently have an unmet need for family planning, **does not provide strong market incentives** for the private sector to invest. Alternative innovation models and public R&D funding are thus urgently needed to allow for contraceptive product **innovations to target underserved populations**. This will ensure that the **immense health and economic benefits** that contraceptives can bring, will leave no one behind, as promised by the 2030 Agenda.

This panel therefore brings together four **organisations who “innovate to meet the need”, moderated by an organisation that advocates for public health R&D funding to focus on neglected societal challenges.**

Objectives of the panel:

- Increase the audience's knowledge of latest developments in contraceptive innovation and cutting edge tools
- Discuss how such innovative tools could expand the acceptability, and thus voluntary use of contraception
- Discuss gaps in the current R&D efforts in particular the funding need for the cost-effectiveness and other benefits of the availability of suitable family planning methods for sustainable development

Research-/program- and policy- implications:

The research presented here will answer questions about the safety, appropriateness and effectiveness of different new products that are finding their way into SRH programmes

2.1.05 **Norm entrepreneurs - faith actors' role in family planning / Les entrepreneurs de normes : Le rôle des acteurs confessionnels dans la planification familiale**

TYPE: Preformed Panel

TRACK: Faith and family planning

LOCATION: AD9

CHAIR(S): Geertje Van Mensvoort, CORDAID

Objectives:

- Present recent normative change processes in family planning promoted by faith actors
- Investigate strategies applied and lessons learnt by faith actors
- Identify main drivers of normative change in family planning within faith actors
- Engage participants in reflection on future steps to promote change in family planning norms through faith organisations

Description:

The World Bank suggests that ‘fertility transitions may be better viewed as a norm-driven process than as the aggregate outcome of autonomous decisions’ (2015 World Development Report). Social norms are people's shared expectations and beliefs on how people should behave (ODI 2015). In particular, religious beliefs often affect individuals' behaviours which impact health, including age at marriage, family structure and roles and preventive health practices like strategies couples use to achieve their preferred family size. Furthermore, misinterpretation of religious teachings fosters harmful practices including child marriage and female genital mutilation.

As “norm entrepreneurs” faith actors are well-suited to leading the change of social norms in family planning. Passionate individuals, who are well connected or highly central to a faith organization, or who have high status can play a key role in catalysing normative change in family planning. In this panel, four norm entrepreneurs will describe processes of normative change they are promoting. They will describe main milestones, lessons and results and provide an outlook on future developments.

Recent developments within the Anglican Church comprise the Council of African Provinces of Africa's resolution to promote family planning coupled with practical actions in universities and dioceses. Supreme Council of Kenya Muslims has changed its interpretation of child spacing in Islam and has renewed its theological and scholarly ties with Al Azhar University-Cairo. Using its Faith for Life model, Christian Aid has enabled local faith groups to embrace maternal and child health and family planning in Isiolo and Narok counties, Kenya. In turn, Tearfund and Église du Christ au Congo champion positive masculinities, denounce intimate partner violence and promote family planning with institutionalization in mind.

Implications:

These are powerful examples promoting normative change in family planning from within faith organizations. Faith to Action Network encourages and supports such organizational transformations at all levels so that these interventions are applied widely. Family planning needs to be integrated into theology and pastoral care, institutional policies and practice, faith-run schools, universities and health facilities. Exposure to these new ideas and practices on family planning need to be discussed through formal and informal channels, including through places of worship and media.

TYPE: Preformed Panel

TRACK: Sexual and reproductive health and rights among adolescents and youth

LOCATION: Auditorium/Plenary Hall (Includes French translation)

CHAIR(S): Suzanne Ehlers, Population Action International

To achieve the collective goal of enabling 120 million more women and girls to use contraception by 2020, we need to start with young people. While many of the 50 countries that have made commitments to advance the goals of FP2020 included commitments to adolescents and youth, there has been less progress in advancing these adolescent- and youth-focused goals to improve family planning services and contraception access. Often, adolescents and youth, especially young women, have been marginalized in moving the FP agenda forward. PAI's YOUAccess fund supports youth-led organizations to advance FP policies, increase budget allocations for youth friendly health services, and strengthen organizational capacity. As part of YOUAccess, PAI has built partnerships with a variety of youth-led organizations, many of which led by empowered young women. This panel aims to highlight the work of three YOUAccess partners - all empowered young women. Yordanos Wolde from Talent Youth Association in Ethiopia is a member of the Ethiopian Youth Council for Higher Opportunities (ECHO), which is designed to develop young leaders in the areas of family planning, sexual reproductive health and global HIV and AIDS. She works with officials within the Ethiopian government to implement youth friendly health policies, ensuring that there is meaningful youth engagement. Vanessa Anyoti has been working with YWCA in Tanzania for several years. With support from her organization, she has become an effective advocate for youth SRHR. Most recently, she has worked with district level stakeholders to address gender inequality in two districts of Tanzania. Natasha Salifyanji Kaoma co-founded Copper Rose Zambia when she saw the lack of sanitary pads in her school. She has since become an advocate for adolescent and youth SRHR. Working at the community level, Natasha aims inform community members of the latest information on SRHR and encourage them to use their collective voice to change negative perceptions about youth SRHR. These three impressive young women are committed to improving SRHR outcomes for young people. They will share their successes and challenges in building their careers champions of SRHR as well as how to better support other young women to be the next generation of change-makers.

Quality and Rights: Inspiring Change and Celebrating Champions

Join us for an evening celebrating innovations and advances in research, policies and programs to ensure the right of every woman and girl to access quality reproductive health services.

The reception will feature photos and voices of advocates, clients and providers in the Democratic Republic of Congo, Ethiopia and India, as well as stories about their own experiences as reproductive health champions.

2.2.01 **Design strategies to improve SBC programs for family planning: what can we learn from segmentation? / Stratégies de conception pour améliorer les programmes de CCS planification familiale: que pouvons-nous apprendre de la segmentation?**

TYPE: Preformed Panel

TRACK: Demand generation and social and behavior change

LOCATION: AD4

CHAIR(S): Susan Igras, Institute for Reproductive Health, Georgetown University

As efforts to achieve Family Planning 2020 and the Sustainable Development Goals gain momentum, new research and program paradigms could provide useful approaches for women and men to meet their FP needs, and for policy and program implementers to address lagging FP uptake and growing unmet need in West Africa and elsewhere. Implementers, researchers, and policymakers are paying renewed attention to market segmentation to improve FP uptake (Patsika et al. 2009; USAID 2011; Winfrey 2013; Rimal et al. 2009; Camber Collective 2015). Market segmentation, or audience segmentation, has a long history in commercial marketing to guide investments in product promotional activities (Rimal and Adkins 2003; Slater 1996) and first entered the public health field in the 1970s (Kotler 1972) and gained momentum in the 1990s (Zimmerman et al. 1994; Broom and Dozier 1990). Most public health segmentation has used demographic, socio-economic, and/or psychographic characteristics, derived from cross-sectional survey designs. These derived typologies of FP users, though, have not improved program outcomes as they have not sufficiently predicted behavior (Rimal and Adkins 2003; Patsika et al. 2009; Camber Collective 2015). This panel focuses on several recent FP market segmentation efforts aiming to address such deficiencies – exploring a range of quantitative and qualitative approaches guided by different theoretical lenses to segment program audiences to improve family planning method uptake. The Camber Collective's (2017) survey work in Niger employs multidimensional segments incorporating behavioral and attitudinal factors, and offers promising segmentation approaches to improve understanding of potential FP users, and identify the most promising opportunities for program intervention. In Benin, Georgetown University's Institute for Reproductive Health's used a longitudinal cohort study (2015.2016) to investigate qualitatively the processes and mechanisms involved in FP behavior change among women and men, applying a social network lens to analyze social influences on FP use operating within and between social-ecological levels. Our findings question some traditional ideas about FP programming, which may target women and men solely based upon demographic or geographic factors. The two presentations set the stage for interactive work with the audience around how to practically integrate segmentation approaches into FP promotion and services, and more conceptually, how to shift prevalent paradigms to use new strategies for reaching those most likely to change or to work more precisely with socio-normative drivers of FP update will close the session.

2.2.02 **Understanding the reproductive desires and family planning needs of married adolescents and young women / Comprendre les désirs de procréation et les besoins de planification familiale des adolescentes et jeunes femmes mariées**

TYPE: Preformed Panel

TRACK: Fertility intention and family planning

LOCATION: AD9

CHAIR(S): Lakshmi Sundaram, Girls Not Brides

Objectives

This session aims to increase understanding and awareness of the reproductive desires of married adolescents and young women, as well as their ability to actualize those desires. Highlighting recent research from diverse settings in Africa and South Asia, the panelists will address not only these intentions, but also some of the barriers that married adolescents and young women face to accessing reproductive health services, including specific family planning methods, in line with their needs.

Description

While there is an increasing evidence base both on interventions that aim to prevent child marriage and to expand access by adolescents to sexual and reproductive health information and services, little is known about either the reproductive intentions of married adolescents and young people or their ability to act on those intentions. Bringing together new evidence from a longitudinal study in India (Young Lives) and from three implementing organizations working in Bangladesh, Niger, Pakistan, Tanzania, Burkina Faso, Zambia, and India (Population Council, CARE and Pathfinder), this session will advance our global understanding of the reproductive desires and needs of adolescents and young women, the barriers they face in accessing the information and services that can help them to achieve those desires, and potential solutions to overcoming those barriers.

Research/Program/Policy Implications

The latest data from UNICEF indicate that there are more than 650 million women alive today who were married as children, and that roughly 12 million more girls continue to marry before the age of 18 each year.[1] Girls who marry as children are more likely to be poor, out of school, and have less decision-making power than women who marry over the age of 18. They also tend to have higher fertility and maternal mortality rates, earlier age at first birth, and lower use of contraception later in life as compared to women who marry after 18.[2] Even as organizations and governments work to eliminate child marriage, it is thus critical for the FP/SRHR community to understand the reproductive intentions of married girls and young women, as well as the barriers they face in achieving them, so that interventions can be designed to most effectively meet their needs.

2.2.03 **The blossoming of implant use in Africa: how it happened and what lies ahead / Le bourgeonnement de l'utilisation de l'implant en Afrique: Comment est-ce arrivé et qu'est-ce qui nous attend ?**

TYPE: Preformed Panel

CHAIR(S): Marie Ba, Intrahealth/Ouagadougou Partnership Coordination Unit

Panel Objective: To highlight the marked uptake of contraceptive implants occurring in much of sub-Saharan Africa (SSA) among almost all sociodemographic categories. At the end of the session the audience will know how, where, and to what extent implants have broadened method choice, become highly popular, and been the main contributor to FP2020 gains achieved by at least 11 SSA countries.

Panel Description: The panel consists of interlinked presentations describing: 1) Key findings in our analyses of multiple PMA2020 and DHS surveys from 12 countries comprising 61% of sub-Saharan Africa's population (these findings highlight rapid, ongoing increases in implant use through March 2018 and will be continually updated through October 2018); 2) Quantitative and qualitative findings from implant service provision by Marie Stopes International and Population Services International in 16 SSA countries; 3) Public sector experience with task-shifting of implant provision to Community Health Extension Workers (CHEWs) in Ethiopia (presented by panel moderator); and, 4) Organizational perspectives from the Bill & Melinda Gates Foundation, a primary driver of our community's efforts to broaden FP access and choice. We will show how this most effective of all methods, which only had 1.1% prevalence of use in SSA as recently as 2011, has become the 1st or 2nd most widely-used method in 10 African countries, with gains in implant use alone exceeding combined gains in injectables, pill and IUD use. In countries as diverse as Burkina Faso and Ethiopia, Congo Democratic Republic and Ghana, Kenya and Senegal, implants now account for 1/4 to 1/2 of all modern method use. Substantially increased uptake has occurred among sexually-active unmarried women as well as married women, women of low and high parity, and among all ages, education levels, and wealth quintiles. Ample time will be devoted to audience dialogue regarding research, program, and policy aspects of this yet-unfolding, nearly-unprecedented FP success story.

Policy and Program Implications: Key policy and program factors addressed include marked price reductions, much-increased commodity supply, greater government commitment to FP, broadened WHO eligibility guidance, and wider adoption of high-impact service delivery approaches that increase access and better reach underserved populations. With continued program commitment and donor support, these trends in implant uptake are very likely to continue the next few years. This implies continuing need for the international FP community to maintain its focus on rights-based programming, ensuring reliable access to implant

removal as well as insertion services, and addressing issues of financing and sustainability.

2.2.04 **Unpacking the relationship between intimate partner violence and family planning: what we know and what we can do about it / Dévoiler la relation entre la violence intraconjugale et la planification familiale : Ce que nous savons et ce que nous pouvons faire**

TYPE: Preformed Panel

TRACK: Reproductive rights and gender empowerment

LOCATION: AD6

CHAIR(S): Gwyn Hainsworth, Bill & Melinda Gates Foundation

Objectives:

- Share results from a landscaping report on the relationship between intimate partner violence (IPV) and family planning (FP)
- Describe approaches and promising practices for integrated interventions addressing IPV and FP
- Share recommendations for advancing work on integrated IPV-FP interventions

Description: Research shows that IPV is a key barrier to meeting the FP intentions of women and men. A relationship between IPV and FP has been documented, but we know little of the underlying mechanisms driving this relationship, and as a result, effective approaches for integrated response[1]. Patriarchal notions of the roles of males and females and male control over women influence decisions for FP and acceptability and perpetration of IPV. As part of a landscaping to synthesize evidence on the relationship between IPV and FP, a variety of integrated IPV-FP intervention approaches were identified and categorized, ranging from social and behavior change, edutainment, economic empowerment, and service delivery. This panel will highlight several examples of promising approaches to integrated programming.

Research/Program/Policy Implications: Globally, groundbreaking research and programming related to IPV and FP are taking place. A better understanding of the mechanisms and processes that successfully address IPV, FP and the linkages between the two is critical to improve the lives of women and their families globally. Integrated IPV-FP programming offers an opportunity to achieve wider improvements in women's sexual and reproductive health in addition to preventing violence in the home.

2.2.05 **Local-global GFF advocacy & accountability for family planning: interventions that work / Le plaidoyer & la redevabilit  du GFF au niveau local-mondial pour la planification familiale: Les interventions qui fonctionnent**

TYPE: Preformed Panel

CHAIR(S): Susan Krenn, Johns Hopkins Center for Communication Programs

The Global Financing Facility in support of Every Woman Every Child (GFF) is mobilizing resources to close the funding gap to meet the Sustainable Development Goals, including achieving universal access to sexual and reproductive health-care and family planning. It is also a key potential source of financing in support of the global partnership Family Planning 2020. Civil society plays a key role advocating for prioritization of evidence-based family planning and reproductive health programs in country plans for GFF, and follow-up accountability. But what advocacy and accountability approaches and tools have been most effective in leveraging GFF funds for family planning and reproductive health? Who are the most important advocacy targets in GFF countries, and which champions can be mobilized to reach these decision-makers? How can civil society advocates for family planning effectively position themselves in coalition with partners across the continuum of care, and yield results in family planning? How does global advocacy bolster country-level advocacy and accountability?

This panel offers a unique insider perspective on coordinated GFF advocacy interventions that span across and within countries. The panel will start by: (1) Demonstrating the ways that a global civil society coalition coordinated research and advocacy interventions to impact a favorable policy environment for GFF engagement at the country level. The rest of the panel will show how the resulting policy framework for CSO engagement in GFF processes was used to facilitate effective advocacy and accountability at country level. Specifically, we will: (2) Make evident the powerful advocacy strategies that civil society has used to leverage GFF funds for family planning; and (2) Share the most effective accountability tools and approaches for monitoring GFF investments during implementation.

The information conveyed by the panelists is directly relevant for champions of family planning in a growing number of GFF countries. The facility is currently active in 26 countries including Rwanda, and aims to expand to a total of 50 countries with a new wave of funding in the next three years. All of these countries have unmet needs for family planning that could be impacted by increased levels of funding and prioritization of high impact interventions. Furthermore, the GFF is celebrated as a standard-bearer for new models of innovative financing. The interventions and approaches described in this panel have potential for application in other funding mechanisms and global processes including UHC 2030.

BAYER &

SYMPOSIUM

14 November 2018, 1.25–2.25 pm

Kigali Convention Center, Room: MH1

THIS LUNCH SYMPOSIUM, HOSTED BY BAYER AND 120 UNDER 40: THE NEW GENERATION OF FAMILY PLANNING LEADERS

Focuses on how youth are shaping the future of family planning and reproductive health.

- What are these young family planning champions doing that is innovative, and how is this different from what has been done in the past?
- How are these youth leaders influencing positive change in terms of culture, digital media, and health systems within their communities, countries, and globally?
- What role do the 120 under 40: The New Generation of Family Planning Leaders have in a vision for a future in which all need for family planning an reproductive health is met?

All youth speakers are 120 under 40 winners.

Chaired by Jose “Oying” Rimon

Director, Bill & Melinda Gates Institute for Population and Reproductive Health, Department of Population, Family and Reproductive Health, Johns Hopkins Bloomberg School of Public Health

Moderator Brian Mutebi

Executive Director, Education & Development Opportunity, Uganda

CHAIRMAN’S WELCOME AND INTRODUCTION

TABLE TOPIC LUNCH DISCUSSIONS

AD12 (13:25-14:25)

Held during lunch on Tuesday, 13 November, and Wednesday, 14 November, Topical Roundtables expand the coverage of topics during the conference and serve as opportunities for more intimate conversations about these topics. No sign-up is required to sit at a topical roundtable; seating is first-come, first-served.

Advocacy and accountability table topic lunch discussions / Table de discussion de déjeuner sur le plaidoyer et la redevabilité

Sessions - Timeblock 3

14:35 - 15:55

2.3.01 Case studies on adaptation of the training resource package for family planning / Études de cas sur l'adaptation du Paquet de ressources de formation pour la planification familiale

TYPE: Preformed Panel

TRACK: Expanding access to family planning

LOCATION: AD1

CHAIR(S): Mario Philip Festin, World Health Organization

In order to provide high-quality services, effective family planning (FP) programs require health workers who have up-to-date knowledge and skills in addition to positive attitudes. However, many developing countries have limited awareness and access to evidence-based training materials to develop knowledge and skills among FP health workers. The Training Resource Package for Family Planning (TRP) is an evidence-based training tool to be used alongside other current materials such as the Medical Eligibility Criteria for Contraceptive Use, 2015 and the Global Family Planning Handbook. The TRP contains curriculum, resources, and tools for a program to implement and evaluate FP training. It provides resources for trainers, supervisors, and program managers. USAID, in partnership with the World Health Organization (WHO), the United Nations Population Fund (UNFPA), and other stakeholders has supported the development and rollout of the TRP. The TRP has been implemented in several countries. In Afghanistan, the use of just one TRP module assisted in the updating of the national FP guidelines, in developing FP curricula for pre-service and in-service training, in adapting materials to the country's context, and in conducting competency-based training. In many instances, the process involved the adaptation of materials to align with national FP service delivery and training policies/guidelines, country-specific training curricula, and translations into local languages. The use of TRP materials may involve all the modules or just a subset depending on needs.

Panelists will share their experiences in the adaptation of the TRP for in-service and pre-service education in Tanzania, Uganda, and Afghanistan. The presentation will include results from a global review of implementation of the TRP. Specifically, the presentations will share the methodology and process of adaptation for pre-service education for nurses and midwives in Uganda and the adaptation of a singular TRP module for in-service training of FP providers in Afghanistan. Further, the presentations will share the results of an assessment on the perspectives of stakeholders during the dissemination and promotion of the TRP. The presentation will include the frequency and timeliness of updates of the TRP materials to ensure the materials reflect new guidance, such as Medical Eligibility Criteria, and the process for updating TRP materials.

Presentations will the various ways that the TRP has been adapted and used. Lessons learned will strengthen the promotion of the TRP and enhance its the usability in more countries and among different training contexts.

– Updates on the Family Planning Training Resource Package

CO-AUTHOR(S): Dr. Mario Philip Festin Dr, World Health Organization

2.3.02 Decision-making and power dynamics among couples and the implications for contraceptive uptake / La prise de décision et les dynamiques de pouvoir chez les couples, et leurs implications pour l'adoption de la contraception

TYPE: Preformed Panel

TRACK: Men and family planning

LOCATION: AD9

CHAIR(S): Gwyn Hainsworth, Bill & Melinda Gates Foundation

Objectives: The objective of this panel is to share evidence on how power differentials within couples and decision-making processes influence contraceptive use.

Description: There is increased interest in understanding how couple dynamics, especially women's level of influence in the decision-making process, relate to increased contraceptive use, choice, and self-efficacy to fulfill one's reproductive goals. In many low and middle-income countries, men often have major influence in important decisions in the family, including reproduction, family size and contraceptive use. Women's ability to control her fertility can strongly be affected by social constructs of gender role, expectations and gender inequalities.

In this panel, we bring you evidence from four countries—Niger, the DRC, Nigeria and India. The presentation from Niger focuses on a novel method of measuring the relative influence of decision-making related to family planning among married adolescent girls. Qualitative data from the DRC dives deeper into the various factors that impact post-partum family planning uptake, noting how those factors differentially influence married young women versus unmarried young women's uptake. Data from Nigeria offers a nuanced measurement of how couples make decisions, while the data from India shares that greater decision-making power is associated with ever use of contraceptive. Three of the four projects fall under the Women and Girls at the Center of Development (WGCD) investment by the Gates Foundation.

Research/program/policy implications: Ensuring women's voice, choice and power in the decision-making process will support their rights to meet their own reproductive goals, a key objective of FP2020. Deeply embedded social norms related to gender roles lead to unmet need for family planning. By understanding how decision-making power is associated with contraceptive use, implementers can tailor programming to promote joint decision-making related to the negotiation of fertility intentions and family planning use, especially in contexts where unequal gender norms limit girls' agency to negotiate their reproductive desires. Programming should be designed strategically to recognize and promote the importance of couple communication and men's roles and influence about decisions around family size and the use of family planning. Findings can inform the design of gender-synchronized interventions which improve couple decision-making and increase male support for family planning, when and where it makes sense to do so.

2.3.03 **Implementation of sexuality education: lessons learned from diverse country contexts / Mettre en oeuvre l'éducation à la sexualité : Leçons tirées de contextes de divers pays**

TYPE: Performed Panel

TRACK: Sexual and reproductive health and rights among adolescents and youth

LOCATION: Poolside Lounge at Radisson Blu

CHAIR(S): Marina Plesons, World Health Organization

Objectives

To share country experiences of scaling up and sustaining sexuality education by building community support and dealing effectively with resistance in diverse contexts.

Description

Despite recognition of the need for sexuality education and growing acceptance that sexuality education is a right; availability of evidence of effectiveness and cost effectiveness; availability of tools to advocate, plan, monitor, and evaluate programs; and inclusion of sexuality education in regional/national commitments and plans of action, progress at implementation of sexuality education in high, middle and low income countries alike has been slow.

Across settings, a common challenge is moving from small-scale projects or weakly designed and executed programs with poor quality and limited coverage to large-scale, well-designed and well-conducted programs coordinated by Ministries of Education and included in national school education policies and frameworks. This transition faces barriers at multiple levels related to: comfort, commitment, capacity, cash, and accountability. Additionally, programs face the challenge of preventing paralysis due to backlash during implementation and reviving progress if they become stalled by resistance.

Program/policy implications

A small number of countries, such as Pakistan, India, Nigeria, and Argentina, have scaled-up and sustained sexuality education, and can provide insights into effective strategies and investments. These recommendations include placing sexuality education on the national agenda, planning the scale-up of sexuality education from the start, managing the scale-up of sexuality education effectively and efficiently, building support while anticipating and addressing opposition, promoting and safeguarding sustainability, and understanding potential barriers at different levels.

2.3.04 **Implications for expanding the use of MII in quality measurement**

TYPE: Performed Panel

TRACK: Improving quality of care

LOCATION: AD6

CHAIR(S): Ben Bellows, Population Council

The Method Information Index (MII) is calculated from contraceptive users' responses to questions regarding counseling content: whether they were informed about other methods, method-specific side effects, and what to do if they experienced side effects. MII is increasingly reported in facility and household surveys and used to track country performance in the global FP2020 initiative, but little is known about its properties and its predictive capability in contraceptive outcomes.

This panel presents evidence on the integrity of the index with inclusion of additional items, whether MII is predictive of contraceptive discontinuation, what it means to ask MII at facility exit versus households, and the policy and programmatic implications of linking MII to financial incentives in performance-based financing programs.

By end of the panel, participants will be able:

- to identify the key items in the MII and supplemental dimensions
- to describe the differences in interpretation of quality when using MII data from different sources
- to examine whether the MII score is related to contraceptive outcomes, specifically discontinuation
- to isolate the policy and programmatic challenges and opportunities in linking MII to performance incentives in RBF programs

This panel addresses several major research priorities, including: 1) probing the reliability and construct validity of the index; 2) testing the predictive capabilities of MII with respect to users' contraceptive outcomes; and 3) presenting results from a test that expands the explanatory power of the index. Findings indicate that data collected from exit interviews are not comparable to those collected from retrospective population surveys. However, the collection of MII data via exit interviews is efficient, free from recall bias, and predictive of contraceptive discontinuation. The reason for differences between client provided and directly observed information on the provider-client interaction and the aspects of facility quality for which MII can serve as a proxy need to be further understood as programs consider methods of data collection. There are several policy implications as well. MII is already a key indicator in the global FP2020 Track20 initiative, and routinely collected in DHS surveys. It has the potential to inform program management and resource allocations. In results-based financing (RBF) programs and FP strategic purchasing initiatives, linking MII to financial rewards may have unintended consequences of affecting how quality is reported. The MII has the possibility of being a universal indicator of FP quality, but differences between national and facility level assessments pose challenges for the FP2020 initiative.

- **Do women with a higher MII score have lower contraceptive discontinuation rates?**

2.3.05 **La délégation des tâches pour la planification familiale en Afrique de l'Ouest francophone : une histoire inachevée / Task-sharing for Family Planning in Francophone West Africa: An Incomplete History**

TYPE: Preformed Panel

TRACK: Policy, financing, and accountability

LOCATION: MH 1 (Includes French translation)

CHAIR(S): Pape Gaye, IntraHealth International

Panel Objectives: Dans les nombreuses régions du monde la délégation des tâches dans la prestation de services de planification familiale (PF) est devenue routinière. Pendant plusieurs années, il n'est resté que l'Afrique de l'Ouest francophone (AOF) à adopter une stratégie de délégation des tâches. Depuis longtemps cette région a été distinguée par une fertilité haute, une médicalisation forte de la PF et une résistance culturelle forte à la contraception moderne. Cette région a aussi des déficits remarquables de ressources humaines de la santé. L'objectif principal de cette discussion est de suivre le voyage continu en AOF de la promesse à la politique, à la pratique et à la prévalence (TPC) en ce qui concerne la délégation des tâches aux prestataires de première ligne (et dans certains cas aux femmes elles-mêmes).

Description : Dans 4 présentations interdépendantes des principaux acteurs en AOF représentant deux points de vue régionaux et deux points de vue nationaux. Les panélistes présenteront la logique, les actions politiques, les facteurs de mise en œuvre, et les financements nécessaires pour que la délégation des tâches de PF devienne une réalité dans la région. Cela inclut la fourniture des implants par les agents de première ligne (les accoucheuses brevetées/auxiliaires/aides-soignants) ; la fourniture des produits injectables par les agents de santé communautaires ; et la fourniture à domicile et l'auto-injection de Sayana Press. La résolution récente de l'Assemblée des Ministres de la Santé de la Communauté Economique des Etats de l'Afrique de l'Ouest (CEDEAO) sur la délégation des tâches de PF aux cadres de niveau le plus bas du système de santé devrait contribuer à servir plus de

2.3.16 **Weighing HIV risks and contraceptive benefits: The ECHO trial in context / Peser les risques du VIH et les bénéfices de la contraception : Le test ECHO en contexte**

TYPE: Preformed Panel

TRACK: Improving quality of care

LOCATION: MH 2 (Includes French translation)

CHAIR(S): Beth Fredrick, Gates Institute for Population and Reproductive Health, Johns Hopkins Bloomberg School of Public Health

What is the most up-to-date evidence on hormonal contraception and HIV acquisition? What can governments, donors, and civil society do to anticipate the ECHO trial results? What can be done to improve family planning and HIV counseling and services?

This panel provides an overview of the ongoing randomized control trial called ECHO, which is evaluating use of DMPA injections, the copper IUD, and the Jadelle contraceptive

implant and women's HIV risk. It focuses on World Health Organization and the U.S. Agency for International Development strategies to help countries understand, anticipate, and plan for ECHO trial results in 2019. It will also help advocates, health providers, and women themselves view evidence from the ECHO trial in the context of the larger needs for access to a broader choice of contraceptive methods as well as quality family planning and HIV counseling and services.

2.3.17 **The power of advocacy partnerships and strengthening policy implementation in Africa / Le pouvoir des partenariats en plaidoyer et du renforcement de la mise en oeuvre de politiques en Afrique**

TYPE: Flash (Speed round)

TRACK: Policy, financing, and accountability

LOCATION: AD12 (Includes French translation)

The experience of the D.R. Congo in coordinating and mobilizing domestic resources for Family Planning (FP)

Date: November 14, 2018

Time: 19:30 – 20:30

Place: Lemigo Hotel, BURERA HALL
KG 624 St, Kigali-Rwanda

This presentation showcases the role of partnership and coordination in mobilizing resources to reduce funding gaps and improve the availability of family planning services in the DRC. Join this discussion with members of the central and provincial government, donors and implementing partners.

The event will also emphasize the importance of dialogue among government officials and other stakeholders in mobilizing the private sector to engage in family planning in the DRC.

"We must begin work immediately to rein in demographic growth by putting in place a bold family planning policy that will allow us to accelerate progress toward the demographic dividend in the medium term for integrated growth in our country."

Extract from the State of the Nation Address by the Health of State on July 18, 2018

Sessions - Timeblock 4

16:20 - 17:40

2.4.01 From commitment to action: FP2020 countries share their successes in policy, financing and equity / De l'engagement à l'action : Les pays de l'initiative FP2020 partagent leurs succès en politique, financement et équité

TYPE: Preformed Panel

TRACK: Policy, financing, and accountability

LOCATION: MH 1 (Includes French translation)

CHAIR(S): Eva Ros, Family Planning 2020 (FP2020)

Panel Objectives:

This FP2020-sponsored panel will highlight examples of success stories of countries that have moved from commitment to action.

Panel Description:

As we close in on 2020 and look ahead to attaining the Sustainable Development Goals by 2030, family planning remains at the top of the global agenda as a best-buy in global development.

The Family Planning 2020 movement and all its partners continue to build on the momentum of the 2017 Family Planning Summit in London, where policymakers, donors, and advocates gathered to recommit to the partnership and discuss our collective efforts to reach the goals set in 2012 and since.

Countries are at the heart of the FP2020 partnership and this panel will feature four diverse countries' success stories that converge around the shared question - how do countries move from commitment to action and ultimately, progress towards their FP2020 goals?

These success stories will focus on improving the enabling environment for women and girls to access FP and RH services - by renewing a law, expanding financing for universal health coverage and closing the equity gap in age and wealth quintiles.

Implications:

This panel will provide the family planning and SRHR community with key examples of how countries are moving from commitment to action. For other countries in attendance, it will serve as a learning opportunity of what is driving progress towards FP2020 goals as we all continue towards that shared goal set in 2012 and renewed in 2017.

- **Madagascar's renewed law - creating a favorable environment for family planning**
CO-AUTHOR(S): Dr. Haingonirina Eulalie Ramananjahary Dr., Ministry of Public Health
- **Indonesia's investment for family planning to reach universal health coverage**

CO-AUTHOR(S): Dr. Felix Sayinzoga SF/ Medical Doctor, Ministry of Health/Rwanda Biomedical Center

2.4.02 Les maires s'engagent : TCI-Afrique de l'Ouest Francophone (AOF) aide à mobiliser et augmenter la capacité des collectivités locales en leadership en matière de planification familiale/santé de la reproduction des populations urbaines pauvres / Mayors' Commitments: TCI-FWA (Francophone West Africa) helps mobilize and increase the leadership skills of local governments in family planning/reproductive health for the urban poor

TYPE: Preformed Panel

TRACK: Urbanization and reproductive health

LOCATION: AD4

CHAIR(S): Laura Hoemeke, IntraHealth International

Comment augmenter l'engagement des communautés à promouvoir et à adopter la planification familiale ? Il faut commencer avec les leaders locaux, c'est-à-dire les maires. Dans ce panel, les leaders communautaires représentant des collectivités locales du Bénin et du Burkina Faso, le responsable finances TCI, et des représentants de l'Association Internationale des Maires Francophones partageront leurs expériences en matière de santé de la reproduction et de la planification familiale (SR/PF) dans le contexte du projet The Challenge Initiative (TCI). TCI est un projet financé par la Fondation Bill & Melinda Gates. En Afrique de l'Ouest francophone (AOF) auprès des populations urbaines pauvres dans les neuf pays du Partenariat de Ouagadougou (PO), le TCI vise à offrir un appui technique et financier aux autorités locales pour la conception et la mise en œuvre des initiatives PF locales (dans l'atteinte des objectifs définis dans les plans d'action nationaux PF budgétisés). Les projets de développement parfois visent à servir la population locale sans considération du rôle des maires et d'autres leaders locaux. Le TCI se base fortement sur les leaders locaux et les ressources existantes et encourage les villes à créer dans leurs plans communaux de développement des lignes budgétaires pour la PF. Les maires ont le droit et la responsabilité de considérer et de partager avec la population l'intérêt à adopter la PF. Les maires ont également la responsabilité à mobiliser les ressources (financières et autres) pour compléter les ressources externes des projets. Ce panel démontre l'approche efficace de TCI en renforçant les capacités des autorités locales. Il s'agit d'une présentation du projet TCI-AOF (comment les autorités locales reçoivent les actions de coaching/plaidoyer de la plateforme TCI-AOF, les intérêts que cela a suscité pour eux, et les dynamiques qu'ils ont développées afin de capter des ressources locales pour leurs différentes villes) ; une présentations des leaders locaux qui feront la lumière sur comment eux-mêmes sont devenus des ambassadeurs de la PF (et de TCI) au point de faire le coaching et d'inspirer d'autres villes à leur emboîter les pas ; la manière dont le coaching continu de la plateforme TCI-AOF contribue au renforcement des capacités des villes dans la gestion efficace et efficiente des ressources des collectivités locales d'une façon générale et des projets de façon particulière ; et l'approche TCI-AOF en collaboration étroite avec l'Association Internationale des Maires Francophones.

- **In Search of Concordance: A Comparison of Matched Health Facility Data from the Kenya Health Information System and PMA Agile for 3 Counties**
CO-AUTHOR(S): Dr. Peter Gichangi Ph.D., International Center for Reproductive Health

2.4.03 **Measurement innovations for improved monitoring of family planning outcomes / Mesurer les innovations pour un meilleur suivi des résultats de planification familiale**

TYPE: Preformed Panel

TRACK: Advances in monitoring and evaluation methods

LOCATION: AD11 (Includes French translation)

CHAIR(S): Amy Tsui, Johns Hopkins Bloomberg School of Public Health

The objectives of this panel are two-fold: 1) to share measurement innovations with phone follow-up approaches and use of GPS coordinates to construct synthetic respondent panels and for spatial gridded plot sampling, and 2) to examine concordance between matched health facilities and respondents reporting on family planning indicators to a health information system and in sample surveys. The four presentations represent measurement and monitoring advances from studies in Burkina Faso, Kenya, Nigeria and Uganda. A phone follow-up with 3,252 females who consented to a PMA2020 survey in Burkina Faso resulted in 55% completion and tested two call approaches, one computer-assisted telephone interviews (CATI) and the other interactive voice response (IVR) with higher interview acceptance and completion rates found in the (randomized) CATI arm.

Matching algorithms were applied to GPS coordinates from 4 PMA survey rounds in Uganda to construct a synthetic cohort of cases interviewed two or more times. Their responses in the first and second matched rounds were examined for change in FP practice and need. In the state of Kaduna, Nigeria, GPS-referenced polygons were constructed to overlap with 60 survey cluster boundaries and extant demographic databases that provide estimated population sizes for these polygons were accessed. The population estimates from one of two databases more closely corresponded with survey-based population estimates for the clusters. In Kenya data from a sample survey of FP performance indicators for 620 facilities in three counties were compared with 432 matched facilities reporting into the HIS and concordance analyses carried out. These four monitoring innovations provide promising results on expanding data collection approaches and lessons on data quality improvements. As a set, they offer the opportunity to expand national and subnational monitoring capabilities in terms of content, frequency and coverage, as an alternative and complement large-scale surveys. With increased ownership of mobile phones, call centers can obtain longitudinal data from consenting clients and geo-referenced locations offer new means for sampling communities with known probability. HIS data offer a routine source for monitoring FP utilization but are incomplete and often of unknown quality and coverage. This panel is aimed at building the foundation for improved data measurement and quality in low-resource settings with low-cost solutions.

CO-AUTHOR(S): Dr. Elizabeth Omoluabi PhD, CRERD

2.4.04 **Women's self-care in sexual and reproductive health: new options, new evidence / Les soins auto-administrés des femmes en matière de santé sexuelle et reproductive : Nouvelles options, nouvelles données de recherche**

TYPE: Preformed Panel

TRACK: Reproductive rights and gender empowerment

LOCATION: MH 2 (Includes French translation)

CHAIR(S): Martha Brady, PATH

Objectives:

- Describe Self-Care construct and examine women's ability and right to self-assess and manage their sexual and reproductive health needs, with a focus on recent evidence on tools and practices that make SRH self-care possible.
- Review international norms and guidelines around sexual and reproductive rights, and task sharing that establishes a strong foundation for self-care and empowerment of women throughout their SRH life course.
- Highlight new information on SRH products and practices that enable autonomy and self-care.

Description: Women have practiced self-care for their sexual and reproductive health (SRH) for millennia. Today, self-care has become more sophisticated and data-driven, and research has demonstrated that when people are active participants in their own health care, adherence to medication and treatment regimens improves. Evidence from NCDs (i.e. diabetes and hypertension) and HIV and HPV self-testing, have demonstrated the feasibility and necessity of self-care approaches; applying this lens to women's management of fertility is instructive. Efforts to facilitate user autonomy and peer support have the potential to advance sexual and reproductive health and rights. Encouraging self-care where and when appropriate can make health care products and practices more accessible; reinforce internationally agreed upon reproductive rights and self-determination; and help alleviate human resource shortages in health systems by using evidence-based and promising practices. Exciting new developments in contraception and medical abortion—including a growing body of evidence for practices such as contraceptive self-injection, pericoital ("on-demand") use of oral contraception, and home-based medical abortion—provide an opportunity to refocus attention on this important and evolving approach to improving the health and well-being of women and girls and to empowering them to achieve their SRH intentions.

Research/program/policy implications: Panelists will highlight strategies that program designers, implementers, product developers, and policymakers can deploy to support women's autonomy and self-care in managing their reproductive health including:

- Raising awareness of the importance of women's autonomy in reproductive health decision-making and management of their fertility.
- Identifying and documenting the array of self-care products and practices across health areas.
- Building the evidence base to strengthen the design and acceptance of self-care practices by women, providers, and health systems.

- **Women Mobile Lifeline Channel a key stimulant of FP use and continuation in resource constrained settings success story of Health Child.**
PRESENTER: Mr. Franco Gabala Mr, Health Child
- **Turning on the Power of Digital for Family Planning**
PRESENTER: Ms. Alice Payne Merritt MPH, Johns Hopkins Center for Communication Programs
CO-AUTHOR(S): Ms. Dinar Pandan Sari, Johns Hopkins Center for Communication Programs; Mr. Robert Ainslie, John Hopkins Center for Communication Programs

SESSIONS - TIME BLOCK 4 16:20 - 17:40

2.4.11 **Quality improvement in family planning / Améliorer la qualité de la planification familiale**

TYPE: Oral

TRACK: Improving quality of care

LOCATION: Auditorium Club 2

CHAIR(S): Mervyn Christian, Johns Hopkins Bloomberg School of Public Health

- **Introducing and scaling up a quality improvement collaborative for community-based family planning: a process evaluation of a health system-wide improvement network in Uganda**
PRESENTER: Mr. Ramadhan Kirunda, Fhi 360
CO-AUTHOR(S): Ms. Leigh Wynne, FHI360; Ms. Christine Kim, Gillings School of Global Public Health, University of North Carolina at Chapel Hill; Mr. Frederick Mubiru MSC, Fhi 360; Ms. Nilufar Rakhmanova, FHI 360
- **Early Lessons from implementing the Clinical Safety checklist for female sterilization in 5 States of India**
PRESENTER: Dr. Geeta Chhibber Dr, Jhpiego
CO-AUTHOR(S): Dr. Ashish Srivastava MD, Jhpiego; Mr. Arpit Nagar, Jhpiego; Dr. Vivek Yadav MD, MPH, Jhpiego; Dr. Bulbul Sood Dr., Jhpiego
- **Can mobile outreach teams safely deliver long-acting reversible contraception and permanent methods in rural and peri-urban areas: a prospective cohort study from Tanzania**
PRESENTER: Dr. Jeremiah Makula MD, MPH, Marie Stopes International, Tanzania
CO-AUTHOR(S): Ms. Mengi Ntinginya, Marie Stopes Tanzania; Mr. John Guzek, Independent Consultant; Ms. Anna Mackay, Marie Stopes International; Mr. Tesfaye Mesele, Marie Stopes International Ethiopia; Dr. Kathryn Church Dr. , Marie Stopes International
- **Improving Client Service Experience and Satisfaction Through E-System Based Support Supervision –the Hnqj Story.**
PRESENTER: Dr. Moses Odot modot, Population services International

2.4.12 **Community-based approaches / Approches à base communautaire**

TYPE: Flash (Speed round)

TRACK: Expanding access to family planning

LOCATION: MH 3 (Includes French translation)

CHAIR(S): Grace James Harelimana, Medical Students Association of Rwanda / MEDSAR; **CHAIR(S):** Lucy Wilson, Independent

- **Expanding the provider pool for LARC and Abortion care services by engaging preservice institutions. The experience of Ipas Ethiopia, (January 2015 – December 2016)**
PRESENTER: Dr. Demeke Birru MD, MPH, Ipas
CO-AUTHOR(S): Mr. Alemayehu Molla BSc, MPH, Ipas
- **Strengthening the evidence of lay health worker provision of injectable contraception: A randomized controlled trial in Pakistan**
PRESENTER: Dr. Dawn Chin Quee PhD, MPH, Fhi 360
CO-AUTHOR(S): Dr. Sarah Saleem, Aga Khan University ; Dr. Farina Abrejo, Aga Khan University; Ms. Sayyeda Reza, Aga Khan University; Dr. Zaheer Habib, Aga Khan University
- **Task-Sharing through Blended Learning Strategy to Increase Access to Long-Acting Reversible Contraceptives and Postabortion Care in Conflict Settings**
PRESENTER: Dr. Ribka Amsalu, Save the Children
CO-AUTHOR(S): Ms. Virginie Jouanicot, Save the Children

- **Safety, Quality and Acceptability of Task sharing Contraceptive Implants to Community Health Extension Workers: A Non-inferiority Quasi-experimental Study in Kaduna and Ondo States, Nigeria.**
PRESENTER: Dr. Anne Taiwo, Marie Stopes International, Nigeria
CO-AUTHOR(S): Mr. Erik Munroe, Marie Stopes International; Dr. Megan Douthwaite, Independent Consultant; Mr. Olalere Alabi, Marie Stopes International Nigeria; Dr. Kingsley Odogwu, Marie Stopes Int' Organization, Nigeria; Mr. Lucky Palmer, marie Stopes Int' Organization, Nigeria; Dr. Anthony Uko-Udo, Federal Ministry of Health Nigeria; Mr. Effiom Effiom Mr, Marie Stopes International, Nigeria; Ms. Kate Reiss, London School of Hygiene and Tropical Medicine and Marie Stopes International; Mrs. Ebere Ubah, Mariestopes International organisation Nigeria; Mr. Onoriode Ezire, Marie Stopes International Organisation Nigeria; Dr George Eluwa, Population Council; Mr. Justin Fenty, Independent Consultant; Dr. Moazzam Ali MD, MPH, PhD, World Health Organization; Dr. Kathryn Church Dr. , Marie Stopes International
- **Best practices are influencing policy change for lady health workers for Task shifting in Pakistan: A Case study**
PRESENTER: Dr. Haris Ahmed MPH, FRSPH, Aman Health Care Services
CO-AUTHOR(S): Mr. Umair Aslam Moon, Aman Healthcare Services; Mr. Ehsanullah Jatoi, Aman Foundation
- **Assessment of a pilot project to introduce community-based provision of injectables in Benin**
PRESENTER: Ms. Tishina Okegbe PhD, MPP, Fhi 360
CO-AUTHOR(S): Dr. Faustine Onikpo MD, MPH, MCDI; Mrs. Karen Katz MPA, MSc, Fhi 360; Assonga Jean Affo, APC/John Snow, Inc.
- **Provision of injectable contraceptives (DMPA) by community health workers in Sub-Saharan Africa: A systematic review of safety, acceptability and effectiveness.**
PRESENTER: Dr. Eric Besong Dr, Cameroon's Ministry of Public Health
- **Household and facility-level findings from Sustainability of NURHI program activities**
PRESENTER: Dr. Ilene Speizer, University of North Carolina at Chapel Hill
CO-AUTHOR(S): Ms. Lisa Calhoun, Carolina Population Center

2.4.13 **Understanding, influencing, and shifting contraceptive method mix / Comprendre, influencer et transformer la distribution des méthodes contraceptives**

TYPE: Oral

TRACK: Expanding access to family planning

LOCATION: Auditorium Club 3 (Includes French translation)

CHAIR(S): Peter Gichangi, International Centre for Reproductive Health - Kenya

- **Understanding influences on family planning method mix in Burkina Faso/ Comprendre les influences sur la mélange des méthodes de planification familiale choisies au Burkina Faso**
PRESENTER: Mr. Firmin Nakoulma Monsieur, Marie Stopes International, Burkina Faso
CO-AUTHOR(S): Ms. Georgina Page Ms, Marie Stopes International; Dr. Heidi Brown Dr., Marie Stopes International, Burkina Faso

- **Impact of Removing Injectables from the Contraceptive Method Mix: An interactive model**
PRESENTER: Ms. Elena Lebetkin MPH, Fhi 360
CO-AUTHOR(S): Dr. Doug Taylor, FHI360; Dr. Markus Steiner, FHI360; Ms. Xiaoming Gao, Fhi 360; Dr. Kavita Nanda MD, MHS, FACOG, Fhi 360; Dr. Laneta Dorflinger Dr. , Fhi 360; Dr. Abdulmumin Saad, USAID/Office of Population and Reproductive Health
- **Shifting the Family Planning Method Mix Needle in Zambia - The Sexual and Reproductive Health for All Initiative (SARAI)**
PRESENTER: Dr. Namwinga Chintu, Society for Family Health Zambia
CO-AUTHOR(S): Mr. Felix Tembo, Society for Family Health; Mr. John Phiri, Society for Family Health; Mrs. Doris Ngosa Mwape public health, Society for Family Health; Mrs. Gertrude Silungwe, Society for Family Health; Mr. George Kateteye, Society for Family Health; Mrs. Loyce Munthali MPH, USAID-Zambia; Mr. Masauso Nqumayo, Society for Family Health; Ms. Gina M. Smith MPH, Population Services International/Society for Family Health
- **Comparative Study in Contraceptive Method Mix in Asian Countries with high and low fertility**
PRESENTER: Ms. Aditi Kundu Miss, Jawaharlal Nehru University
CO-AUTHOR(S): Dr. Bhaswati Das, Jawaharlal Nehru University

2.4.14 **Improving availability of male and female sterilization safely and effectively / Améliorer la disponibilité de la stérilisation féminine et masculine de manière sûre et efficace**

TYPE: Oral

TRACK: Expanding access to family planning

LOCATION: AD5

CHAIR(S): Moses Muwonge, Samasha Medical Foundation

- **Evidence-Based Vasectomy Surgical Techniques: From Research to Practice**
PRESENTER: Dr. Michel Labrecque MD PhD, Université Laval
- **Tubal ligation by minilaparotomy provided in outreach and at hospital: increased access and service provision of family planning permanent methods in Rwanda**
PRESENTER: Dr Ndicunguye Victor Dr, Jhpiego/MCSP
- **Safety of tubal occlusion by minilaparotomy provided by trained clinical officers versus assistant medical officers: a noninferiority randomized controlled trial in Tanzania**
PRESENTER: Dr. Ominde Achola MBCHB; MMed. Obs/Gyne, EngenderHealth
CO-AUTHOR(S): Dr. Mark Barone, EngenderHealth; Zuhura Mbuguni, Ministry of Health and Social Welfare; Dr. Annette Almeida-ndayanga MD, MPH, ENGENDERHEALTH; Dr. Carmela Cordero, Engenderhealth; Mr. Joseph Kanama, EngenderHealth Inc; Ms. Adriana Marquina, EngenderHealth; Dr. Projectine Muganyizi, Muhimbili University of Health and Allied Sciences; Mrs. Jamilla Mwanga, EngenderHealth; Mr. Daniel Ouma, EngenderHealth; Ms. Caitlin Shannon MPH, JD, EngenderHealth; Dr. Leopold Tibyehabwa, EngenderHealth
- **Family Planning Services Utilization and Its Associated Factors Among Women with Disabilities**
PRESENTER: Mr. Solomon Atnafu MPH, Family Guidance Association of Ethiopia (FGAE)

2.4.15 **Family planning, postabortion care, and maternal and child health / La planification familiale, les soins post-avortement, et la santé maternelle et infantile**

TYPE: Flash (Speed round)

TRACK: Integration of family planning into health and development programs

LOCATION: AD12 (Includes French translation)

CHAIR(S): Aisha Salihu Waziri, Nigerian Urban Reproductive Health Organisation; **CHAIR(S):** Sarah Shaw, Marie Stopes International

- **Do Maternal Care Contacts Improve Postpartum family planning? Evidence from a longitudinal cohort study in SNNPR, Ethiopia**
PRESENTER: Dr. Linnea Zimmerman PhD, MPH, Bloomberg School of Public Health, Johns Hopkins University
CO-AUTHOR(S): Dr. Saifuddin Ahmed, Johns Hopkins University; Mr. Mahari Yihdego MPH, PMA2020 Ethiopia; Mr. Solomon Abreha, PMA2020 Ethiopia
- **Examining influence of integration of family planning and maternal health services on postpartum family planning use in India: Evidence from National Family Health Survey 2014-15**
PRESENTER: Mr. Ujjaval Srivastava Mr., Department of Statistics, Banaras Hindu University
CO-AUTHOR(S): Mr. K. K. Singh PROFESSOR, Banaras Hindu University; Ms. Anjali Singh, Banaras Hindu University
- **Are family planning, essential drugs and equipment stockouts less prevalent in facilities offering integrated family planning and maternal health services?**
PRESENTER: Dr. Andreea Creanga Andreea Creanga, Johns Hopkins University
CO-AUTHOR(S): Ms. Mary Thiongo, International Centre for Reproductive Health Kenya; Dr. Saifuddin Ahmed, Johns Hopkins University; Dr. Amy Tsui PhD, Bill & Melinda Gates Institute for Population and Reproductive Health Johns Hopkins Bloomberg School of Public Health
- **Integration of Family Planning into Comprehensive Abortion Care; lessons learnt from Closing the Gap project in South West Kenya Authors:, Faith Mbehero¹, George Kapiyo², Josephat Nyamwaya,³Amon Rufus⁴.**
PRESENTER: Ms. Pamela Onyango, Planned Parenthood Global
CO-AUTHOR(S): Ms. Faith Mbehero BScN, MScN, Planned Parenthood Global
- **Women's experiences and perspectives on postabortion care and postabortion family planning at public facilities in Dakar, Senegal.**
PRESENTER: Dr. Mohamed Diadhiou Dr, CEFORP
CO-AUTHOR(S): Mr. Colin Baynes, EngenderHealth; Mr. Thierno Dieng, CEFORP
- **Optimisation De L'offre De Service En Sante Sexuelle Reproductive/planification Familiale Chez Les Femmes Seropositives Agees De 25-49ans : Experiences D'action Contre Le Sida (acs) a Lome(togo).**

-
- 6.123 **Discussion of side effects of contraceptives in Zimbabwe**
PRESENTER: Ms. Linda Bomboka MPH, University of South Florida
CO-AUTHOR(S): Dr. Takudzwa Sayi, University of South Florida; Dr. Jennifer Marshall, University of South Florida

PUTTING YOUTH VOICES AT THE FOREFRONT

Developing new ways to fund SRHR is critical to meet the challenges faced by young people to access comprehensive and respectful sexual and reproductive healthcare.

AmplifyChange supports sustainable outcomes that adopt rights-based approaches to SRHR and is finding new ways to select grants, evolving how grant-makers can be more approachable to applicants.

The AmplifyChange @ICFP2018 Opportunity grant encourages youth leadership in advocacy for young people's access to sexual and reproductive health services and information, including family planning. Youth-led, Southern-based organisations will pitch their ideas live in front of a panel of SRHR expert judges during the final day of the Youth Pre-Conference for the chance to win an AmplifyChange @ICFP2018 Opportunity grant.

WE ARE SPONSORING:

MON **12** NOV

YOUTH PRE-CONFERENCE

Up to 5 grants of EUR 20,000

Monday November 12, 2018

9:30AM - 11:00AM in MH2, 3, 4

.....
COME AND VOTE FOR OUR FINALISTS!

WEDS **14** NOV

FPITCH FEST

Chance to bid for 1 grant of EUR 40,000

Wednesday November 14, 2018

5:45PM - 7:00PM in the auditorium

FPITCHFEST

AUDITORIUM/PLENARY HALL (17:45–19:00)

Join us to determine and **FUND** the next **BIG** idea in Family Planning and Reproductive Health! The 2018 ICFP FPitchfest brings together 10 CEOs from around the globe in family planning and reproductive health to pitch live **THE** idea they believe will be transformative for the family planning community. Each participant will have **ONE** slide and 3 minutes to tell us something that we don't know now which will change the game in reproductive health and family planning within the next 5 years — a technological breakthrough, creative approach, new area of programming, contraceptive innovation, new way of measuring progress, or a change in environmental conditions, etc.

The audience will vote live for their favorite pitch and prizes will be awarded. Immediately following the CEO round, there will be a battle for additional grant funding between the top two AmplifyChange@ICFP youth grantees who were awarded 20,000 Euros for their projects pitched at the ICFP Youth Pre-conference. Once again, the audience will vote live to determine who goes home with even **MORE** money to support their big family planning idea! Come cheer on your favorite FPitchfest participant and help determine who will take home the win!

Karl Hofmann

*President/CEO,
Population
Services
International*

Karl Hofmann is the President and CEO of PSI (Population Services International), a non-profit global health organization. PSI operates in over 50 countries worldwide, with programs in family planning and reproductive health, malaria, water and sanitation, HIV, and non-communicable diseases.

PSI works in partnership with local governments, ministries of health and local organizations to create health solutions that are built to last.

Prior to joining PSI, Mr. Hofmann was a career American diplomat for 23 years. He served as U.S. Ambassador to the Republic of Togo, Executive Secretary of the Department of State, and Deputy Chief of Mission (senior career diplomat) at the U.S. Embassy in Paris, France. He also served on President Clinton's National Security council staff.

Mr. Hofmann is Vice Chair of the U.S. Global Leadership Coalition, a Director of the TB Alliance, a member of the American Academy of Diplomacy, and President of the TB Alliance's Stakeholder Association. He is a graduate of Georgetown University and the National Defense University.

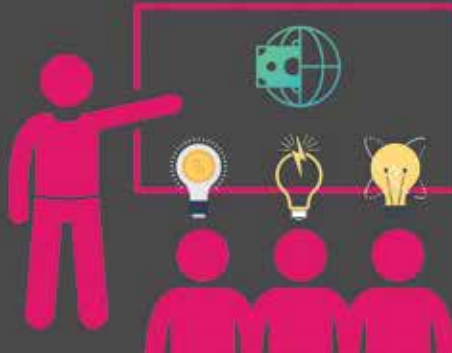

Toyin Saraki

*President,
Wellbeing Africa
Foundation*

As Founder-President of The Wellbeing Foundation Africa (WBFA), Mrs Toyin Saraki is a Nigerian advocate for women's and children's health and empowerment, with two decades of advocacy covering reproductive, maternal, newborn, child and adolescent health; ending gender-based discrimination and violence; and improving education, socio-economic empowerment, and community livelihoods in sub-Saharan Africa.

Mrs. Saraki is the inaugural Global Goodwill Ambassador for the International Confederation of Midwives (ICM); special adviser to the Independent Advisory Group (IAG) of the World Health Organization's (WHO) Regional Office for Africa (AFRO), was named by Devex as UHC Global Champion, is the Save the Children Newborn Health Champion for Nigeria; and is a Global Champion for the White Ribbon Alliance for Safe Motherhood. She is also the Wife of the President of the Senate of the Federal Republic of Nigeria.

Kigali Convention Centre
5:45 - 7:00 PM

Simon Cooke

CEO, Marie Stopes International

Simon Cooke joined Marie Stopes International as CEO in 2013 with more than 25 years' experience in international management, and extensive field experience in Latin America, Eastern Europe, Asia, the Middle East and Africa.

He is a veteran of the consumer goods industry, having spent 15 years with Procter & Gamble and eight years with Reckitt Benckiser, where he was General Manager for

Middle East and North Africa until 2012, based in Dubai. Subsequently, he was CEO of an Indian-owned, private equity backed industrial company, Super-Max, also based in Dubai.

His vision is to merge best practices from the private sector, including financial metrics, with successful approaches from the international development sector to deliver better value for donors and stakeholders, better accountability and governance, and most importantly, more sustainable delivery of Marie Stopes International's mission: children by choice, not chance.

Jacqueline Lampe

CEO, RNW Media

Jacqueline Lampe is the Chief Executive Officer of RNW Media, based in Hilversum, The Netherlands. Prior to joining RNW Media Jacqueline was Chief Executive Officer of Amref Flying Doctors, also in The Netherlands. Earlier in her career, Jacqueline held diverse general management functions, among others, with VNU Business Publications in Italy. Jacqueline has a passion for innovation and strategic thinking. She

has brought that passion to all her roles. She launched new, successful products in the publishing sector and disruptive public health initiatives in international development, and she transformed a public radio broadcasting company into an accelerator for digital communities around the world.

Isaiah, Owolabi

Project Director and Co-Founder, HACEY's Health Initiative

Isaiah Owolabi has over 8 years of experience working to implement and advocate for development initiatives focused on sexual and reproductive health, and maternal health and incorporating business models for such interventions. He is the Executive Project Director and co-founder of HACEY's Health Initiative in Nigeria, a nongovernmental organization supporting and empowering vulnerable people in Africa to lead healthy and productive lives. He is also a

co-founder of the International Youth Alliance for Family Planning (IYAFFP).

Isaiah holds a Bachelor of Science in Human Physiology and obtained a certificate in Civil Society Board Governance from the USAID and MSH funded Leadership, Management and Governance program. He is a One Young World Ambassador, Alumnus of the United States Consulate Carrington Youth Fellowship Initiative, Young Investigator Award winner for his presentation on Oral contraceptive at the International Union of Physiological Science Congress in Kyoto, Japan, and a 2012 winner for the Commonwealth Youth Award for excellence in development.

Stephanie Kimou

Founder, PopWorks Africa

Stephanie Kimou is the founder and principle consultant for PopWorks Africa. She is an international development professional responsible for successful communications and advocacy programs related to sexual and reproductive health and rights. With a background in youth and gender, she has extensive in-country experience in francophone Africa, particularly with building and advising advocacy strategies, infusing meaningful youth engagement into development agendas, and building relationships and partnerships with governmental agencies and INGOs for sustainable and locally rooted development solutions.

Pape Gaye is a native of Senegal and a lifelong advocate for family planning, the health workforce, and access to health care for all.

As president and CEO of IntraHealth International, he has helped make human resources for health—and the health workforce's role in the Sustainable Development Goals—a crucial part of the worldwide conversation on global health.

Pape Gaye

*President/CEO,
IntraHealth
International*

Gaye frequently speaks internationally on issues related to capacity-building and the global health workforce. In the United States, his testimony on Capitol Hill during a 2014 Ebola-focused congressional hearing brought the role of frontline health workers to the fore. As a panelist during the White House Global Summit in July 2016, he urged the incoming US president to focus on international aid and human resources for health as powerful investments in our shared future.

Gaye began his career with the US Peace Corps and went on to work with the 1984 Los Angeles Olympic Committee and the US Centers for Disease Control and Prevention. Now he draws on three decades of leadership in international health and development as he oversees work in 40+ countries to strengthen their health workforces and health systems.

Gaye holds a master's degree in business administration from the University of California at Los Angeles.

Shahjahan is the founder Director and CEO of Bangladesh Center for Communication Programs (BCCP) established in 1996 as the successor to the Bangladesh country office of the Johns Hopkins Bloomberg School of Public Health Center for Communication Programs (JHU.CCP). He has more than 26 years of experience in the field of strategic communication including developing communication strategy; planning, designing and implementation of large scale campaigns; community mobilization intervention; management and monitoring of programs; evaluation, etc. He

Mohammad Shahjahan

*Founder
Director
and CEO of
Bangladesh
Center for
Communication
Programs
(BCCP)*

also has extensive experience in developing training curriculum, communication materials and capacity building workshops. Previously, Shahjahan acted as the Deputy Country Representative of JHU.CCP Bangladesh Program. Shahjahan has a Masters degree in Economics and a Bachelor degree in Law.

Elizabeth Omoluabi

*Executive
Director of
the Centre
for Research,
Evaluation
Resources and
Development in
Nigeria*

Dr. Elizabeth Omoluabi is the Executive Director of CRERD, Principal Investigator of the Performance Monitoring and Accountability Project in Nigeria and Senior Lecturer at the University of the Western Cape, South Africa. Liz is known for producing high quality research work under challenging resource conditions. She mentors young people and has published several articles and book chapters on African population in French and English.

An accomplished demographer and international consultant with over 30 years of research management experience in Africa and Europe, Elizabeth is well grounded in both NGO and private sector research and consulting.

She has directed the international monitoring missions of the Nigeria Population and Housing Census (2004-2009), the Sudan Census (2008) and the Ghana Population and Housing Census (2010). From 2009 to 2013, she was the Managing Director of Ecorys Africa Research and Consulting, a subsidiary of Ecorys Netherlands, before setting up her own research company, Akena Associates. Liz obtained her PhD in 1995 from the Sorbonne's Institut de Demographie de l'Universite de Paris (IDUP).

Julia Bunting

*President,
Population
Council*

Julia Bunting became the ninth president of the Population Council in March 2015. Taking inspiration from 65 years of groundbreaking ideas, Ms. Bunting is committed to ensuring the Population Council's evidence drives impact for current and future generations.

Prior to joining the Population Council, Ms. Bunting was most widely known for her path-breaking work on reproductive and maternal

health during her 12-year tenure at the UK Department for International Development. Ms. Bunting was a lead catalyst of the 2012 London Summit on Family Planning, where more than 20 developing-country governments made commitments, and donors pledged an additional \$2.6 billion, to enable an additional 120 million girls and women to have access to voluntary family planning by 2020. Ms. Bunting remains closely involved in this work as a member of the FP2020 Reference Group.

Ms. Bunting earned a BA (Hons) in Human Science from St Catherine's College, Oxford, and an MSc in Medical Demography from the London School of Hygiene and Tropical Medicine at the University of London.

AWARD PRESENTER:

Cynthia Minkovitz

Department Chair, Population, Family, & Reproductive Health, Johns Hopkins Bloomberg School of Public Health

Dr. Minkovitz is the William H. Gates, Sr. Professor and Chair in the Department of Population, Family and Reproductive Health at Johns Hopkins Bloomberg School of Public Health. She also is Professor of Pediatrics at Johns Hopkins School of Medicine. Her research focuses on enhancing the quality of preventive services and understanding how policies and programs impact the well-being of children and families. She has been involved in multiple large scale program evaluations including Healthy Steps for Young Children, the Dyson Community Pediatrics Training Initiative, New Jersey Project LAUNCH and systems implementation grants

for children and youth with special health care needs in Maryland. Dr. Minkovitz serves on the leadership team for the Home Visiting Applied Research Collaborative and has directed efforts to develop a framework to promote coordination in the early childhood system and an initiative to enhance the use of evidence in maternal and child health programs. She has served on the Board of the Academic Pediatric Association and on the National Advisory Council for Nemours Health and Prevention Services. Dr. Minkovitz has led early career scholars programs focused on preventive services, perinatal health, and home visiting. She is the recipient of Advising, Mentoring, and Teaching Awards at Johns Hopkins and the Academic Pediatric Association Research Award.

FPITCHFEST EMCEE:

Beth Fredrick

Executive Director, Advance Family Planning

Beth Fredrick is the Executive Director of the Advance Family Planning (AFP) advocacy initiative of The Bill & Melinda Gates Institute for Population and Reproductive Health, Johns Hopkins Bloomberg School of Public Health. She is also a Senior Associate with the Department of Population, Family and Reproductive Health and co-director of the Center for Public Health Advocacy. She has worked with the Johns Hopkins University

Center for Communications Programs, the International Women’s Health Coalition, and the Guttmacher Institute. She was a Bell Fellow at Harvard University and adjunct faculty with New York University’s Robert F. Wagner Graduate School of Public Service. She serves on the board of EMpower, a grant-making organization focusing on youth programs in emerging markets and is the former board chair of Ibis Reproductive Health.

PRESENTER:

Rolla Khadduri

Fund Director, AmplifyChange

Worked with AmplifyChange from the initial launch of the Fund in 2014. Currently oversees all programme delivery and strategy. A public health specialist who has worked on SRHR and women’s rights issues over the last 15 years. Worked at the London School of Hygiene and Tropical Medicine, and then with Save the Children in Pakistan and Afghanistan running community-based reproductive and maternal health programmes. Holds a Master’s degree from the Harvard School of Public Health.

WOMEN DELIVER 2019 CONFERENCE

- Become a Sponsor
- Or simply join the 6,000+ changemakers onsite for an unforgettable experience

**MORE INFO
AT WD2019.ORG**

Evening Side Events

ONSITE

18:30-20:00

People and our planet: harnessing innovative partnerships across generations / Les peuples et notre planète : exploiter des partenariats innovants entre générations (PRB, JSI, CCP, Pop Council)

This event will raise awareness of how Population, Environment and Development (PED) can contribute to attaining the SDGs, as well as enhance equity for last mile communities, in alignment with FP2020 goals. The event will inform ICFP attendees about the value of including family planning and reproductive health in other development sectors in holistic ways.

Location: KCC MH3

Registration: Public

Primary & Partner(s) Organizations: Population Reference Bureau with John Snow Inc., Johns Hopkins Center for Communication Programs, and Population Council.

19:00-20:30

Solutions from the adolescent frontline / Solutions tirées du vécu des adolescents (MSI)

In 2017 Marie Stopes International doubled the number of adolescents we served. Join Carole Sekimpi (Country Director, Uganda) and Caroline Nambeye (Teen Connector, Zambia) to talk about how they successfully integrated adolescent programming and advocacy into their country programmes. Moderated by our new Chair of the Board, Suzanna Taverne. Drinks and refreshments will be served, and all are welcome.

Location: KCC Auditorium Club

Registration: Public - Please register here, www.surveymonkey.co.uk/r/837GC6D

19:00-20:30

World Vasectomy Day 2018 Celebration / Célébration de la Journée mondiale de la Vasectomie 2018

Join us as we mark the conclusion of the day-long World Vasectomy Day celebration, the largest-ever male-oriented family planning event. The event will recap the day's live-stream across 60 countries; feature live vasectomies; and include presentations from master trainer Dr. Michel Labrecque, WVD 2017 host and DKT Mexico Country Director Ana Karina De la Vega Millor, Co-Founders Jonathan Stack and Dr. Doug Stein, and representatives from local partners. Come learn how this movement can help your program proactively and

productively engage men as agents of change in gender equality and family planning. We will also announce the host country for World Vasectomy Day 2019.

Location: KCC AD1

Registration: Public

Primary & Partner(s) Organizations: World Vasectomy Day with DKT International and No-Scalpel Vasectomy International

19:00-20:30

Courageous programming for underserved youth / Les programmes courageux pour les jeunes défavorisés (Pathfinder International)

We must invest in our young people, now. There is no time to lose. But young people are incredibly diverse and our work must respond accordingly. While we have made a great deal of progress, many still do not access the information and services they need. So what is holding us back? In this interactive side event we will explore the ways in which segmentation can help us to understand the diverse demographic dimensions of our clients. We will consider ways in which segmentation can inform deliberate programming to drive voluntary demand for sexual and reproductive health and rights services from specific youth populations. And we will learn from examples of where courageous programming has targeted the needs of specific youth demographics, reflecting on where we have succeeded as well as where challenges remain.

Location: KCC AD12

Registration: Public

19:00-21:00

The A, B, C, and DMPA-SC of expanding contraceptive access and options / Le A, B et C de DMPA-SC et l'expansion de l'accès et des options de contraception (PATH & CIFF)

A wide range of contraceptive options—especially those that put the power of protection in women's hands—can help each woman find the product and approach that works best at different stages of her life. DMPA-SC (brand name Sayana® Press) is an all-in-one contraceptive that is putting women in charge of their reproductive health. During this event you will have the opportunity to speak directly with global and national family planning experts from multiple countries working to accelerate women's quality access to the three-month subcutaneous injectable contraceptive as well as other products. Country experts will share recent lessons learned from managing pilot and national introductions, describing how expanded options are reaching women through public, private, and community-based delivery—including self-injection. You will also

have a chance to hear a dynamic moderated discussion on the importance of enhancing the choice and rights of women and girls everywhere by ensuring their access to sexual and reproductive health innovations and quality care.

Location: KCC MH2

Registration: Public - Please email FPoptions@path.org to register

19:00-21:00

From improv to empathy: exploring and enhancing provider behaviors / De l'amélioration à l'empathie : explorer et rendre meilleurs les comportements des prestataires (JHUCCP Breakthrough ACTION)

Should women without any children use family planning? What about unmarried adolescents? Sometimes family planning providers bring their own attitudes and perspectives on who should access family planning into the counseling room with clients. As a consequence, their behavior can motivate or deter potential users of contraception during critical decision-making moments. Common approaches to counseling quality improvement often rely on trainings focused on regulations and guidelines but these can have limited effect in addressing underlying values and norms. During this interactive, lighthearted session, participants will get a firsthand look at, and a chance to try, successful approaches to improving provider behavior, including mobile-based video skits, role-play and values clarification exercises. Participants will have the opportunity to discuss their perspectives on the challenge of addressing provider attitudes and share reflections on these alternative approaches that can help improve rights-based counseling.

Location: KCC Blu Lounge

Registration: Public - Please register at: www.eventbrite.com/e/from-improv-to-empathy-exploring-and-enhancing-provider-behaviors-registration-48664564021

About dRPC

The development Research and Projects Centre (dRPC) is an intermediary non-profit organization with a mission to build the institutional and technical capacity of indigenous civil society organization to engage government to meet the needs of the vulnerable and excluded in society. Our vision is a sustainable model of development build around social capital and the human element in development, hence the small 'd' in dRPC.

Vision

To be the leading indigenous organization working to strengthen and support the development of civil society organizations to engage government agencies around public interest and social good issues in Nigeria.

Mission

To build civil society capacity and social capital for participatory development through indigenous models of training, mentoring, leadership development and systems strengthening.

The Centre works mainly in public health and girls' education with expertise in the areas of:

- Policy and legislative advocacy
- Research, monitoring and evaluation
- Sub-granting and financial management strengthening for CSOs
- Organizational capacity building for CSOs
- Leadership development training

Small area estimation - advances in measurement of family planning indicators / Estimation de petites régions : avancées des mesures des indicateurs de la planification familiale

Advanced data analysis should play a central role in informing programs, policies and family planning interventions, but it can only do so if the data, methodology and results are properly communicated, widely disseminated and understood by target audiences. Therefore, the panel will invite the agencies and research institutes that are currently playing active roles in the SAE for family planning to discuss their existing approaches. The expert panel will include case study presentations showcasing a mix of innovative approaches to inform advocacy, policymaking, and practical country- and local-led efforts to use available research and evidence as drivers of change in the arena of family planning. Each case study will walk the audience through the data, methodologies, results, accuracy and the plans of duplication/roll out. Presentations will summarize what worked and what could have worked better in each case. The panel will also provide opportunities for an interactive discussion with the audience.

CELEBRATING RESPONSIBLE MEN!

14.NOV.2018

THURSDAY, 15 NOVEMBER

THURSDAY, 15 NOVEMBER

THURSDAY PLENARY

People, Partners, and Programs: Bending the Curve for FP2020 Progress

AUDITORIUM/PLENARY HALL (8:30-10:00)

Over the past six years, FP2020 has been a collaborative partnership where governments, donors, civil society, advocates, multilateral institutions, the private sector, faith leaders and others have worked together to empower millions more women and girls to access modern, rights-based family planning. Now, with 2020 in sight, the partnership is evolving: identifying shared goals and aligning institutional energies, leveraging the benefits that emerge when we pool our strengths.

This plenary, moderated by Beth Schlachter, Executive Director of Family Planning 2020 (FP2020), will feature FP2020 Reference Group members and other partners who will highlight promising interventions and approaches, and look ahead to where the sector will go. We will view rights-based family planning (RBFP) interventions and approaches through the eyes of individual women and girls alongside country leaders, programs, and commitment-makers. The first part of the plenary will bring these rights-based programs to life, with remarks from Burkina Faso Minister of Health Dr. Nicolas Meda, Mr. Quazi A.K.M. Mohiul Islam, Bangladesh Additional Secretary for Population, Family Welfare, and Law, youth leaders Manasa Vasudevan of the YP Foundation and Dr. Andrew Millan, Executive Director of Youth Health International, and Halima Shariff, Director of Advance Family Planning, Tanzania.

The second half of the plenary will bring together leaders from across the global health system through the lens of Universal Health Coverage and highlight the importance of family planning in reaching the Sustainable Development Goals. Featuring Dr. Ian Askew, Director of the Department of Reproductive Health and Research at the World Health Organization, Minister of State Anupriya Patel, Ministry of Health and Family Welfare for the Government of India, Mitchell Warren, Executive Director, AVAC, Rajat Khosla, Senior Human Rights Officer, UN OHCHR, and Edna Adan, Director and Founder of the Edna Adan Maternity Hospital (invited), the discussion will focus on important concepts spanning innovation, human rights, integration, and investments for rights-based family planning.

The plenary will close with respondent Minister of Health Dr. Isaac Adewole from Nigeria, who will share his perspectives on the impact of these approaches and interventions for one of the fastest growing countries in the world.

Beth Schlacter
Executive
Director, FP2020

As Executive Director of FP2020, Beth Schlacter works to monitor and report on global and country progress in meeting FP2020 goals. Beth provides strategic leadership and oversight of FP2020's Working Groups, coordinating and supporting technical and administrative support for Working Group strategies and activities. She also manages the strategic use of the Rapid Response Mechanism to ensure the funding is optimally effective in achieving its purpose.

Beth joined FP2020 in 2014 with more than 15 years of experience as a career foreign affairs officer working for the U.S. government in multilateral and bilateral contexts. Beth served most recently as the Senior Population Policy Advisor in the Bureau of Population, Refugees, and Migration (PRM) at the U.S. Department of State where she was the Population Policy Team Lead responsible for defining and guiding U.S. priorities in multilateral organizations on issues related to sexual and reproductive health and rights, as well as U.S. international population policy. In this capacity she coordinated the U.S. government's participation in the global twenty-year review of the International Conference on Population and Development (ICPD), and served as a lead negotiating delegate at various sessions of the UN Commission on Population and Development (CPD) and the UN Commission on the Status of Women (CSW). Beth has a Master of Arts degree from Boston University and a Bachelor of Arts degree from the University of California at Irvine.

Quazi A.K.M. Mohiul Islam
Additional
Secretary
(Population,
Family Welfare
And Law) Of The
Mefwd, Mohfw,
Bangladesh

Mr. Quazi A.K.M. Mohiul Islam, joined in Bangladesh Civil Service in 1989. He is currently working as an Additional Secretary in Medical Education and Family Welfare Division (MEFWD) under the Ministry of Health and Family Welfare, Bangladesh. He is working with policy making, implementation and monitoring activities, pertaining to population development, family welfare etc.

Mr. Mohiul liaise among the Directorates and Institutes under MEFWD, NGOs, INGOs and relevant International organizations and stake holders for eventual achievement of the targets of SDGs in Bangladesh.

Isaac Folorunso Adewole

Minister of
Health, Nigeria

Isaac Folorunso Adewole FAS is a professor of gynaecology and obstetrics. Since November 2015 he has been the Minister of Health in the Cabinet of President Muhammadu Buhari.

He is a former vice-chancellor of the University of Ibadan and president of the African Organisation for Research and Training in Cancer. Prior to his appointment as the 11th substantive vice-chancellor of the university, he served as provost at the College of Medicine, University of Ibadan. His research interest is in the area of human papillomavirus, HIV, and gynecologic oncology, a specialized field of medicine that focuses on cancers of the female reproductive system.

Adewole is a member of the governing council of Adeleke University and chairs the National Panel on Cervical Cancer Control Policy. He is the only Nigerian professor appointed as member of the Council of the Association of Commonwealth Universities. He was appointed to serve as a member of the international advisory board of the African Cancer Institute.

Ian Askew
Director, Dept.
Of Reproductive
Health &
Research,
World Health
Organization

Ian Askew joined the Department of Reproductive Health and Research in January 2016 from the Population Council where he worked as Director of Reproductive Health Services and Research in Nairobi, Kenya. He went on to become the Country Director for the Population Council in Kenya in 2002 and acting Director of Senegal from 2009 to 2012. Ian was closely involved in the Frontiers in Reproductive Health Operations Research Program (FRONTIERS) where he served as Associate Director from 1996 to 2006 and then as Director from 2006-2008.

He has served on a number of technical advisory groups, steering committees, and review boards including expert group meetings of the World Health Organization on sexual and reproductive health and rights topics; he is currently a member of HRP's Scientific and technical Advisory Group.

Ian Askew has a PhD in sociology and reproductive health from the University of Exeter, and a master's degree from York University in Canada.

**Hon. Processor
Nicolas Meda**

*Minister of
Health, Ministry
of Health,
Burkina Faso*

Burkina Faso from 2013 to 2017.

Dr. Meda teaches Epidemiology and Public Health at Ouaga University I Professor Joseph Ki-Zerbo. He is the promoter of various degree programs at the University, in particular, a Master in Field Epidemiology and a Master in Public Health. He was also the Coordinator for Burkina Faso of the research activities of the French National Agency for Research on AIDS and Viral Hepatitis (ANRS) from 2002 to 2017. Dr. Meda has accumulated nearly 25 years of experience in medical scientific research.

His major fields of scientific expertise cover reproductive health, prevention of mother-to-child transmission of the AIDS virus, epidemiological studies, clinical trials and research ethics for health. In this capacity, Dr. Meda has been lead investigator of numerous international collaborative projects on HIV and maternal and child health funded by ANRS, DFID, EU, GrandChallenges Canada, EDCTP and many other technical and financial partners. Her main research has yielded significant results in improving the care of mothers and children facing the AIDS virus, other infectious diseases and nutritional deficiencies surrounding pregnancy, childbirth and child development. .

Halima Shariff

Tanzania Country Director,
Advance Family Planning

Date of appointment to the government: February 20, 2017

Doctor of Medicine (MD), University of Ouagadougou, Burkina Faso Doctor of Epidemiology (PhD), University of Bordeaux, France Director of Research (HDR), University of Montpellier, France Professor of Public Health, University Ouaga I Pr Joseph Ki -Zerbo, Burkina Faso.

Dr. Nicolas MEDA, doctor epidemiologist, teacher-researcher was Director General of the Center MURAZ (Burkinabè public research institute for health) of Bobo-Dioulasso in

Rajat Khosla

*Senior Human
Rights Officer,
UN OHCHR*

Previously he worked with UN agencies and others on ICPD+20 review process and post 2015 MDGs discussions and led research and policy on a variety of health and human right issues at Amnesty International, in particular around maternal mortality, sexual and reproductive rights and HIV. He also teaches programmes on social and human rights and development and has provided litigation advice on several social action litigation at national and global levels.

**Mbencho
Andrew Millan**

*FP2020 Youth
Reference
Group Member,
Chief Executive
Officer Youth
Health
International*

Mbencho Andrew Millan has over 6 years of experience in project management, research, and advocacy in health programs including Family Planning; HIV prevention, care and support; and Maternal and Child Health. He now serves as the Chief Executive Officer of Youth Health International which he co-founded and Director of the Family Planning Unit and HIV Treatment Center of Sa'a District Hospital. Andrew is a recognized expert in evidence-based family planning advocacy, in establishing private-public partnerships, and in developing and managing large and complex grants. Previously, he served as Clinic Administrator in SOTA Medical Complex, Youth Reproductive Health Coordinator in Women in Alternative Action and as Executive Director in ZOE-MED Organization which focuses on promoting adolescent and youth sexual and reproductive health and rights. Andrew played a leading role in building the organization from a promising idea into one of Cameroon's leading youth-led organization in sexual and reproductive health. In 2017 he was one of the 120 under 40 winners; the New Generation of Family Planning Leaders program organized by The Bill & Melinda Gates Institute for Population and Reproductive Health at the Johns Hopkins University. Mbencho Andrew has holds a Doctor of Medicine Degree from the University of Yaounde.

Manasa Priya Vasudevan

FP2020 Youth Reference Group Member, Program Manager Yp Foundation

Manasa Priya Vasudevan of India is a program manager for the New Delhi-based YP Foundation, a youth-run and youth-led organization that supports and fosters young leaders working to advance the rights of young women and girls. She focuses on programming that moves the needle on sexual and reproductive health and rights for young people, and delivers comprehensive sexuality education to marginalized youth.

Mitchell Warren

Executive Director AVAC

Previously, he served as Senior Director for Vaccine Preparedness at the International AIDS Vaccine Initiative (IAVI) focusing on increasing community understanding and national involvement in AIDS vaccine development; Vice President of International Affairs for The Female Health Company (FHC), manufacturer of the female condom, where he directed efforts to design and implement reproductive health programs and led global advocacy efforts for female-initiated prevention methods; and six years at Population Services International (PSI) designing and implementing social marketing, communications and health promotion activities, including five years running PSI's project in South Africa.

Warren is Board President of the Global HIV Vaccine Enterprise; member of the President's Emergency Plan for AIDS Relief (PEPFAR) Scientific Advisory Board (SAB); and board member of the Towards an HIV Cure Initiative of the International AIDS Society (IAS). Warren has degrees in English and History from the University of Wisconsin-Madison and studied health policy at the Johns Hopkins University School of Hygiene and Public Health.

THURSDAY AT-A-GLANCE

TIME	SESSION	TITLE	ROOM	PAGE
7:00-8:25		Morning side events / Événements auxiliaires du matin	Onsite / In situ	238
8:00-11:00		Poster session 7 / Session de posters 7	Auditorium Terrace	258
8:30-10:00		People, partners, and programs: bending the curve for fp2020 progress / Personnes, partenaires et programmes : Faire fléchir la courbe pour le progrès de FP2020	Auditorium/Plenary Hall (Includes French translation)	232

10:25-11:45		Sessions - Timeblock 1		
	3.1.00	Beyond 2020: thinking beyond imagination / Au-delà de 2020 : Penser au-delà de l'imagination	Auditorium/Plenary Hall (Includes French translation)	241
	3.1.01	From protocols to implementation: making quality of care in family planning a reality - experiences from India / Des protocoles à la mise en oeuvre : Faire de la qualité des soins de planification familiale une réalité - expériences de l'Inde	AD11 (Includes French translation)	241
	3.1.02	Measurement and family planning 2020 (FP2020): the role of data in moving from a global goal to country action / Mesures et Family Planning 2020 (FP2020) : Le rôle des données pour passer d'un objectif mondial à l'action des pays	MH 1 (Includes French translation)	242
	3.1.03	Meeting the needs of new parents: a call for an integrated FP/MNCH approach / Répondre aux besoins des nouveaux parents : Pour une approche intégrée de la PF/SMNI	AD1	242
	3.1.04	Policy and funding change requires faith: results and lessons from faith-led advocacy for family planning / Le changement de politique et de financement requiert de la foi : Les résultats et les leçons du plaidoyer mené par les religieux pour la planification familiale	Auditorium Club 2	243
	3.1.05	Programming male engagement across the life-course / Programmer l'implication des hommes au cours de la vie	Auditorium Club 1	243
	3.1.06	Self-injection of DMPA-SC in Ghana, Malawi, DRC, and Uganda: increasing access, improving continuation, and empowering women / L'auto-injection du DMPA-SC au Ghana, au Malawi, en RDC et en Ouganda : Augmenter l'accès, améliorer la continuité de l'utilisation et autonomiser les femmes	MH 2 (Includes French translation)	244
	3.1.07	The power of purpose, intent, and narrative in generating demand for contraception / Le pouvoir de la raison d'être, de l'intention et de la narration pour générer de la demande en matière de contraception	AD4	245
	3.1.08	What you promised us: moving youth FP policies off of shelves and into practice / Ce que vous nous avez promis : Mettre en pratique les politiques de PF pour les jeunes	MH 3 (Includes French translation)	245
	3.1.09	No secrets in this house: parental support for family planning / Pas de secret chez nous : Le soutien parental en matière de planification familiale	Auditorium Club 3 (Includes French translation)	246
	3.1.10	When adolescents are mothers: interventions to improve knowledge among married and unmarried young mothers / Quand les adolescentes deviennent mères: Interventions pour améliorer les connaissances des jeunes mères mariées et non mariées	Poolside Lounge at Radisson Blu	246
	3.1.11	Addressing contraceptive gaps for marginalized populations in Rwanda / Comblent les écarts contraceptifs pour les populations marginalisées au Rwanda	MH 4 (Includes French translation)	246
	3.1.12	Consequences and estimates of unintended pregnancy / Conséquences et estimations des grossesses non désirées	AD5	247
	3.1.13	Gender, empowerment, family planning, and sexual and reproductive health and rights / Genre, autonomisation, planification familiale, et droits de santé sexuelle et reproductive	AD12 (Includes French translation)	247
	3.1.14	Innovative approaches to ensure family planning coverage for all / Approches innovantes pour assurer la prise en charge de la planification familiale pour toutes et tous	AD7	248
	3.1.15	Family planning, maternal and child health / Planification familiale et santé maternelle et infantile	AD9	248

TIME	SESSION	TITLE	ROOM	PAGE
11:45-11:55		<i>Transition</i>		
11:55-13:15		Sessions - Timeblock 2		
	3.2.01	Equitable access, sustainable investments, and development benefits: investing in family planning for a lifetime of returns / Accès équitable, investissements durables et bénéfiques du développement : Investir dans la planification familiale pour des rétributions durables	MH 4 (Includes French translation)	250
	3.2.02	Gender transformative approaches to engage boys and men in challenging norms, attitudes and laws that undermine the fulfilment of Reproductive Rights, Gender Empowerment and Family Planning / Approches transformatrices de genre pour impliquer les garçons et les hommes dans le questionnement des normes, attitudes et lois qui minent l'exercice des droits reproductifs, l'autonomie de genre et la planification familiale	AD6	250
	3.2.03	Integrating measurement of quality of care into health systems / Intégrer la mesure de la qualité des soins aux systèmes de santé	Auditorium Club 2	251
	3.2.04	Interfaith advocacy approaches to demand generation and improved family planning services / Approches de plaidoyer inter-religions pour la création de la demande et l'amélioration des services de planification familiale	Auditorium Club 1	252
	3.2.05	Judging the nudge: what works (and what does not) in applying behavioral economics to family planning and reproductive health? / Qu'est-ce qui fonctionne (et ne fonctionne pas) dans l'application de l'économie comportementale à la planification familiale et la santé reproductive ?	AD7	252
	3.2.06	Roses and risk: how can we use digital health to support sexual and reproductive health and rights without putting women at risk of violence? / Roses et Risques: Comment utiliser la santé numérique pour soutenir les droits de santé sexuelle et reproductive sans exposer les femmes aux risques de violence ?	MH 3 (Includes French translation)	253
	3.2.07	When "no" is no longer good enough: models for providing safe abortion care to refugees, women, and IDPs / Quand «non» ne suffit plus: modèles pour fournir des soins d'avortement sans risque aux réfugiés, femmes et personnes déplacées	AD4	253
	3.2.08	You can't manage what you can't see: the global family planning visibility and analytics network (Global FP VAN) and contraceptive commodity security / On ne gère pas ce qu'on ne voit pas : La visibilité mondiale de la planification familiale, les réseaux analytiques (Global FP VAN) et la sécurité des commodités contraceptives	MH 1 (Includes French translation)	254
	3.2.09	Youth-driven change through family planning advocacy / Le changement dirigé par les jeunes à travers le plaidoyer pour la planification familiale	AD1	254
	3.2.10	Reaching those at highest risk with appropriate sexual and reproductive health programming / Amener aux personnes les plus exposées aux risques des programmes appropriés de santé sexuelle et reproductive	AD11 (Includes French translation)	255
	3.2.11	Data for targeted decision making / Les données pour la prise de décision ciblée	AD9	255
	3.2.12	Measurement challenges and innovations in understanding contraceptive autonomy / Mesurer les défis et les innovations dans la compréhension de l'autonomie contraceptive	AD5	255
	3.2.13	The role of digital health tools in family planning programs / Le rôle des outils de santé numérique dans les programmes de planification familiale	MH 2 (Includes French translation)	256
	3.2.14	Sub-national approaches to expand family planning access at the community level / Approches infranationales pour étendre l'accès à la planification familiale au niveau communautaire	Auditorium Club 3 (Includes French translation)	256
	3.2.15	Family planning integration across sectors / Intégration de la planification familiale entre différents secteurs	AD12 (Includes French translation)	256
11:55-13:15		IBP session 8: Social accountability: a transformative approach to addressing access barriers to family planning / La responsabilité sociale : Une approche transformatrice de l'évaluation des barrières entravant l'accès à la planification familiale	AD10	46
13:15-14:45		Closing ceremony luncheon / Déjeuner de la cérémonie de clôture	Auditorium/Plenary Hall (Includes French translation)	268

Morning Side Events

ONSITE

07:00-08:25

The harm of the U.S. global gag rule: assessing impacts on sexual reproductive health services and rights / Les mal causé par la Règle du Ballon Mondial des Etats-Unis : évaluer les impacts sur les droits et services de santé sexuelle et reproductive (PAI with Guttmacher, IPPF, & MSI)

Event Description: Panelists from PAI, MSI, IPPF and the Guttmacher Institute will present the difficulties of and barriers to understanding the impact of the U.S. policy, 'Protecting Life in Global Health Assistance,' known by opponents as the Global Gag Rule (GGR). For the first time, the GGR has been extended beyond family planning assistance (approximately USD 575 million annually) to encompass nearly all U.S. global health assistance (USD 8.8 billion annually), which includes funding for HIV/AIDS, maternal and child health, nutrition, malaria and tuberculosis, among others. The effect of the GGR will likely be most acute in sub-Saharan Africa, where USAID invests more than 60 percent of its family planning funds, and substantial portions of its other global health assistance. Assessing the impact of the expanded GGR is difficult: new organizations are being impacted who had previously been immune to this policy; other donors are attempting to fill gaps; short-term measures may delay the onset of impacts; there is expanded abortion access due to revised laws and misoprostol availability; and organizations that were historically affected by this policy are finding resourceful ways to mitigate potential harm. Together, these factors create important challenges in assessing the effects of the policy for advocates, researchers and service providers.

OBJECTIVES:

Describe the difficulties affected organizations have faced in trying to understand the reinstated and massively expanded Global Gag Rule and its implications;

Discuss how organizations are attempting to mitigate the impact of the policy, including reorganizational strategies and raising replacement funding;

Identify compounding factors that may either minimize or mask the true impact of the policy in the short-term; and

Discuss the difficulty in assessing the impact of the policy: specifically, the barriers to measuring policy exposure and developing a research design capable of scientifically assessing impact.

Accelerating access to postpartum family planning (USAID's maternal and child survival program, FP2020) / Accélérer l'accès à la planification familiale post-partum (Programme de survie de la mère et de l'enfant de l'USAID, FP2020)

USAID's flagship Maternal and Child Survival Program, jointly with the FP2020 secretariat, will hold a daylong event in Kigali, Rwanda, on Friday, November 16, 2018, following ICFP to share learning around what works to increase access to Postpartum Family Planning (PPFP) and strategize actions to improve coverage. This one-day event is for delegates from ministries of health, civil society advocates, and other decision-makers from 17 selected countries that highlighted PPFP in their FP2020 country action plans. Decision-makers will participate in site visits to Rwandan primary health facilities and communities that offer PPFP services and community engagement. Concurrently, civil society advocates will attend an interactive workshop to identify key bottlenecks to accelerated PPFP, learn to engage key decision-makers, and prepare informed and targeted "asks" of decision-makers. The day will culminate in country roundtable sessions where decision-makers and civil society advocates will come together to discuss effective policy changes and approaches to overcome barriers to scale-up of successful PPFP interventions. Primary & Partner(s) Organizations: USAID's Maternal and Child Survival Program, FP2020

Session - Timeblock 1

10:25 - 11:45

3.1.00 **Beyond 2020: thinking beyond imagination / Au-delà de 2020 : Penser au-delà de l'imagination**

TYPE: Preformed Panel

TRACK: Expanding access to family planning

LOCATION: Auditorium/Plenary Hall (Includes French translation)

CHAIR(S): Amy Tsui, Bill & Melinda Gates Institute for Population and Reproductive Health Johns Hopkins Bloomberg School of Public Health

The family planning community has shown that given access to the right resources, best practices, bold policies and new ways of programming, it is capable of achieving more and continue to bend the curve toward the 2020 goals as well as the SDG 2030 goal of “ensuring universal access to sexual and reproductive health-care services, including for family planning, information and education, and the integration of reproductive health into national strategies and programs”. With two years left, after the International Conference on Family Planning in Kigali, much more can be accomplished as the FP community continues to bend the curve in reaching more who need family planning.

The Bill & Melinda Gates Institute for Population and Reproductive Health (GI) will bring together and host representatives from key family planning sectors - governments, donors, civil society organizations, bilateral and multilateral organizations, pharmaceutical and private businesses, and youth rights activists to lead a panel of what next beyond 2020. This panel presents a unique and timely opportunity for both retro- and prospective explorations of existing donor mechanisms, policy design and implementation frameworks, and performance monitoring and accountability tools. These explorations will allow proper adaptation to major recommended steps to be undertaken beyond 2020 to realize universal access to rights-based family planning by 2030.

The Panel will address “Beyond 2020” issues by covering the following topics:

Resources and Financing:

- The future landscape of financing and shifting towards country ownership
- Positive disruptions in family planning policies and programs
- Post-2020 mechanisms and accountability

Invited panelists

Representative from private corporate sector: Klaus Brill, Senior Advisor, Bayer.

Representative for International non-Governmental Organizations: Julia Bunting,

President, Population Council.

Youth Representative: Ramya Jawahar Kudekallu, Co-Founder, Director of Policy and

Advocacy, International Youth Alliance for Family Planning.

Developing Country Government Representative: H.E. Ato Amir Aman, Minister of

Health, Ethiopia.

Civil Society Organizations Representative-South: Fatimata Sy, Director of the

Coordination Unit for the Ouagadougou Partnership

3.1.01 **From protocols to implementation: making quality of care in family planning a reality – experiences from India / Des protocoles à la mise en oeuvre : Faire de la qualité des soins de planification familiale une réalité - expériences de l'Inde**

TYPE: Preformed Panel

TRACK: Improving quality of care

LOCATION: AD11 (Includes French translation)

CHAIR(S): Mervyn Christian, Johns Hopkins Bloomberg School of Public Health; **CHAIR(S):** Medha Gandhi, BMGF; **CHAIR(S):** Anand Sinha, The David and Lucile Packard Foundation

Panel objective:

Panel aims to establish that focused interventions such as advocacy, social accountability, and public-private partnerships can improve public health systems' ability to provide quality family planning (FP) services. It will also highlight that monitoring and measuring quality needs to be pragmatic and can be integrated in programs.

Panel description:

Improving QoC is difficult. Determining and documenting interventions resulting in improvements in QoC is crucial for the field. Measuring and operationalizing quality are essential to improving QoC and are an underlying theme of this panel. QoC is a right and must be at the center of family planning programs, if FP2020 goals are to be achieved.

Since the infamous and tragic deaths during sterilization in Bilaspur, India, the family planning program is revitalized to give attention to quality. Government of India has emphasized approaches such as fixed day services, maximum number of services per provider, facility readiness, and establishment of district quality assurance committees amongst many others to improve quality and consistency of available services. However, implementation of these approaches remain a challenge with constraints such as availability of trained providers, lack of infrastructure, advocacy at appropriate levels, accountability, monitoring and commodities. With these perspectives, panel will share achievements in improving and understanding QoC within the Indian public health system through diverse programmatic and research efforts:

- ‘Importance of local advocacy working groups’ showcases mobilization of financial and human resources, and policy changes to improve quality of FP services by integrating advocacy in public health systems;
- ‘Private sector perspectives to QoC’ focuses on the improvements in QoC by simplifying and institutionalizing guidelines/protocols, and providing support to public sector. In addition, it will highlight the difference in quality as defined in policies and guidelines and as understood by service providers;
- ‘Community Action for Health initiative’ presents improvement in quality and increased contraceptive use by empowering community and elected representatives to monitor and provide direct feedback on the quality and functioning of public health services;
- ‘Gaps and implications in quality of care’ shares important lessons learnt from large-scale measurement of quality of care work and offer suggestions around need for common understanding between program implementation and monitoring.

Research/program/policy implications:

Panel presentations will share policy and programmatic recommendations and highlight interventions and monitoring frameworks that global reproductive health/family planning stakeholders can replicate, adapt, or integrate to advance progress in quality of care for FP services in their geographies.

CO-AUTHOR(S): Mr. V. S Chandrashekar Mr, Marie Stopes International, India
- **Power to the people: Social accountability mechanisms to improving quality of services and increase contraceptive use**
CO-AUTHOR(S): Mr. Bijit Roy Mr, Population Foundation of India
- **Gaps and implications to quality of care measurement in family planning program: Learnings from India**
CO-AUTHOR(S): Dr. Niranjan Saggurti PhD, Population Council

questions, and providing insights into the dynamics of contraceptive use.

IMPLICATIONS

Governments in FP2020 countries have access to more frequent and higher quality data, with increased capacity to analyze this data and distill insights. This enables countries to better monitor family planning program outputs and outcomes, refine family planning strategies, and prioritize interventions for maximum impact. At the same time, advances in data collection, modeling and reporting are improving understanding of contraceptive trends and dynamics, enhancing measurement of key dimensions of family planning (e.g. rights, quality, adolescents/youth, expenditures), and shedding light on where more research, data and analysis are needed.

3.1.02 **Measurement and family planning 2020 (FP2020): the role of data in moving from a global goal to country action / Mesures et Family Planning 2020 (FP2020) : Le rôle des données pour passer d'un objectif mondial à l'action des pays**

TYPE: Preformed Panel

TRACK: Advances in monitoring and evaluation methods

LOCATION: MH 1 (Includes French translation)

CHAIR(S): Jason Bremner, FP2020

OBJECTIVES

Highlight how FP2020 measurement partners are improving the infrastructure and capacity for generating, reporting and using family planning data, through innovative efforts in data collection, modeling, analysis and dissemination, which have collectively contributed to advances in monitoring progress toward FP2020's ambitious goals, on the path to the 2030 Sustainable Development Goals.

DESCRIPTION

As a time-bound initiative with an ambitious goal – 120 million additional users of modern methods of family planning by 2020 – FP2020 places great emphasis on measuring progress, and from its inception has been committed to leading a transformation in the global monitoring of family planning data. FP2020 publishes annual, internationally comparable estimates on different dimensions of family planning across 69 focus countries.

This panel of FP2020 measurement partners will discuss how their work is improving the frequency, utility, understanding and use of family planning data for performance management, decision-making and advocacy at the global and country level:

- The FP2020 **Performance Monitoring & Evidence Working Group (PME WG)** provides technical advice and support for monitoring progress towards the FP2020 goal, by reporting annually on progress in the 69 FP2020 countries; by advancing measurement and improving understanding of key dimensions of family planning; and by supporting the use of data for decision-making.
- **Track20** works with FP2020 commitment-making countries to produce annual estimates of family planning indicators, and to review national and subnational data to shed light on where gains are being made, where efforts should be reinforced, where investments will have the most impact, and where more data and information are needed.
- **PMA2020** (Performance Monitoring and Accountability 2020) uses mobile technology to support low-cost, rapid-turnaround surveys monitoring key family planning indicators in 11 FP2020 countries. The PMA2020 platform is increasing the frequency of family planning survey data, testing new data collection methods and survey

3.1.03 **Meeting the needs of new parents: a call for an integrated FP/MNCH approach / Répondre aux besoins des nouveaux parents : Pour une approche intégrée de la PF/SMNI**

TYPE: Preformed Panel

TRACK: Integration of family planning into health and development programs

LOCATION: AD1

CHAIR(S): Venkatraman Chandra-Mouli, World Health Organization

Objectives:

- To use a socioecological approach to explore the complex factors that shape the First-Time Parent (FTP) lifestage and influence FTP family planning (FP) and maternal and child health (MCH) action;
- To present approaches and results from programs that integrate FP within a broader response for FTPs.

Description:

There has been growing recognition of the vulnerabilities of FTPs as they navigate through their first experiences with pregnancy, childbirth, and raising a child. Presenters will share recent FTP programming experience and evidence, building a case for integrating FP within a holistic response for new parents.

- The Evidence to Action (E2A) Project will present its FTP Lifestage Framework, laying out the complex health, social and gender factors that shape the experience of new parents.
- The Maternal and Child Survival Program (MCSP) will share findings from formative research with first-time/young mothers and fathers and key influencers, using a socioecological approach, that explored factors influencing service utilization in Madagascar and Nigeria. Findings will build understanding of FTP needs and highlight implications for holistic, life-course tailored programming.
- Promundo will share results for FTPs who participated in a couples' intervention integrating FP within a broader health and gender platform in Rwanda. Data presented will highlight key FTP behavioral outcomes, such as contraceptive use and IPV, and lessons learned in delivering integrated programming for FTPs.
- Pathfinder will share results from its FTP program in Zinder, Niger. Data from facilities, qualitative assessments and

program evaluation will demonstrate how utilization of MNCH and FP services can be strengthened through an integrated approach.

• Dr. Chandra-Mouli will highlight the global opportunity to deliver integrated programs for young women and men during this critical lifestage, not only to ensure positive outcomes with the first birth, but also to influence the timing and spacing of future pregnancies.

Afterward, an audience-panelist discussion will explore opportunities for responding to FTP needs, including challenges and successes of implementing integrated programming. Reflections on elements or models for successful FP integration will conclude the panel.

Implications:

For FTPs, FP is one of multiple, converging issues that shape the transition to parenthood and contribute to poor health outcomes. By better understanding this complex lifestage and packaging FP within a holistic response, programs address FTPs' immediate needs and influence a lifetime of FP, SRH and MNCH outcomes. Up-to-date evidence on effective integrated program approaches will help us meet our current goals and catalyze long-term benefits for FTPs and their communities.

- **First-Time Parent Lifestage: A conceptual framework for understanding and contextualizing the complex needs of new parents**
CO-AUTHOR(S): Ms. Anjala Kaneshathasan, Evidence to Action Project/IntraHealth
- **Factors influencing use of health services by first-time/young parents: Findings from formative research in Madagascar and Nigeria**
CO-AUTHOR(S): Melanie Yahner, Save the Children
- **Findings for first-time parents from a randomized controlled trial of the Bandebereho gender-transformative couple's intervention in Rwanda**
CO-AUTHOR(S): Ms Kate Doyle, Promundo US
- **Lessons learned from an integrated approach to addressing sexual and reproductive health needs of first-time parents in Zinder, Niger**
CO-AUTHOR(S): Ms. Claire Moodie MPH, Pathfinder International

3.1.04 **Policy and funding change requires faith: results and lessons from faith-led advocacy for family planning / Le changement de politique et de financement requiert de la foi : Les résultats et les leçons du plaidoyer mené par les religieux pour la planification familiale**

TYPE: Performed Panel

TRACK: Policy, financing, and accountability

LOCATION: Auditorium Club 2

CHAIR(S): Yoram Siame, Churches Health Association of Zambia

PANEL OBJECTIVES:

- Demonstrate that faith-based organizations (FBOs) can effectively engage in high-level SMART policy advocacy, yielding tangible outcomes for family planning (FP);
- Highlight the challenges of and lessons learned from mobilizing FBOs and religious leaders as FP advocates; and
- Provide actionable steps for FBOs seeking to ramp up their advocacy efforts, as well as for CSOs looking to partner with FBOs in advancing shared advocacy agendas.

DESCRIPTION:

Initiatives such as Family Planning 2020 (FP2020) and the Ouagadougou Partnership have increased commitment to FP globally. To sustain this momentum and fulfill the potential of these efforts, it is critical that civil society is fully mobilized as

a partner in achieving national FP priorities. As a part of civil society, FBOs can and should play a central role as advocates for FP at national and subnational levels.

FBOs bring credibility and moral authority to the FP conversation, uniquely positioning them to broker support among government, community leaders and other constituencies critical to implementing FP policies, mobilizing funding, and delivering services. As FBOs provide a significant proportion of primary health care services—including reproductive and maternal-newborn care—across sub-Saharan Africa and beyond, sustainability is built-in to their approach to FP service delivery and advocacy. Still, FBOs have not been fully leveraged as vocal advocates for FP, though many are strongly supportive of the cause.

This panel will showcase successful FBO advocacy efforts from four countries—Uganda, the Democratic Republic of the Congo (DRC), Tanzania and Kenya—which were supported by PAI's Faith + FP Fund. Grounded in the AFP SMART approach, the Fund provides technical and financial support to FBOs in the Global South to hold their governments accountable for meeting FP2020 and Ouagadougou Partnership commitments.

IMPLICATIONS:

This panel will demonstrate that, when armed with the needed expertise and skills, FBOs can be powerful local advocates, foster shared accountability and achieve concrete FP outcomes. From securing local investments in FP to spearheading the development of subnational costed FP strategies, FBOs have made remarkable contributions to the FP policy and funding landscape.

The panelists will discuss how the engagement of religious leaders in FP advocacy can catalyze local action and mitigate opposition to FP. Faith-based advocacy can also help to ensure sustainability of FP progress in many countries due to the role of religion in all aspects of private and public life.

3.1.05 **Programming male engagement across the life-course / Programmer l'implication des hommes au cours de la vie**

TYPE: Performed Panel

TRACK: Men and family planning

LOCATION: Auditorium Club 1

Today, more men view family planning as a shared responsibility. Evidence increasingly suggests that unequal gender norms, including rigid notions of masculinity and femininity, shape men's and women's behavior and limit the uptake of family planning. Male engagement FP outcomes include improved FP uptake, as well as secondary improvements in relationships:

- Greater discussion with parents about reproductive health topics in childhood and adolescence;
- Increased gender equitable attitudes among boys;
- Improved couple communication;
- Increased knowledge of family planning methods;

- Fathers increasing their parenting responsibilities; and,
- More equitable household decision-making.

Gender transformative interventions help men and boys navigate traditional expectations and fulfill their potential as supportive friends, equitable partners, and loving fathers. Challenging social constructions of masculinity is hard work. Gender transformative interventions similarly support women and girls in understanding how gendered expectations shape their and their partners' behaviors, and in negotiating and advocating for change towards more empowerment and equality.

USAID's guidance brief on male engagement in family planning suggests that approaches should reflect men's diverse range of needs, which change over time and context and that programs should address negative gender norms throughout this process.

Men's reproductive health programming is at a critical point for growth. There are a myriad of proven interventions that engage men at discrete points in time, but comprehensive men's reproductive health programming does not exist. Several male-focused reproductive health interventions were pioneered in Rwanda. These interventions increase fertility and FP knowledge, provide access to permanent methods, and challenge inequitable gender norms at different stages of the life course.

Central to programming at each stage of the life course is the need to combat harmful existing gender constructs of masculinity and perceptions of rigid gender roles. This panel will present three exciting interventions that share approaches to engaging men (and sometimes women) for reproductive health outcomes is tailored to age related contexts. Three panelists will describe approaches to addressing reproductive health content and services for men across four age categories: very early adolescents, young adult men and women, expectant and new fathers and couples, and men interested to limit family size.

CO-AUTHOR(S): Fidele Rutayisire

Press) is safe and acceptable to women, based on extensive evidence from several countries.

- To demonstrate that self-injection can improve family planning continuation by women who choose this method, based on new results from Malawi and Uganda.
- To highlight how researchers and implementers in Ghana, Malawi, DRC, and Uganda have engaged with stakeholders to advance rollout and scale-up of self-injection; and help move the global conversation from a call for more research toward applying research results to self-injection program delivery, including rigorous monitoring and evaluation to answer outstanding questions.

Description: This pre-formed panel will highlight recent evidence generated on the new and innovative contraceptive option of self-injection of DMPA-SC. DMPA-SC has a shorter needle and lower dose compared to intramuscular DMPA and comes prefilled in an all-in-one injection system that simplifies injections for lay health workers and women themselves. DMPA-SC self-injection reduces the frequency that women must return to a health facility or a provider for reinjection, increasing convenience and discretion of contraceptive use. Given these advantages, DMPA-SC self-injection is gaining acceptance in more countries as a way for women to take control of their own fertility; at the same time, stakeholders and providers in many countries still have questions and concerns about the practice and its role in their family planning system and market. The panel will present evidence from countries at different stages of DMPA-SC introduction/scale-up, from earliest (Ghana) to more advanced (Uganda). These presentations will show how family planning policymakers and program implementers, regardless of their countries' stage of DMPA-SC introduction, can use the evidence generated here to advocate for and deliver self-injection as an additional delivery option for women.

Research/program/policy implications: This panel will demonstrate the robust evidence base on the safety and acceptability of self-injection, and newer evidence that self-injection can increase continuation among users of injectable contraception. This panel will share evidence with country policymakers, program managers, and implementers that can be used to advocate for or inform planning of self-injection programs and monitoring and evaluation efforts, improving access to injectable contraceptives for women who so desire. Finally, approaches to research utilization that helped smooth the transition from research to practice will be highlighted, and outstanding knowledge gaps and potential strategies for addressing them will be discussed.

3.1.07 **The power of purpose, intent, and narrative in generating demand for contraception / Le pouvoir de la raison d'être, de l'intention et de la narration pour générer de la demande en matière de contraception**

TYPE: Performed Panel

TRACK: Demand generation and social and behavior change

LOCATION: AD4

CHAIR(S): Ben Bellows, Population Council

Meeting adolescent contraceptive needs requires dynamic demand generation strategies that are appropriate to context, build trust, and capable of empowering young consumers. This panel presents programmatic experience in designing and scaling effective demand generation among adolescents and young women of Kenya.

Achieving contraceptive uptake involves stages of behavior change in which the consumer refines their self-awareness to discover intent, renew purpose, and shape more powerful narratives. In Kenya, three organizations are implementing demand generation programs that use novel strategies to engage consumers.

Nia is an aspirational menstrual hygiene management brand that helps its adolescent girl customers to access reproductive health answers and service providers via diverse platforms. Equally important, the brand makes women proud and confident, and is a trusted voice for health education. The Nia sanitary pad is a platform on which reproductive information/education is marketed; as pads are sold in retail outlets across Nairobi it has visibility and presence that engages the target audience.

Nivi is a digital health company that bridges the information and access gap that women and girls face in emerging markets. By texting a question or keyword, users gain access to trusted information about women's health and receive localized and personalized recommendations and referrals to high quality products and services through Nivi's unique referral engine. Nivi brings together the power of the cloud, the personal touch of a mobile phone, and first-class customer service in a unique solution to enable women and girls to lead healthier lives.

Well Told Story (WTS) leverages the power of narrative to empower young consumers with new perspectives and agency. Among other products, WTS produces Shujaaz, a story that follows fictional and real youth from different parts of Kenya and Tanzania as they encounter, discuss and resolve challenging life issues. Created in 2010, Shujaaz employs a 360-degree, interactive multimedia platform (a comic, radio, SMS and social media) to promote better health choices and teach marketable skills to millions of East Africans aged 15-24. The panel will explore each organization's approach to demand generation and share operational insights. By end of the panel, participants will be able:

- identify at least 3 demand generation strategies to engage adolescents on contraceptive services
- name online and offline approaches that have been deployed in Kenya
- isolate the policy and programmatic challenges and opportunities in deploying demand generation in different markets

3.1.08 **What you promised us: moving youth FP policies off of shelves and into practice / Ce que vous nous avez promis : Mettre en pratique les politiques de PF pour les jeunes**

TYPE: Performed Panel

TRACK: Sexual and reproductive health and rights among adolescents and youth

LOCATION: MH 3 (Includes French translation)

Objectives: The goal of this panel is to: 1) share lessons learned from activities in three countries that built the capacity of youth to assess the implementation of youth sexual and reproductive health (SRH) policies and 2) link the activity findings to broader efforts to hold governments accountable to implementing existing policies that aim to improve youth access to contraceptive services and information.

Description: The panelists will discuss how their organizations fostered youth leadership and built the capacity of youth across a continuum of activities: assessing the strength of written policies, gathering data on policy implementation, using the results of the policy assessments to plan advocacy strategies, and advocating for improved policy implementation.

Meredith Pierce will discuss a "Youth Family Planning Policy Scorecard" that measures and compares sixteen countries' youth family planning policies across eight indicators proven to remove barriers and improve youth access to and use of contraception. The Scorecard's findings highlight the importance of measuring the extent to which policies are being implemented in countries with strong written policies, such as Burkina Faso and Kenya.

Saidou Sawadogo and Lucy Kiarie will then share experiences engaging youth in policy implementation assessments and subsequent youth-led policy advocacy efforts in Burkina Faso and Kenya. In both countries, the assessment methodology captured both key stakeholder perspectives and youth experiences. The panelists will share their findings regarding the gaps and progress in youth SRH policy implementation and how they informed the advocacy strategies designed by youth advocates in each country.

Manasa Priya Vasudevan will discuss her work with a cohort of youth advocates from four states in India that includes: building youth advocates' knowledge of existing youth SRH policies, empowering youth to identify critical gaps in policy implementation using multiple data sources, generating evidence-based policy recommendations, and creating opportunities for youth-led dialogue.

Research/program/policy implications: Governments have increasingly recognized the importance of involving youth in the creation of policies and programs that affect them. Indeed, many countries have policies that aim to improve youth access to and use of contraception that have been created based on evidence of what works and with input from youth themselves. Actively involving youth in every stage of program design, implementation, and evaluation should extend to engaging youth in assessing the extent to which existing policies are being implemented. Youth should be supported and provide

leadership in efforts to hold their national and sub-national governments accountable to following through on their written policy commitments.

Session - Timeblock 2

11:55 - 13:15

3.2.01 **Equitable access, sustainable investments, and development benefits: investing in family planning for a lifetime of returns / Accès équitable, investissements durables et bénéfiques du développement : Investir dans la planification familiale pour des rétributions durables**

TYPE: Preformed Panel

TRACK: Returns on investment in family planning and the Demographic Dividend

LOCATION: MH 4 (Includes French translation)

CHAIR(S): Ian Askew, World Health Organization

Moderator: Ian Askew, WHO

Panellists: Mike Mbizvo (PC), Elizabeth Sully (GI), Gifty Addico (UNFPA)

Description:

While the internationally agreed upon Sustainable Development Goals (SDGs) attest that, "Ensuring healthy lives and promoting the well-being for all at all ages is essential to sustainable development," substantial efforts need to be made to make this a reality for all. Family planning (FP) is among key interventions available to reduce mortality and improve health related to reproduction, and yet its uptake remains lower than universally needed and is inequitable between and within nations. Research evidence on returns, and subsequent utilization, within a conducive financing environment, is a development imperative.

This first presentation provides an overview of the rationale, benefits and efficiency gains of investment in family planning from a social, health and economic perspective. The second presentation provides a follow on, bringing to the fore recent data on inequities, as influencing unmet need for family planning, and thus allude to gaps and needs in the context of the global call on leaving no one behind. The third presentation will draw on the evidence presented on the social, economic and health returns associated with family planning, and the need to address inequities, reviewing the case for securing sustainable investment in family planning to ensure the long run success towards SDGs.

Panel overall objective:

To share research data that reinforces the health and development roles of equitable access and sustainable investments, for family planning:

- Show the interrelationship between FP and other SDGs;
- Highlight inequities in FP to underscore where efforts are needed to ensure that no one is left behind in meeting FP and development goals;
- Critically review the current state of policy and financial commitments to FP and what is needed to ensure sustainable investments.

Conclusion

This panel examines the relationship between family planning in the context of benefits and the SDGs: what the impact is of FP on other development goals, who is currently being left behind in family planning efforts, and what is needed to ensure sustainable financing for FP. The Panel will show how investment in Family planning confers returns that are critical to health and development.

Research program and policy implications:

The three presentations cover a continuum from defining the problem areas, the health and development rationale and, drawing from the next Adding It Up addition, highlight intervention gaps for research and programming in the second presentation, with policy implications and recommendations for domestic and other financing underscored in the third presentation.

– Moderator's active engagement discussion for Panel: Equitable access, sustainable investments, and development benefits: investing in family planning for a lifetime of returns

CO-AUTHOR(S): Ian Askew PhD, World Health Organization

3.2.02 **Gender transformative approaches to engage boys and men in challenging norms, attitudes and laws that undermine the fulfilment of Reproductive Rights, Gender Empowerment and Family Planning / Approches transformatrices de genre pour impliquer les garçons et les hommes dans le questionnement des normes, attitudes et lois qui minent l'exercice des droits reproductifs, l'autonomie de genre et la planification familiale**

TYPE: Preformed Panel

TRACK: Men and family planning

LOCATION: AD6

CHAIR(S): Abhijit Das

Panel Objectives

- To share emerging evidence on the roles and responsibilities of men and boys in advancing SRHR and family planning
- To present on how MenEngage Alliance conducts integrated joint advocacy on key issues regarding family planning and SRHR and how engaging men and boys contributes to strengthened global movement building to advocate for SRHR for all.
- To generate discussion on how this work can be done in an accountable manner towards women, girls and people of diverse sexual orientation or gender identity.

Description

This session will present the work of MenEngage Alliance and its members/partners on gender transformative approaches to engaging boys and men to challenge stigma, discrimination, attitudes and laws that undermine the fulfilment of SRHR for all. The panelists, from both the Global South and North, will share experiences from initiatives that engage men and boys in key SRHR issues, including equality in responsibility for contraceptive use and family planning, women's right to choose and access safe and legal abortion, comprehensive sexuality education, ending homophobia and transphobia and increasing men's access to and use of HIV and other SRH services. The panel will present a comprehensive approach and strategies that MenEngage Alliance members and partners apply including interconnected policy advocacy, the mobilization of youth 'changemakers', network building and capacity strengthening, evidence generation and dissemination and strengthening partnerships.

Panelists will present their experiences of implementing gender-transformative programming and campaigns to engage men in SRHR, focusing specifically on emerging

evidence, promising practices and lessons learned. They will discuss engaging men and boys across the socio-ecological model, how the engagement of individual boys and men can link to efforts to transform attitudes, norms, institutions and policies, and how the engagement of men and boys can contribute to strengthening global movement building to advance SRHR for all. The panel will also have a specific focus on accountability and how this work can be done in a way that is fully accountable to, and in collaboration with, women's rights and SRHR organizations.

Research/program/policy implications

The panel seeks to strengthen understanding of gender transformative, feminist informed and rights-based approaches and interventions inclusive of a 'men and masculinities' perspective, to advance SRHR among researchers, practitioners and policymakers and contribute to the global knowledge base for this work. Among the panelists we will also have researchers and theorists who have invested their professional life in creating pragmatic theory of change to underpin this work globally.

3.2.03 **Integrating measurement of quality of care into health systems / Intégrer la mesure de la qualité des soins aux systèmes de santé**

TYPE: Preformed Panel

TRACK: Improving quality of care

LOCATION: Auditorium Club 2

CHAIR(S): Jason Bremner, FP2020

Panel objectives:

There is growing recognition that achievement of the FP2020 goal requires paying attention to quality of care. The rationale is that a focus on quality of care will help attract new users while also ensuring that existing users receive the necessary support to continue contraception. Furthermore, as countries move towards rights-based family planning programming,

quality of care will be an integral component of service design and implementation.

The presentations on this panel will examine different ways of measuring quality using different data sources and methods and present findings from multiple settings that reflect the service environment and client experience. The overall objective is to distill lessons learnt to inform adoption of a uniform way of measuring quality.

Description:

Indicators are required for multiple purposes ranging from describing existing services, monitoring quality over time, assessing effect of interventions to documenting client outcomes of health and wellbeing. Quality needs to be measured at the policy level to measure intent of programs to offer good quality services, at the service delivery channel level to measure readiness to offer quality care, at the client-provider interaction level to measure care provided, and at the client level to measure client satisfaction with services received and subsequent contraceptive behaviors. Our panel includes four thought-provoking presentations on measures of quality that have been applied at the readiness, client-provider interaction, and client levels. PMA2020 will present trends of service readiness using facility surveys and care received and women's perspectives from population-based surveys. The DHS Program will present data from Service Provision Assessment (SPA) surveys on alternate measures of readiness of facilities, services offered and received by clients. Metrics for Management will present the relationships between structural and process quality assessed at the facility, Method Information Index (MII) and discontinuation. The Population Council will present findings of care provided and client contraceptive continuation.

The session will be moderated by Jason Bremner, Director, Data and Performance Management, FP2020.

Research/program/policy implications:

A focus on quality of care implies putting the client at the center of service delivery. It therefore follows that performance indicators need to align with the service delivery process. As family planning programs implement rights-based services at scale, indicators of quality of care that can be uniformly applied across different health systems are needed.

- **Assessing trends of quality of care using PMA2020 population and service delivery point surveys**

3.2.04 **Interfaith advocacy approaches to demand generation and improved family planning services / Approches de plaidoyer inter-religions pour la création de la demande et l'amélioration des services de planification familiale**

TYPE: Preformed Panel

TRACK: Faith and family planning

LOCATION: Auditorium Club 1

CHAIR(S): Mona Bormet, Christian Connections for International Health

Objectives:

The participants will understand the role that faith leaders and faith communities are playing in improving contraceptive access and uptake.

The participants will be able to ask questions to better understand how family planning programs could benefit from a faith outreach component and dialogue around misperceptions around how faith communities respond to family planning messages.

The participants will leave the session with the ability to share the actions that faith leaders are taking to advocate for family planning policies and services in their communities and to promote engagement with faith leaders in their own programs.

Background & Methods: In sub-Saharan Africa, 85-90% of people identify religion as very important and there are 225 million women around the world with an unmet need of family planning. In many countries, faith-based organizations provide large percentages of health care, especially in rural areas. Faith and religious leaders are cultural gatekeepers and are essential partners to empower their organizations and churches to be comfortable with family planning, and to ensure community members talk about family planning openly and will access services. To counter misunderstanding of the role and opinions of religious leaders and to show public support, this session will emphasize discussion on what religious leaders have done well and what they could do better. Representatives from the Ghana Muslim Family Counselling Services, Catholics for Reproductive Health (C4RH) in the Philippines, the Churches Health Association of Zambia (CHAZ), and World Vision Kenya will share their experiences using a Fishbowl Format (inner circle of speakers, larger outside circle of attendees, and the inner circle will change and expand as the conversation continues). This format is meant to ensure dynamic participation going beyond a more traditional presentation approach.

Results: Advocacy efforts will highlight four regions of the world and four different faith engagement experiences. GFCS will highlight their advocacy efforts of FP into the national health insurance program; CHAZ will talk about how they trained RLS from 16 denominations to advocate for FP nationally via radio, tv and with the MoH; C4RH will focus on how they engaged 500 members and volunteers in their activities and campaigns about the RH law throughout the country and formation of an interfaith network; and WV Kenya will focus on their efforts to train and mobilize 136 RLS in Siaya County who formed 64 Congressional Hope Action Teams to refer 6,086 women to a facility for FP services through their Channels of Hope methodology.

- **The Role of Faith Community in Promoting Domestic Financing for Family Planning in Ghana**

CO-AUTHOR(S): Ms. Cynthia Nyakwama, World Vision Kenya

3.2.05 **Judging the nudge: what works (and what does not) in applying behavioral economics to family planning and reproductive health? / Qu'est-ce qui fonctionne (et ne fonctionne pas) dans l'application de l'économie comportementale à la planification familiale et la santé reproductive ?**

TYPE: Preformed Panel

TRACK: Demand generation and social and behavior change

LOCATION: AD7

CHAIR(S): Paul Hutchinson, Tulane University

Description

Behavioral economics (BE) is an approach to unpack decision-making and behavior and design impactful solutions. Recently, BE piqued interest as a promising social and behavior change (SBC) tool in family planning and reproductive health (FP/RH). Nobel Prizes for BE and successes across environment[1][2], finance[3], and education[4] sectors have built momentum for BE, resulting in investments from Hewlett Foundation, Gates Foundation, World Bank, and USAID, posing the question – can BE help tackle FP/RH challenges?

This panel will respond by sharing the latest research and experimental results of early adopters' BE application to FP/RH. Pathfinder International will share behavioral insights of FP/RH behaviors in Bangladesh, Ethiopia, and Burkina Faso. World Bank will share results from integrating developmental science and BE improving adolescent FP/RH outcomes in Cameroon. Marie Stopes International will present randomized controlled trials (RCT) results for post-abortion FP in Nepal and RH e-coupon redemption in Uganda. JSI will present RCT results reducing injectable discontinuation in Ethiopia. Tulane University, which evaluated Hewlett Foundation's investment for BE in FP/RH, will moderate the panel.

Objectives

- Build capacity for BE as an SBC tool in FP/RH by sharing successes and failures; and,
- Discuss opportunities and challenges of applying BE to FP/RH to shape future SBC programming.

Research and Program Implications

Persistence of intractable FP/RH challenges calls for additional SBC tools, like BE, to advance the sector. BE research insights drive innovative design and show impactful, cost-effective results, which complement existing programming. However, despite initial successes, challenges show BE application can and should be adapted to improve future SBC programming.

3.2.06 **Roses and risk: how can we use digital health to support sexual and reproductive health and rights without putting women at risk of violence? / Roses et Risques: Comment utiliser la santé numérique pour soutenir les droits de santé sexuelle et reproductive sans exposer les femmes aux risques de violence ?**

TYPE: Performed Panel

TRACK: Reproductive rights and gender empowerment

LOCATION: MH 3 (Includes French translation)

Panel objectives

- Share examples and evidence of how mobile phones can be used to support family planning and reproductive health
- Highlight the potential increased risk of intimate partner violence as a result of using mobile phones to support reproductive health
- Share strategies designed to mitigate risks of mobile phone interventions for reproductive health
- Discuss how to ensure risks are measured effectively when evaluating mobile phone interventions

Description

Despite the promise of mobile phones to increase access to family planning and reproductive health information and services, experiences from the field have demonstrated that users of these interventions could face unanticipated harm for example because of stigma around family planning or abortion and patriarchal norms around control of female fertility. Given the potential for harm, it is important to consider risks in the design phase, and develop interventions that explicitly consider user-preferences about risk-mitigation. The panel will start with details of a randomised controlled trial of interactive voice mobile phone messages designed to support family planning use in Bangladesh that resulted in an increase in intimate partner violence. The second presentation describes a trial of a similar intervention in Cambodia where no negative effects were found; however no specific violence measurement was included. Issues related to measurement of adverse outcomes will be discussed. The third and fourth presentations will focus on strategies to mitigate potential risks among a range of populations and settings during the design and development of mobile phone reproductive health interventions. We will share learnings from the design process and resulting safety features of mobile phone interventions developed for populations, including adolescents and sex workers, in five countries. Lastly, we will present findings from

formative research in five contexts on user preferences around privacy and security features in smartphone applications, and will share lessons learned in how to incorporate the results of this research into the application design process.

Research/program/policy implications

While promising knowledge and empowerment for vulnerable populations, the potential for harm from digital health interventions for family planning and reproductive health must be taken into account. Research is just beginning to identify how interpersonal violence may be catalyzed by mobile phone family planning messages, but formative research and strategic, user-centered design can help to mitigate any potential harm. Future evaluations of digital health interventions on this topic need to routinely monitor possible negative impacts using measures of interpersonal violence.

3.2.07 **When “no” is no longer good enough: models for providing safe abortion care to refugees, women, and IDPs / Quand «non» ne suffit plus: modèles pour fournir des soins d'avortement sans risque aux réfugiés, femmes et personnes déplacées**

TYPE: Performed Panel

TRACK: Family planning and reproductive health in humanitarian settings

LOCATION: AD4

CHAIR(S): Erin Wheeler, International Rescue Committee

This panel introduces the audience to four existing models from four different international non-governmental organizations for introducing, supporting and providing safe abortion care to one of the most hard-to-reach groups, women and girls in humanitarian and displaced settings. Through these presentations the audience will learn about specific ways to overcome the challenges posed by restrictive national laws and provider and staff reticence to offer abortion services, challenges posed by the global policy environment and the approaches of each organization in facing abortion-related stigma and international restrictions. Additionally, the presenters will discuss local barriers and facilitators to safe abortion care implementation and discuss the processes and solutions that are leading to safer abortion services in each country. This panel introduces the audience to four existing models from four different international non-governmental organizations for introducing, supporting and providing safe abortion care to one of the most hard-to-reach groups, women and girls in humanitarian settings. Through these presentations the audience will learn about specific ways to overcome the challenges posed by restrictive national laws and provider and staff reticence to offer abortion services, challenges posed by the global policy environment and the approaches of each organization in facing abortion-related stigma and international restrictions. Additionally, the

presenters will discuss local barriers and facilitators to safe abortion care implementation and discuss the processes and solutions that are leading to safer abortion services in each country.

The panel will highlight how investing in improved use of shared global and country-level supply chain data through technology, combined with effective people, processes, and policies, can transform how governments, donors, manufacturers, and partners coordinate to maximize use of available resources and improve access to family planning products.

Research/program/policy implications: Creating a single global platform for family planning data and coordinated decision-making has been at the forefront of conversations on improving contraceptive security for years. The Global FP VAN pilot results will determine whether the investment required to establish a Global FP VAN is worth the resulting benefits. If the pilot is deemed successful, it will become a longer-term initiative where the platform will be expanded to scale over time to cover more countries, products, and manufacturers.

3.2.08 **You can't manage what you can't see: the global family planning visibility and analytics network (Global FP VAN) and contraceptive commodity security / On ne gère pas ce qu'on ne voit pas : La visibilité mondiale de la planification familiale, les réseaux analytiques (Global FP VAN) et la sécurité des commodités contraceptives**

TYPE: Preformed Panel

TRACK: Advances in contraceptive technology and contraceptive commodity security

LOCATION: MH 1 (Includes French translation)

CHAIR(S): Julia White, Reproductive Health Supplies Coalition

Overall Panel Objectives:

- Introduce the concept of a visibility and analytics network and the Global Family Planning VAN (Global FP VAN)
- Explore Global FP VAN implementation across four components: people, process, technology, and policy
- Present early findings from current Global FP VAN pilot period and perspectives on stakeholder coordination, governance, process transformation around data management, data sharing, and technology system selection

Description of the Panel Overall:

Data visibility and evidence-based decision-making are buzz words of the day in the global health supply chain world. But what does it take to get there and how can we use these ideas to support contraceptive security? This panel will unpack the basics of a new Reproductive Health Supplies Coalition (RHSC)-managed initiative to increase supply chain visibility through a Global FP VAN. The panel will explain this initiative in the context of RHSC's history and highlight the recurring challenges it is trying to resolve. Presentations will then explore how the Global FP VAN is bringing together people, policy, processes, and technology in innovative ways to transform how the family planning community responds to supply challenges and makes decisions together. Each panelist will explore one of these themes:

- People and governance – coordinating multiple players across the supply chain in an active network that uses the same data platform to make joint decisions about product flow into countries
- Policy and data sharing – establishing multilateral agreements to overcome barriers to data sharing
- Process and data management – moving from multiple coordination groups to an integrated process, especially around data management
- Technology and system selection – moving from multiple siloed tools to one virtual, collaborative platform

7.086 **Applying the 4Ps lens of financing family planning to learning from the Africa Health Markets for Equity (AHME) programme**
PRESENTER: Ms. Anne Coolen, Marie Stopes International, Ghana
CO-AUTHOR(S): Mr. Luke Boddam-Whetham, Marie Stopes International; Mrs. Jayne Rowan, Marie Stopes International

7.087 **Advocating for the Future of Birth Control: Financing New Contraception Technologies R&D**
PRESENTER: Ms. Elspeth Williams, Population Council

7.088 **Assessing the Family Planning Programming, Planning, and Budgeting in Indonesia: Is it Rights-Based?**
PRESENTER: Dr. Tira Aswitama MD, UNFPA Indonesia
CO-AUTHOR(S): Dr. Melania Hidayat MD, MPH, UNFPA; Mr. Budi Eko Siswoyo SKM, MPH, Chpm Ugm; Ms. Shita Listyadewi, Chpm Ugm; Mr. Muhamad Faozi Kurniawan Faozi, Center for Health Policy and Management

7.089 **Lessons learned from a portfolio-level evaluation in Nigeria and DRC: The Family Planning Country Action Process Evaluation (FP CAPE)**
PRESENTER: Dr. L. Lin Ong PhD, UNC Chapel Hill
CO-AUTHOR(S): Dr. Sian Curtis PhD, Carolina Population Center, University of North Carolina, Chapel Hill; Ms. Meghan Corroon, University of North Carolina, Caroline Population Center

7.090 **Feasibility of population-level tracking of postpartum family planning choices and uptake among women giving birth at the kebele level: Testing new tools in Ethiopia**
PRESENTER: Mr. China Wendimu MPH, Jhpiego
CO-AUTHOR(S): Ms. Deborah Sitrin, Jhpiego; Ms. Anne Pfitzer MHS, Jhpiego; Ms. Devon Mackenzie MPH, Jhpiego; Mrs. Tigist Worku, Jhpiego; Dr. Gebi Hussein, Arsi University

7.091 **Goals and Targets in Family Planning in India: An analysis of FP2020 initiatives**
PRESENTER: Mr. Jay Prakash, MOHFW

7.092 **institutionalizing the population, health and environment (PHE) approach in the east african community (EAC) region: policy, advocacy and programming efforts**
PRESENTER: Dr. Doreen Othero, Lake Victoria Basin Commission

7.093 **Civil Society Driving Government Accountability for Investment in Family Planning: The Common Framework Approach**
PRESENTER: Ms. Lethia Bernard, PAI
CO-AUTHOR(S): Mrs. Suzanna Dennis, PAI

7.094 **Fixing day for family planning services increase the number of additional family planning users at scale in Urban India**
PRESENTER: Dr. Emily Das PhD, Population Services International
CO-AUTHOR(S): Mr. Mukesh Sharma Mr., Population Services International, India; Mr. Samarendra Behera, Population Services International, India; Mr. Vivek Sharma PhD, Population Services International; Dr. Sanjay Pandey, PSI; Mr. Nitin Dwivedi, PSI; K. Laxmi Rao Mr, Population Services International

7.095 **Nigeria Family Planning Landscape: Flow of Information, Advocacy, Budget and Logistics-The Challenge Initiative Experience in Ogun State, South West Nigeria**
PRESENTER: Dr. Olukunle Omotoso, Johns Hopkins Centre for Communication Program, The Challenge Initiatives
CO-AUTHOR(S): Ms. Dorcas Akila, Johns Hopkins Centre for Communication Programs, The Challenge Initiative, Nigeria; Dr. Victor Igharo, Johns Hopkins Centre for Communication Programs, The Challenge Initiative, Nigeria; Dr. Lekan Ajjola, The Challenge Initiative, Nigeria Hub.; Dr. Elijah Ogunsola MBBS, MPH, Ph.d (in view), Ogun State Primary Healthcare Development Board

7.096 **The RMNCAH Provincial Profile: A new approach to family planning data usage and presentation at sub-national level in Afghanistan**
PRESENTER: Dr. Mohammad Samim Soroush Dr., RMNCAH Directorate, Ministry of Public Health, Afghanistan
CO-AUTHOR(S): Dr. Zelaikha Anwari, Ministry of Public Health; Ms. Ariel Higgins-Steele, UNICEF

7.097 **Potentials of Achieving FP2020 Goals of 120 million Additional Contraceptive Users by 2020: an exploration of subnational temporal changes in five countries with Bayesian Hierarchical Model using PMA and DHS data**
PRESENTER: Mr. Qingfeng Li Dr. , Johns Hopkins Bloomberg School of Public Health
CO-AUTHOR(S): Dr. Amy Tsui PhD, Bill & Melinda Gates Institute for Population and Reproductive Health Johns Hopkins Bloomberg School of Public Health; Dr. Saifuddin Ahmed, Johns Hopkins University

7.098 **Mapping the expanded global gag rule domains of impact**
PRESENTER: Ms. Emily Maistrellis MSc, Columbia University Mailman School of Public Health
CO-AUTHOR(S): Ms. Bergen Cooper, Center for Health and Gender Equity; Ms. Marta Schaaf, Columbia University; Dr. Hana Thomas, Columbia University

- 7.099 **Who sets the agenda? The impact of the U.S. Government "Global Gag Rule" on health service provision and advocacy in selected countries?**
PRESENTER: Ms. Emily Maistrellis MSc, Columbia University Mailman School of Public Health
CO-AUTHOR(S): Ms. Marta Schaaf, Columbia University; Dr. Sara Casey DrPH, RAISE Initiative, Heilbrunn Department of Population and Family Health, Mailman School of Public Health, Columbia University; Ms. Latanya Mapp Frett, Planned Parenthood Federation of America - Planned Parenthood Global; Ms. Jennifer Britton, Heilbrunn Department of Population and Family Health, Mailman School of Public Health, Columbia University; Ms. Theresa McGovern, Heilbrunn Department of Population and Family Health, Mailman School of Public Health, Columbia University
- 7.100 **Costs and Benefits of Meeting the Contraceptive Needs of Nepali Women**
PRESENTER: Dr. Aparna Sundaram PhD, Guttmacher Institute
CO-AUTHOR(S): Dr. Mahesh Chandra Puri PhD, CREHPA; Ms. Ayana Douglas-Hall, Guttmacher Institute; Ms. Kusum Wagle, Center for Research on Environment Health and Population Activities; Ms. Kate Castle, Guttmacher Institute
- 7.101 **"The next frontier in CIPs: How Tanzania is charting new territory with its second-generation CIP"**
PRESENTER: Mr. Sammy Musunga Mr, Fhi 360
CO-AUTHOR(S): Zuhura Mbuguni, Ministry of Health and Social Welfare; Ms. Trinity Zan, Fhi 360; Ms. Michelle Weinberger, Avenir Health; Ms. Christine Lasway MPH, MBA, Palladium Group; Dr. Eric VanPraag, FHI360; Ms. Stella Mujaya, Palladium
- 7.102 **Harnessing Technology to get Upclose with Family planning communication agents: Improving Quality and Outcomes of IPC agents through E-supervision.**
PRESENTER: Mr. Baker Lukwago Bsc.PS, Msc.PRH, Population Services International Uganda
CO-AUTHOR(S): Mr. Peter Buyungo BA, MBA, PGDM&E, Population Services International Uganda; Mr. Henry Kaula, PSI, Uganda
- 7.103 **Transitioning from stand-alone unplanned pregnancy and HIV prevention programs to couple-friendly integrated services in six Zambian cities and towns**
PRESENTER: Dr. Mubiana Inambao, Rwanda Zambia HIV Research Group
CO-AUTHOR(S): Dr. William Kilembe, Rwanda Zambia HIV Research Group; Dr. Bellington Vwalika MMed, MSc, University of Zambia School of Medicine; Ms. Rachel Parker, Rwanda Zambia HIV Research Group; Ms. Amanda Tichacek Dr. Amelia Mazzei, Rwanda Zambia HIV Research Group; Ms. Jasmine Ko MPH, Rwanda Zambia HIV Research Group; Ms. Alexandra Hoagland, Projet San Francisco; Ms. Tyronza Sharkey, Rwanda Zambia HIV Research Group; Ms. AnaMaria Visoiu MPH, RW; Dr. Kristin Wall, Rwanda Zambia HIV Research Group; Dr. Susan Allen, Rwanda Zambia HIV Research Group
- 7.104 **A Qualitative Analysis of Stakeholder Perspectives on Performance-Based Financing for Postpartum Long-Acting Reversible Contraception in Rwanda**
PRESENTER: Dr. Julien Nyombayire Mutagisha Dr, Projet San Francisco-Rwanda Zambia HIV Research Group
CO-AUTHOR(S): Ms. Ellen Mork, University of Michigan School of Public Health; Dr. Rosine Ingabire Dr, Project San Francisco/Rwanda-Zambia HIV Research Group, Department of Pathology and Laboratory Medicine, Emory University.; Ms. Vanessa Da Costa, Rwanda Zambia HIV Research Group; Ms. Alexandra Hoagland, Projet San Francisco; Ms. Robertine Sinabamenye, Projet San Francisco; Dr. Holly Jarman, University of Michigan School of Public Health; Dr. Susan Allen, Rwanda Zambia HIV Research Group; Dr. Etienne Karita Dr, Rwanda Zambia HIV Research Group; Dr. Kristin Wall, Rwanda Zambia HIV Research Group
- 7.105 **Gaps in monitoring systems for Implanon NXT services in South Africa: An assessment of 12 facilities in two districts**
PRESENTER: Ms. Diantha Pillay MPH, Wits Reproductive Health and HIV Institute
CO-AUTHOR(S): Dr. Chelsea Morroni MPH, MPhil, DTMH, DFSRC, PhD1, The Botswana-UPenn Partnership, The Liverpool School of Tropical Medicine, The University of Cape Town (UCT) School of Public Health; Ms. Melanie Pleaner M Ed, Wits RHI; Dr. Matthew Chersich, Wits Reproductive Health and HIV Institute; Ms. Nicolette Naidoo, Wits Reproductive Health and HIV Institute, Faculty of Health Sciences, University of the Witwatersrand, Johannesburg, South Africa; Dr. Saiqa Mullick MD, PhD, Wits Reproductive Health and HIV Institute; Dr. Helen Rees, Wits Reproductive Health and HIV Institute, Faculty of Health Sciences, University of the Witwatersrand, Johannesburg, South Africa
- 7.106 **Revising the measure of contraceptive prevalence: recent levels and trends in sub-Saharan Africa**
PRESENTER: Mr. Emmanuel Olamijuwon, Demography and Population Studies Programme, Faculty of Social Science, WITS University
CO-AUTHOR(S): Dr. Clifford Odimegwu PROFESSOR, Department of Demography and Population Studies, University of Witwatersrand
- 7.107 **Family Planning Plus: A digital health system to strengthen community-based family planning programs**

CLOSING CEREMONY LUNCHEON

Celebrating and Mobilizing for the Future

AUDITORIUM/PLENARY HALL (13:15–14:45)

The closing ceremony will highlight key moments from the 2018 ICFP, recognize participant achievements and inspire attendees with energy and vision for the future of family planning, especially the big push toward the FP2020 goal.

Special prizes will be awarded for top ICFP posters and statements will be made by parliamentarians, youth delegation and faith leaders outlining the steps they have committed to take to make family planning a top priority over the next two years and beyond. Winners will be announced for the Packard Quality Innovation Challenge and the Excellence in Leadership for Family Planning (EXCELL) awards will be given, recognizing countries, organizations/facilities and individuals/teams who have made significant contributions to the family planning field and demonstrate leadership, diligence and success in their efforts to improve the landscape for family planning. The Closing Ceremony Luncheon will conclude with an inspirational presentation and performance by youth and some very special guests!

EXCELL AWARD CEREMONY

The Excellence in Leadership for Family Planning (EXCELL) Awards recognize countries, organizations/facilities and individuals/teams who have made significant contributions to the family planning field. Awardees demonstrate leadership, diligence and success in their efforts to improve the landscape for family planning.

Country level

This award will recognize a government that has made significant advancements and extraordinary achievements in family planning.

Organization/Facility level

This award will recognize the contributions of non-state actors or entities working at the country level in one or more of the following areas: service delivery, advocacy/policy, research, or demand generation for family planning.

Individual/Team level

This award recognizes players whose commitment and efforts are crucial in expanding access to voluntary family planning. Nominations are accepted for individuals and small teams.

Awardees for the 2018 EXCELL Awards were carefully selected among a competitive pool of nominations. Winners were designated by the Special Awards Committee, which is comprised of diverse members of the family planning community and includes senior representatives from donors, United Nations agencies, foundations and the Global South..

13:15 Call to Order by Master of Ceremonies	Jose “Oying” G. Rimon II , Director and Senior Scientist of the Bill & Melinda Gates Institute for Population and Reproductive Health, Johns Hopkins Bloomberg School of Public Health
Remarks from the Scientific Sub-committee	Dr. Yoonjung Choi , Chair of the ISC Scientific Subcommittee & Deputy Director, PMA2020
Scientific Award Presentation	Dr. Cynthia Minkovitz , Department Chair, Population, Family, & Reproductive Health, Johns Hopkins Bloomberg School of Public Health
Packard Quality Innovation Challenge Winner Announcement	Lana Dakan, Program Officer, Population and Reproductive Health , Packard Foundation
Key Remarks	Youth Sub-committee
	Faith Sub-committee
	Parliamentarians
Excellence in Leadership for Family Planning (EXCELL) Awards	Conferring awards: Dr. Diane Gashumba , Honorable Minister of Health of Rwanda Dr. Ellen MacKenzie , Dean of the Johns Hopkins Bloomberg School of Public Health Dr. Cynthia Minkovitz , Department Chair, Population, Family, & Reproductive Health, Johns Hopkins Bloomberg School of Public Health

14:45 Performance by youth and very special guests

Yoonjung Choi
Chair of the ISC Scientific Subcommittee & Deputy Director, PMA2020

Dr. Yoonjung “YJ” Choi is an Associate Scientist at Johns Hopkins Bloomberg School of Public Health and Deputy Director for PMA2020. She oversees technical aspects of the project to ensure high quality data, advance survey methods and research, and improve use of PMA2020 data by various stakeholders. Her research interests include survey methods and data quality assessment, family planning, and fertility transition in developing countries—with an ultimate goal of data and knowledge translation for decision making in global health and development. Previously, she was a Senior Technical Advisor for Population and Metrics at the USAID and conducted impact evaluation research at Johns Hopkins University and program monitoring and evaluation at the World Bank. She holds a Doctorate of Public Health from Johns Hopkins University.

Lana Dakan
Program Officer, Population And Reproductive Health, the Packard Foundation

Lana joined the Packard Foundation as a Program Officer in January 2006 and she currently oversees grant-making in the program’s Global and South Asia subprograms. Prior to 2006, Lana worked at the Foundation as a research associate for the Foundation’s Visiting Scholar, and then as a research associate for the Population and Reproductive Health Program, where she conducted research and analysis to inform the program’s grantmaking. Prior to joining the Foundation, Lana worked in Indonesia for six years on family planning programs with USAID and Pathfinder International. She has extensive international experience, a bachelor’s degree in international relations from Occidental College and a master’s degree in public health from the University of Michigan.

INFO- GRAPHICS

ICFP 2018 INFOGRAPHICS

Looking for quick statistics on the many benefits of investing in family planning? Check out these infographics to learn more about the economic and health effects, as well as the positive impact on youth, that family planning offers.

AN INVESTMENT IN FAMILY PLANNING BRINGS A LIFETIME OF RETURNS

MORE PROSPEROUS NATIONS

HEALTHIER FAMILIES

UNLEASHED YOUTH POTENTIAL

IF...

All pregnant women and newborns received **STANDARD CARE**

The 214 million women with an unmet need could access **MODERN CONTRACEPTIVES**

THEN, FAMILIES AND COMMUNITIES WOULD BE HEALTHIER.

MATERNAL DEATHS WOULD DROP BY

↓ **73%**

UNINTENDED PREGNANCIES WOULD DROP BY

↓ **75%**

NEWBORN DEATHS WOULD DROP BY

↓ **80%**

AN INVESTMENT IN FAMILY PLANNING BRINGS A LIFETIME OF RETURNS

MORE PROSPEROUS NATIONS

HEALTHIER FAMILIES

UNLEASHED YOUTH POTENTIAL

1.8 BILLION
youth (ages 10-24) live primarily in developing regions

(Source: The Power of 1.8 Billion: Adolescents, Youth and the Transformation of the Future, UNFPA State of World Population, 2014)

60%
of sexually active adolescent girls in these regions who don't want to get pregnant are **NOT** using modern contraceptives

(Source: ADDING IT UP: Costs and Benefits of Meeting the Contraceptive Needs of Adolescents, Guttmacher Institute, 2016.)

WE ARE AT A CRITICAL MOMENT TO SUPPORT YOUTH SO THEY CAN...

stay in school

pursue their career goals

reach their full potential

NOTES

**INTERNATIONAL CONFERENCE ON
FAMILY PLANNING
KIGALI, RWANDA • 12-15 NOVEMBER 2018**

The 2018 International Conference on Family Planning would not have been possible without the generous support from our Core Organizing Group and sponsors.

REPUBLIC OF RWANDA
MINISTRY OF HEALTH

JOHNS HOPKINS
BLOOMBERG SCHOOL
of PUBLIC HEALTH

Bill & Melinda Gates Institute for
Population and Reproductive Health

CORE ORGANIZING GROUP

CONFERENCE SPONSORS:

We extend our sincere appreciation to our partners for their support of this year's ICFP!

BILL & MELINDA
GATES foundation

Gates Open Research

A platform for rapid author-led publication and open peer review of research funded by the Bill & Melinda Gates Foundation

Powered by
F1000

Recent publications

A demographic dividend of the FP2020 Initiative and the SDG reproductive health target: Case studies of India and Nigeria

Qingfeng Li and Jose G. Rimon

Mortality, fertility, and economic development: An analysis of 201 countries from 1960 to 2015

Qingfeng Li, Amy O. Tsui, Li Liu, Saifuddin Ahmed

See the latest findings, publish your Gates-funded research, visit gatesopenresearch.org

Findings from the 5th International Conference on Family Planning will be published in a dedicated conference collection
